

# Content Strategy Update

---

Kate Lorenz  
Content Strategy Lead  
October 27, 2021

## Agenda

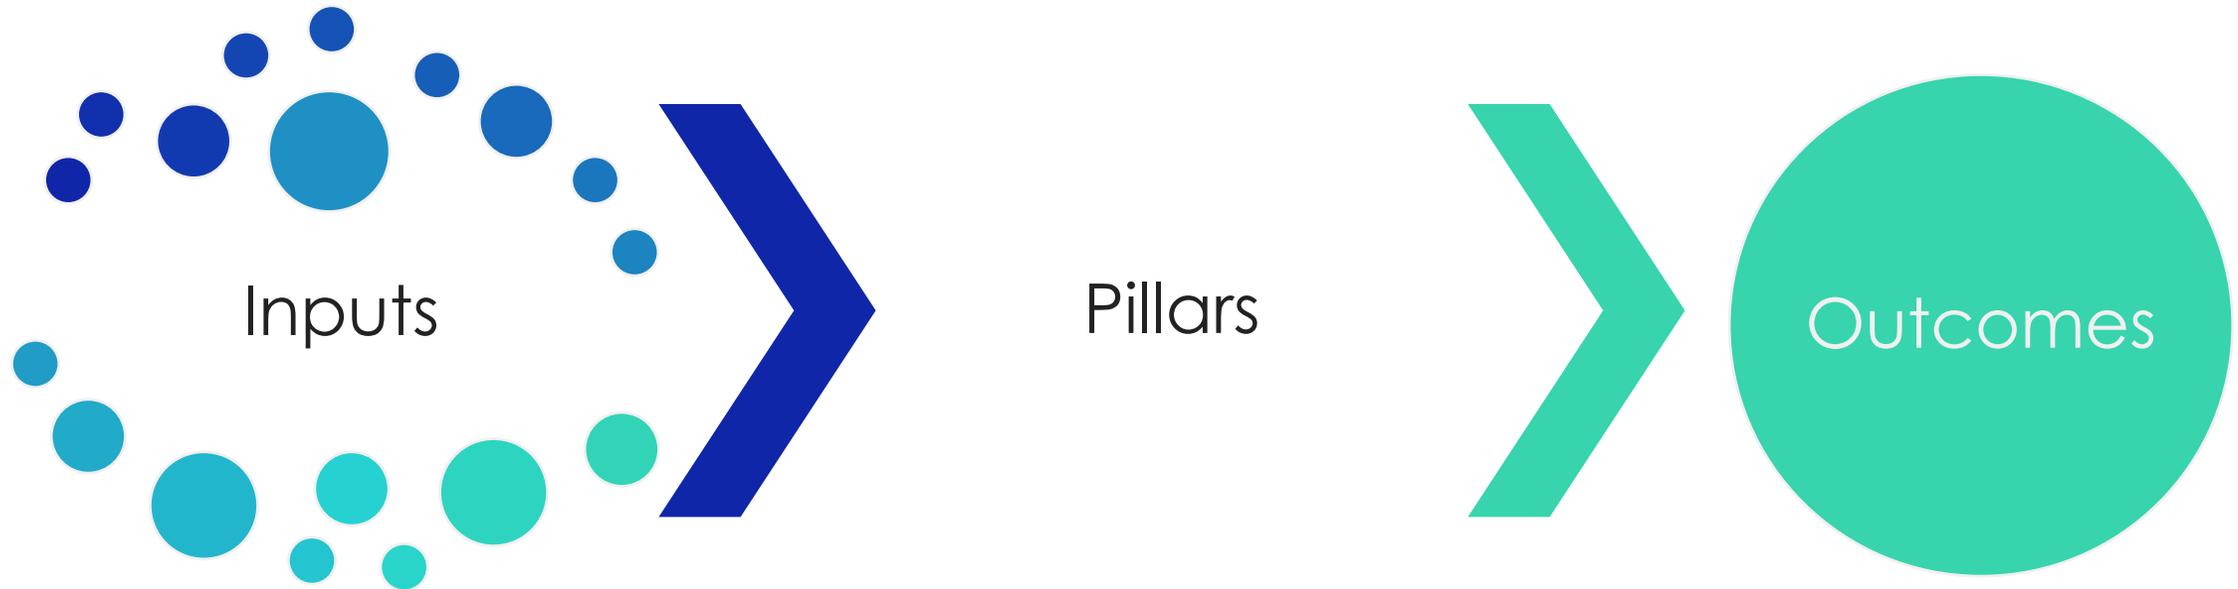

- Purpose of Content Strategy
- Content pillars and how they flex by domain and iterate
- Applying the pillars to our cross-functional work

**Content** is a **business asset**, and our strategy ensures that each piece of content answers a **clear use case** and meets a **specific business objective**.

Useful, Usable, Well-Structured, and Easily Found

## Our strategic approach: Pillars

- HIMSS Mission and Vision
- McKinsey research
- Foundational strategy work by launch team
- HIMSS Media performance data
- Brand architecture and voice
- Initial guiding principles for content

- Operational Efficiency
- Care Delivery
- Career & Professional Growth
- Healthcare Data Analytics
- Technology Utilization and Innovation

## Our initial guiding principles will remain the same for now

### Audience-centric

Curate content coming into the platform to ensure that is it most relevant to our audience's needs.

Enable users to filter their content experience within the platform to find the topics most important to them.

### Balanced

Embrace a diversity of sources and types, both from within HIMSS and our 3rd party partners, to demonstrate the platform's convener approach and ensure no voice too dominant.

### Diverse

Feature a variety of content formats ie. text, video, audible and data visualizations produced in a variety of lengths and depth choices to meet consumer consumption preferences.

## Our content pillars are the overarching guide to themes and topics

These will iterate over time as we learn more about our users, their needs and their behaviors, our partner organizations' shifting priorities, and the exponential growth of the healthcare industry

<b>Pillar</b>	<b>Operational Efficiency</b>	<b>Care Delivery</b>	<b>Career &amp; Professional Growth</b>	<b>Healthcare Data Analytics</b>	<b>Technology Utilization and Innovation</b>
<b>Key Concept</b>	Identifying and integrating organizational and cultural adjustments necessary to make that innovation work	Linking consumer expectations and needs to care pathways, care teams and sites of care	Development, collaboration and training to stay relevant, compliant and marketable	Using data and its applications more effectively and securely	Transformative technologies critical to achieve tangible outcomes for health, clinical burden, efficiency and cost

---

## Pillar: Operational Efficiency

**Concept** Identifying and integrating organizational and cultural adjustments necessary to make that innovation work

Digital transformation requires leaders to modernize operations to achieve value with efficiency, accelerate business goals and amass savings and get buy-in from stakeholders as new digital solutions are introduced and implemented. Accelerate guides those leaders through the organizational and cultural adjustments to make that innovation work.

**Themes**

- Benchmarking & assessments
- Change management
- Cost savings
- Digital trust
- Growth, expansion & partnerships
- Leadership
- Lean operations
- Logistics
- Maturity models
- Performance improvement
- Professional development
- Retention & recruitment strategies
- Training & learning
- Transformational cost strategies
- Workforce development & upskilling

**Sample pain points related to themes**

How do you differentiate value-producing technologies from hype?

As a leader, what are the critical steps in managing the change process? How do you leverage digital strategies throughout your organization to benefit all aspects of health care?

How do I foster a workforce that's educated on trends, processes, research, and technology to achieve digital transformation?

What is the best way to scope, scale, and lead digital transformation that can deliver financial results?

---

---

## Pillar: Care Delivery

**Concept** Linking consumer expectations and needs to care pathways, care teams and sites of care

Digital transformation can be used to engineer human healthcare experiences that truly matter and bring about meaningful ways of addressing the socio-economic aspects of healthcare. Accelerate enables organizations and professionals deliver on the unique and rapidly evolving consumer and market needs requires systematic changes to care pathways, care teams and sites of care.

- Themes**
- Alternative care settings
  - Acute care in the home
  - Care models
  - Clinical workforce practices
  - Improved patient care services
  - Patient access (e.g., rural health, broadband access)
  - Population & public health
  - Precision medicine
  - Public policy

**Sample pain points related to themes** How can my organization leverage innovation to improve experiences patient care services while driving affordability, quality and convenience?

Which technologies will provide more cost-effective, patient-centered, quality care?

Which advanced techniques should clinicians be using for precise diagnosis and proper treatment?

How can my organization close health equity gaps, address social determinants of health and generally improve access?

---

---

## Pillar: Career & Professional Growth

---

**Concept** Development, collaboration and training to stay relevant, compliant and marketable

In an age of rapid medical and technological advancements, acquiring new skills and knowledge is essential to keep up. Accelerate provides avenues for professional development, collaboration and training that can free up time for patient visits, radically improve the care that's delivered, lessen administrative and regulatory burdens, and improve one's marketability as a job candidate.

- 
- Themes**
- Adapting to change & embracing automation
  - Career pathing & transitions
  - Certifications & maintenance
  - Clinical performance
  - Culture & environment
  - Digital workspaces
  - Emerging jobs (in health informatics & health analytics)
  - Nascent learning technologies
  - Interprofessional cooperation & collaboration
  - Job search strategies
  - People leading
  - Professional growth
  - Time management

**Sample pain points related to themes**

---

What are the continuing education credits I need to maintain or advance my career?  
Which certifications are the right ones for me to advance my career and validate my expertise?  
Where can I go to learn best practices and get career advice?  
Which medical technologies should I focus on learning about for my particular areas of practice?  
How can I transition from clinical practice to operational leader?

---

## Pillar: Healthcare Data Analytics

**Concept** Using data and its applications more effectively and securely

Healthcare systems are catching up with immediate data challenges while simultaneously looking to the future of data to improve clinical outcomes, keep people healthy and lower costs. Accelerate provides resources and training for understanding data, and using it more effectively and securely to do healthcare differently.

**Themes**

- AI and machine learning
- Big data
- Cybersecurity & privacy
- Informatics
- Data analytics
- Data lakes
- Data management & technology optimization
- Data-driven models
- Data-led prediction & prevention
- EHR
- Incident response planning
- Interoperability
- Personalized medicine
- Predictive analytics
- Clinical decision support

**Sample pain points related to themes**

How can clinicians use basic patient data and analytics to make real-time care decisions?

How can my organization use on-demand analytics allow for real-time modification of workflows, care delivery, documentation and staffing?

What do predictive analytics have to do with consumer-centricity?

What's data's role in developing more transformative strategies that include entire patient populations?

What are the pitfalls with leveraging AI?

---

## Pillar: Technology Utilization and Innovation

### Concept

Transformative technologies critical to achieve tangible outcomes for health, clinical burden, efficiency and cost

Hand-in-hand with data, transformative technologies, like augmented reality, advanced diagnostic tools, and hyper-automation are critical address real-world problems and achieve tangible outcomes for health, clinical burden, efficiency and cost.

### Themes

- Blockchain technology
- Chatbots
- Cloud computing & technologies
- Collaboration software & business apps
- Communication & collaboration tools
- Digital & augmented reality
- Hardware
- Internet of Things
- Mobile workstations
- Patient scheduling solutions
- Medical devices & equipment
- Robotics
- Telemedicine
- VR & Simulation
- Wearables

### Sample pain points related to themes

How can I learn more about leveraging in-home testing devices and contactless services?

What are some of the ways augmented and virtual reality are being integrated across the care spectrum?

Which new and improved equipment should I invest in for my practice?

How do I use this software my employer requires me to use?

---

# How the content pillars flex for Professional Development

Leaning in to needs of our primary personas

Pillar	Operational Efficiency	Care Delivery	Career & Professional Growth	Healthcare Data Analytics	Technology Utilization and Innovation

## Our strategic approach: Intended outcomes

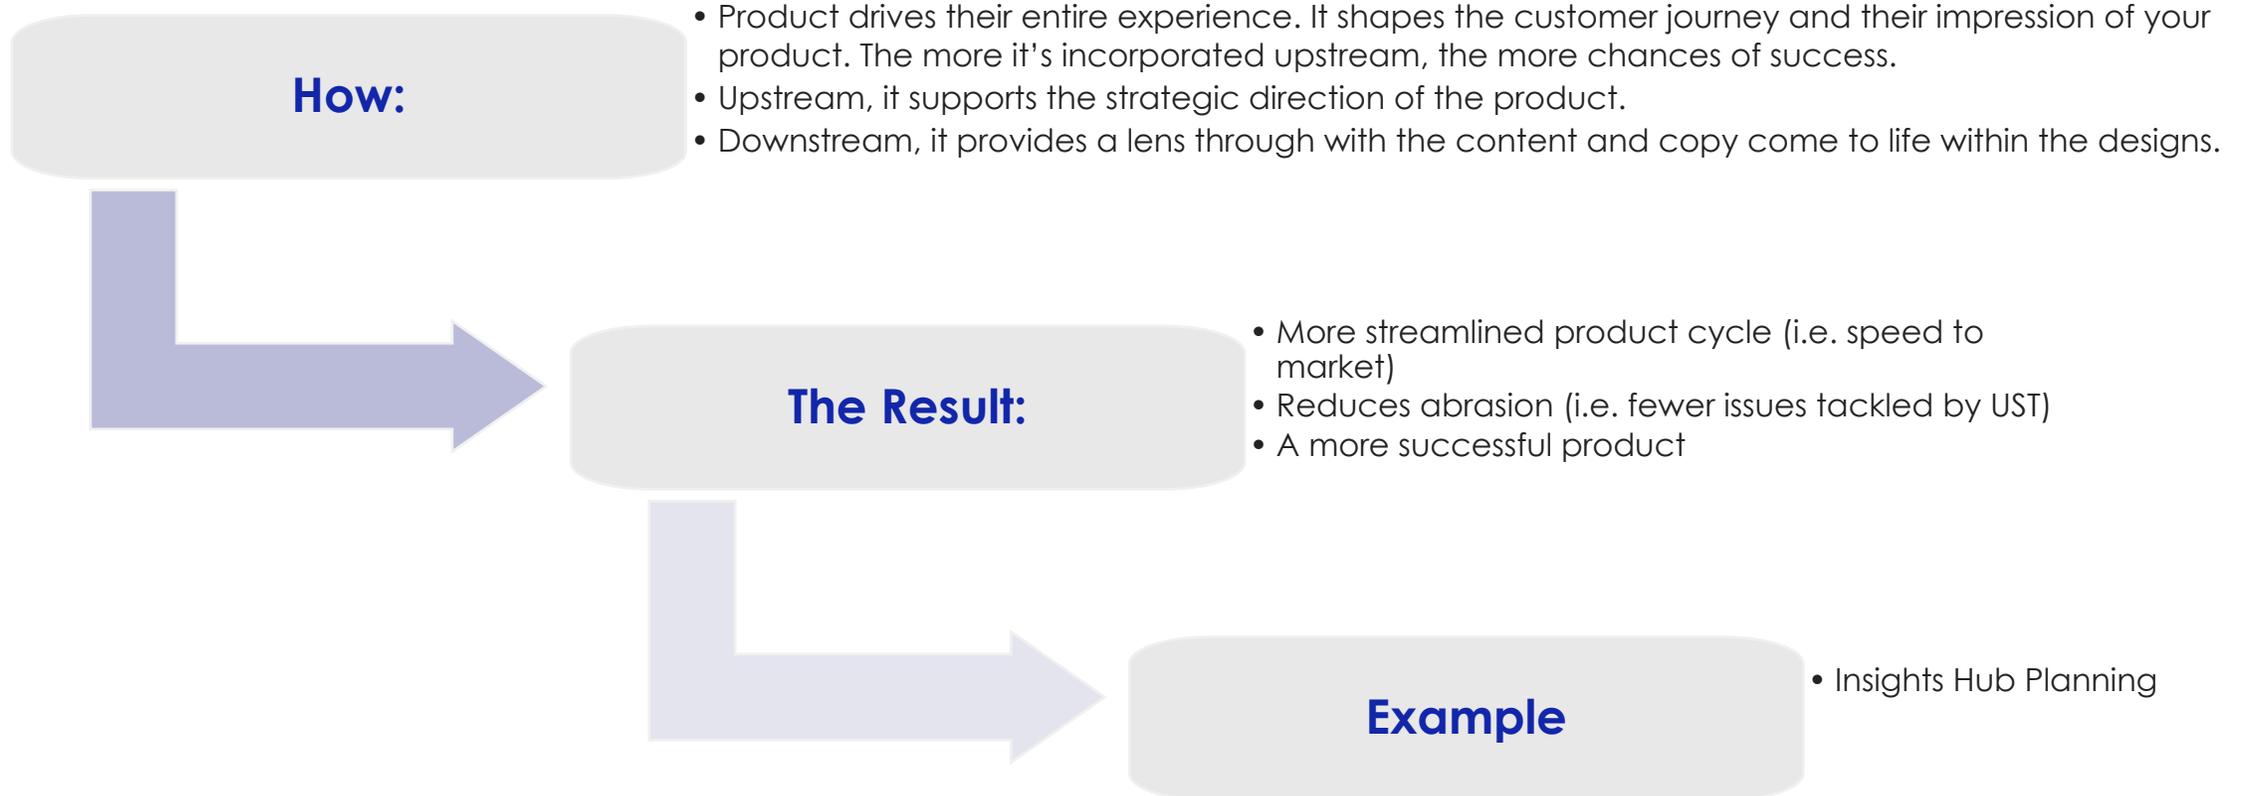

**Our pillars are foundational to the work that's done across the business.**

By putting a stake in the ground with our pillars and define the product story, we're able to drive successful business outcomes for Accelerate and our strategic partners, while empowering the end user and propelling the healthcare industry forward.

## Supports Design & Development

## Guides Platform & Content Organization

### How:

- Taxonomy and tagging structure are direct builds on the pillar foundation.
- These elements define how content is organized and aids in navigation, filtering and discovery for the end user and operational efficiencies on the back end.
- Tags are also used to drive personalized experiences in multiple ways.

### The Result:

- Maximizes investment in content by enabling multiple avenues of discovery
- As a business asset, these allow for content reuse and managing the content lifecycle (reviews, sunsetting, expiration of CEUs, etc.)
- More robust and actionable user analytics for the business and partners

### Example

- PD Taxonomy

## Facilitates More Focused Investor & Biz Dev Conversations

### How:

- Sales can identify gaps and opportunities around pillars and themes based on their core capabilities and build conversations that speak to the intersection of their content and Accelerate's story.
- Where might we be over saturated with content? Where have we not looked before?

### The Result:

- More laser focused partner identification

### Example

- CE Strategy

## Builds More Strategic Content Partnerships

### How:

- Using the pillars to guide their own storytelling on the platform. Helping them envision their content, their voice, their brand on Accelerate.
- Used as a device for showing partners how to maximize content investment through scale, reuse, discovery.

### The Result:

- Stronger partnerships, longer relationships, more opportunities for growth via existing partners and proof of concept for new partners

### Example

- Future conversations with existing partners and new ones

## Fuels Marketing & Engagement Efforts

### How:

- The pillars and their themes can be used to plan campaigns, crystallize messaging and proof points, and inform calendar planning.
- Marketing has dependencies on the product roadmap, the pillars and the subsequent content to fuel communication strategies. The pillars and their themes can be used to plan campaigns, crystallize messaging and proof points, and inform calendar planning.
- For Events with influencers and thought leaders, the pillars provide guidance for content they bring to the newsfeed, the conversations they have in groups, and the events they co-produce with Accelerate

### The Result:

- New content driven by the pillars and the pillars themselves create new opportunities for reaching new audiences.
- Increased and higher quality of engagement when we support individuals invested in bringing content to the platform

### Example

- GC content

---

## Activation

### Sequencing the work in parallel with product roadmap priorities

---

Set up 1-1 worksessions with cross-functional partners to review use cases and activation

---

Socialize with existing partners to help them envision their content on Accelerate and map process for new partner discovery

---

Create style guide that incorporates modulation of the pillars, brand voice and nomenclature (+UX writing guidelines)

---

Conduct content audit (using pillars and style guide) as lens to identify gaps and areas for improvement

---

Further define taxonomy and tagging approach and incorporate into roadmap, starting with PD

# Appendix

# Content Strategy

## Conclusion

### Your Opening Assertion

Content is a business asset and content strategy is critical to delivering on the value prop for our partners and the user experience of the platform.

Content strategy connects user needs, platform engagement, and business priorities to deliver content that is useful, usable, well-structured, and easily found.

## Dependencies

### We are dependent on:

Product, UX, Tech, Analytics

### Who is dependent on us:

Product, Biz Dev, UX, Marketing, Engagement, UST

## Evidence

### Apply the Rule of Three

- Developed **content pillars**, which are the crystallization of themes and topics that underscore Accelerate's purpose. This foundational work enables a focused approach to content planning, facilitates more meaningful investor and biz dev conversations, drives successful content partnerships, and supports an improved user experience.
- Created **taxonomy and tagging** structure. These aid in content organization, content discovery, dynamic recommendations, on-site search, SEO and the capture of better analytics for content providers and the business.
- Designed a CE strategy to drive the business forward with an approach for targeting PD content partners and bringing differentiating and innovative content types to the domain. The approach sets up Accelerate as a means for partners to maximize content investment through scale, reuse, discovery.

## So-What

### The Call to Action

Everything is content – the words on a screen, videos, icons, navigation labels errors and success messages, and FAQs, to name a few – and content strategy directs its planning, execution, standards, and governance.

So if you have an idea or question related to any of the above, Kate can help.

Pillar	Operational Efficiency	Care Delivery	Career & Professional Growth	Healthcare Data Analytics	Technology Utilization & Innovation
Concepts	Digital transformation requires leaders to modernize operations to achieve value with efficiency, accelerate business goals and amass savings and get buy-in from stakeholders as new digital solutions are introduced and implemented. Accelerate guides those leaders through the organizational and cultural adjustments to make that innovation work.	Digital transformation can be used to engineer human healthcare experiences that truly matter and bring about meaningful ways of addressing the socio-economic aspects of healthcare. \*Open position

	The Value	The Dependencies
<b>Content Pillars</b>	Crystallization of themes and topics that underscore Accelerate's purpose. These are used for content planning, pursue partners with content related to these themes, and the content they bring onto Accelerate. These iterate over time based on user behavior, platform engagement and business priorities	User profiles based on site analytics.
<b>Tagging Strategy</b>	Tags help with content organization, content discovery, dynamic recommendations, on-site search, SEO and understanding what our users care about.	
<b>Content Analytics</b>	Implement additional areas of measurement to assess content performance and effectiveness, iterate strategies, and deliver insights to our partners.	Tagging strategy. Ability for Dev to implement.
<b>PD Course Catalog</b>	Continue to work with Biz Dev to fuel PD with new content. Critical to fulfill partner agreements, drive revenue, build trust, and court new users.	Hiring of Content Specialist. Alignment with HIMSS21 teams on assets. Signed contracts and speed of publishing.
<b>R&amp;I/Content Hub MVP</b>	Provides content partners additional opportunity for on-platform presence of more robust content that's flexible to their needs. Users benefit from more robust and diverse content offering.	Hiring of Content Designer. Product roadmap and dev team bandwidth.
<b>Staffing</b>	Increase the velocity for delivering on content priorities. Senior Content Specialist will be responsible for uploading all PD course content. Content Designer will focus on on-site content and work lock-step with the design team and play key role on R&I.	Available talent pool and competitive hiring market.
<b>Content Partner Strategy</b>	How do we expand our circle beyond the HIMSS Universe? Documents a strategic and repeatable approach for how we target and recruit content partners based on user needs, content pillars, platform strategy and business goals.	Content pillar development. Analytics to build user profiles and understand appetite for content topics.
