Some fields (if highlighted in yellow) have been prefilled for you. Please review, confirm and correct any information if it is incorrect.

Name

Jeff

First name (2948)

Peckman

Last name (2949)

Email

jpeckman108@msn.com

Party affiliation

AO45 - Unity Party

What type of office are you running for?

govnr - Governor

Which state or territory are you running in?

CO - Colorado

What office are you seeking election to? Please begin typing to find your office in the drop down list of options. If you cannot find a match, please enter the office you're running for as precisely as possible.

Governor of Colorado

What year is the election being held?

2026 - 2026

Are you the current officeholder and seeking re-election for the same office (the incumbent)?

No

No

Are you running as a write-in candidate?

No

No

***Your Key Messages (required)**

Who are you? Tell us about yourself.

On March 1, 1954, I was born in Paola, Kansas, about 17 hours after the Castle Bravo nuclear blast lit up the South Pacific. Living on a farm my first five years sparked my curiosity about the wonders of nature. That led to my life's mission as a "solutionist".

At age ten, I vowed to find and promote the best solutions to the world's problems. I enjoy developing innovative strategies to elevate life on Earth, like Archimedes "lever" to "move the world". My pioneering initiatives created headlines worldwide, even setting local news media records. [See "In the News" at my website.]

Over the last 28 years, I've conducted three candidate campaigns and three ballot initiative campaigns. These brought me good endorsements from well-known and influential community leaders. [See my website "Endorsements" page]

Many of the solutions I've promoted are extraordinarily affordable and effective. So, they'll appeal to the full spectrum of voters. These solutions are in areas such as economic development, health, education, energy, public safety, criminal justice, agriculture, homelessness, environmental quality, world peace, counterterrorism, and even disclosure of UFO secrecy. [See my "SOLUTIONS BLUEPRINT"]

I intend to make Colorado a global leader in new economic engines that will not only solve global problems but are predicted to have trillions of dollars in economic impacts over the next 25 years. I just like being helpful wherever possible.

Please list below 3 key messages of your campaign. What are the main points you want voters to remember about you and your candidacy?

First key message

Increasing the coherence in government and society, through coherence principles and technologies, realizes the axiom, "A rising tide lifts all boats". It benefits all areas of government responsibility. This is vital because a "virus of incoherence" plagues much of humanity. As a result, society has devolved. Government mirrors the collective consciousness of the People. To improve government, and evolve our society to a higher level, more coherence is needed on our collective consciousness. This idea is explained by Ilya Prigogine, Nobel Prize-Winning Chemist: "When a complex system is far from equilibrium, small islands of coherence in a sea of chaos have the capacity to shift the entire system to a higher order."

Second key message

Colorado automotive engineering students could build a car largely out of cow manure that could beat a Tesla in a Formula One race! Seriously! A Colorado-based coherence technology converts methane into hydrogen and the new "wonder material" graphene. They can use the graphene throughout the car and use the hydrogen for fuel.

This same core technology could achieve Colorado goals for reduced emissions, in two years, without more EVs and tax-funded incentives, and regardless of U.S. policies. They haven't been achieved in the last 17 years under Democratic leadership. That's because the Democratic Party does not want to solve air pollution and climate change problems. It just wants to milk these problems to get votes and campaign donations.

Third key message

The "Butterfly Effect" can be engineered to improve the function of government and elevate the quality of life for all people. 700,000 children under age five die each year from air pollution. Colorado has the solution to largely solve this global problem within five years. Too much is invested in exploiting problems instead of preventing and solving problems. As Buckminster Fuller said, in various ways, "You never change anything by fighting it; you change things by making them obsolete through superior technology." The new model I intend to create, and be remembered for, will be based on coherence as a fundamental operating principle and a goal worth attaining. This is critical for breaking through the two-party stranglehold on America.

What areas of public policy are you personally passionate about?

I'm passionate about every area of public policy where I can offer affordable and effective solutions to major problems, uplift humanity, and be a good steward of Mother Earth's natural resources. My "SOLUTIONS BLUEPRINT" describes many of the areas I've already tried to help over the last 55 years and would continue to help as Governor of Colorado. These areas include agriculture, education, health, environmental quality, climate change, technology, criminal justice, public safety, counterterrorism, world peace, homelessness, economic development, green building materials, clean energy and government budgeting; truth in politics, news, and public relations; and Disclosure of UFO/UAP/extraterrestrial secrets.

Your Campaign (optional)

What organizations or individuals have endorsed your campaign?

If available, please provide a link to your campaign website's list of endorsements you've received.

Enter the link for your ratings by an independent organization who rates candidates.

Enter the link to a pledge you have made at the request of a separate organization.

Your Background (optional)

1a. What college or university did you attend?

Maharishi International University

1b. Did you graduate from there?

No

No

Would you like to add another college or university?

No

No

What high school did you attend?

Abraham Lincoln High School

What would you say is your profession?

AO194 - Entrepreneur

Have you ever served in the military?

No

No

Photo (optional)

Do you want to submit a photo for your profile?

Yes

Yes

Photo guidelines

- Photos must be of the correct candidate and only the candidate
- The face must be clearly visible and unobstructed
- Must be fully clothed
- Photo must not contain any words or symbols that distract from the candidate
- Photo must be in color
- Photo must be an actual photo without any filters or edits (other than cropping or resizing)
- Photo must be recent (ideally less than two years old)
- File format must be a jpg, jpeg, gif, png, bmp, or tif
- Photo dimensions must be at least 1024x1024 pixels
- Photo must be 2MB or less
- Ballotpedia retains editorial discretion
