Learn how to create rapport, through NLP (Neural Linguistic Programming), Reflective Listening, Body/ Voice Reading, and Pacing. Use these tools during inventory in the beginning of your sessions which will inform you as to what to do on the table. Includes scanning; seeing how much you can hear, see and feel the landscape of the client and how that dovetails into the client's story or directly opposes it. Body Language – How do you read what's going on when the client's story and their body language is not congruent? Fascinating informative work!

Lisa Nemzo EHP-C CST is a mystic, oracle, musician/National Board-Certified practitioner and educator. Lisa accesses her extraordinary neurological extensions to unwind and release trauma in the biofield with clients, students and master level practitioners. Lisa has presented her breakthrough case histories at conferences attended by Research Scientists studying the Biofield.
