

Global Disarmament Creative Collaborative *for* Funding for Humanity & Earthcare

Our Global Disarmament Creative Collaborative

- We seek to build a **group of creative collaborators for disarmament**.
- We are seeking **new ideas, insights, and solutions** that never surface because collaboration may feel risky, time-consuming, or not rewarded.
- We are seeking to build **collaborative intelligence** — the ability to **think together, disagree safely, build on each other, and turn differences into breakthroughs**.
- We are seeking to discover new **shared insights, strengthen trust, reduce friction, and turn hidden perspectives into creative action**.
- We recognize we usually share about **what we already know and projects we value**.
- Many of the proposed ideas we suggest may be very worthwhile, but nothing has ever led to getting **closer to disarmament**.
- It is easy to become **enthusiastic about many worthwhile suggestions**, but they will often lead us away from the **goal of disarmament in the long run**.
- Before we agree on an action to take, we need to explore whether it will **really result in getting us closer to the goal of disarmament**.
- We agreed our meeting was **very worthwhile because we clarified that we feel nourished with like-minded people working for global disarmament**, which will **free up funding for humanity and Earthcare**.
- Our meetings take place every third Wednesday.
- Our **Key Performance Indicators** are **1) sustaining the regular meetings, 2) growing our Global Disarmament Creative Collaborative, and 3) using Respectful Disagreement as our power tool to create additive solutions**.
- Feel free to invite others who are interested in Creative Collaboration for Global Disarmament.
- New members [can register here](#).

Our Global Disarmament Creative Collaborative

✓ **Key Performance Indicators**

- 1. Sustaining** the regular meetings
- 2. Growing** our Global Disarmament Creative Collaborative
- 3. Using** Respectful Disagreement as our power tool
to create additive solutions

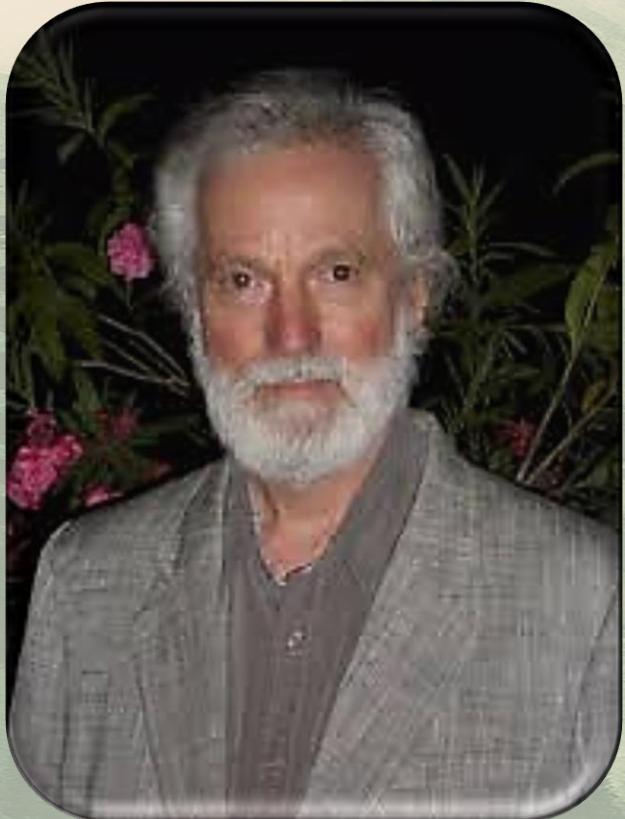

Global Disarmament Creative Collaborative *for* Funding for Humanity & Earthcare

Collaborating Partners (Phase I)

- **Climate Emergency Institute** (Peter Carter, MD)
- **GreenHeart Education & Mutually Assured Survival** (Julie D. Johnston, MAdEd)
- **Rule of Law on Earth Project** (David G. Newman, KC)
- **International Rotarian for Peace & Health** (Richard Denton, MD)
- **Smartsettle Mediation System** (Ernest Thiessen. PHD)
- **Wisocracy, Education To Live Well** (Sanford Hinden)
- Additional partners to be invited (peace coalitions, youth climate groups, medical associations, etc.)

Global Disarmament Creative Collaborative *for* Funding for Humanity & Earthcare

Why Dr. Carter's Voice Matters

Dr. Peter Carter has warned for decades that military emissions, military spending, and geopolitical escalation are among the *least addressed drivers* of climate breakdown.

His expertise helps connect two crises that are often treated separately: the accelerating arms race and accelerating global warming.

His presence helps anchor the Summit in scientific and moral clarity.

We Meet Every Third Week

On Zoom

Global Disarmament Creative Collaborative *for* Funding for Humanity & Earthcare

Julie D. Johnston, MAdEd

Julie is the creator of

Mutually Assured Survival (M.A.S.),

a visionary educational framework that replaces the outdated logic of Mutually Assured Destruction.

Her work links global citizenship, sustainability, and peace education, offering a practical and inspiring pathway toward a world committed to safeguarding all children and the planet.

She co-directs **GreenHeart Education**
with Dr. Peter Carter.

WORLD DESTRUCTION INDEX

Indictment of systemic harm, actions so reckless, destructive, and reality-denying that they endanger civilization itself.

The crime of our era is not ignorance — it is incentivized harm.

Power without accountability • Profit without ethics • Technology without conscience • Leadership without maturity

1. AGGRESSION AGAINST HUMANITY

WAR AS GOVERNANCE — Terror as strategy.

Truth replaced by propaganda.

2. UNGOVERNED POWER

AI WITHOUT ALIGNMENT — Capability accelerates faster than safety, wisdom, and oversight.

3. AUTOMATION OF VIOLENCE

AI WEAPONS — Killing scaled up. Conscience scaled down. War made “efficient.”

4. PLANETARY SURVIVAL SABOTAGE

FOSSIL FUEL DECEPTION & DELAY — Denial manufactured. Transition blocked. Catastrophe normalized.

5. STRUCTURAL GREED AS POLICY

SHAREHOLDER CAPITALISM — People and planet treated as expendable inputs to extraction.

6. PSYCHOLOGICAL DESTABILIZATION

OUTRAGE ALGORITHM ECONOMY — Addiction as engagement. Rage rewarded. Reality fragmented.

7. ORGANIZED WAR ON TRUTH

NARRATIVE WARFARE NETWORKS — Strategic lying. Identity capture. Democracy weakened by design.

8. DOMINANCE REGRESSION

WOUNDED-EGO LEADERSHIP — Humiliation, scapegoating, cruelty — sold as strength.

9. WEALTH-POWER ESCAPISM

TECH-UTOPIAN BILLIONAIRE RULE — Civic duty bypassed. Influence purchased. Repair replaced with escape to private cities and planets.

10. PERMANENT WAR PROFITEERING

MILITARY-INDUSTRIAL COMPLEX — Insecurity sold as necessity. Violence turned into a business model.

We Meet Every Third Week

11. SYSTEMIC MISUSE
ROBBERY OF RESOURCES FROM EARTH & HUMANITY
\$3 trillion/year for Militarization, Espionage, Surveillance.

For Global Disarmament

Will World Evolution Continue?

Earth has reached the limits of its social evolution.

The United Nations

was humanity's first attempt at mature global cooperation, but veto power froze that evolution. It allowed the most powerful nations to remain above the rules precisely when planetary interdependence required shared accountability.

Humanity created one integrated world
— climate, economy, weapons, pandemics, migration —
but kept a tribal governance system.

That mismatch is now destabilizing everything.

The world now functions as one coupled system. *But we still govern it as competing tribes.*

The UN was supposed to be the bridge. *The veto restored tribal supremacy.*
So the system cannot self-regulate. *And the risks of collapse keep rising.*

Key truths

We Meet
Every Third
Week

The UN was not designed to contain bad-faith actors.
Global power without global accountability creates systemic impunity.

The veto guarantees paralysis at the top.
We built one world — but we never built one rule of law.
Interdependence evolved faster than governance.
Our tools became global. Our conscience and systems didn't.

The Globalization of Crime:
A Transnational Organized Crime Threat Assessment

Global Disarmament Creative Collaborative *for* Funding for Humanity & Earthcare

War and militarization are driving distrust, trauma, and climate breakdown, while governments pour **\$3 trillion per year** into militaries and intelligence systems.

The Earth and humanity are being destroyed by
Evil Authoritarians & Technological Madmen who have created
Nuclear Waste, Fossil Fuel Overheating, AI Robot & Drone Weaponry,
Hypersonic Missiles, and have destroyed the oceans, forests, and wildlife.
AI will displace billions of humans from the workforce with no protection plan.

Dr. Peter Carter of the **Climate Emergency Institute**
and **Julie D. Johnston** creator of **Mutually Assured Survival (M.A.S.)**,
will join us to illuminate how the global arms race fuels the climate emergency
– and why demilitarization is essential for a livable future.

Together, we'll explore how civil society, peace groups,
climate activists, and professional associations can build a
Culture for Care & Protection of Earth & Humanity.

We Meet
Every Third
Week

For
Global
Disarmament

Global Disarmament Creative Collaborative *for Funding for Humanity & Earthcare*

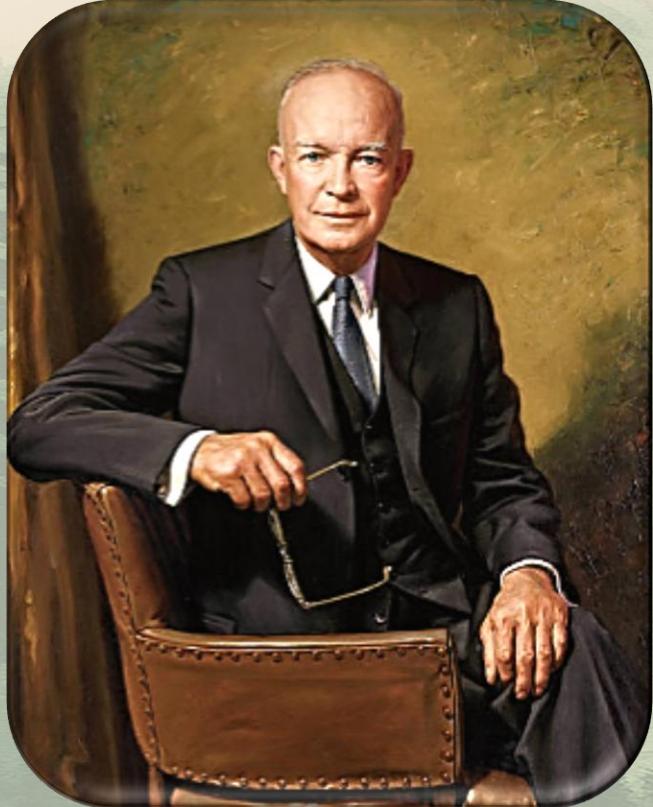

- War is based on distrust, fear, trauma, and economic benefit.
- \$3 trillion a year is spent on militaries and intelligence gathering. Increasing each year.
- World militarization is a major contributor to fossil fuel combustion and climate disruption.
- The traditional arms race has evolved into something more dangerous with AI + Robotics + Cyber + Space + Hypersonics = a self-propelling weapons ecosystem.
- Every breakthrough creates pressure for a counter-breakthrough.
- Every innovation triggers a new fear of falling behind.
- Nations will not initiate global disarmament needed for resources to sustain humanity and Earth. It is up to the people to create a Culture of Care and Protection of Earth & Humanity.

We Meet Every Third Week

For Global Disarmament

On Zoom

Global Disarmament Creative Collaborative *for* Funding for Humanity & Earthcare

**“Every gun that is made, every warship launched,
every rocket fired signifies, in the final sense,
a theft from those who hunger and are not fed,
those who are cold and are not clothed.
This world in arms is not spending money alone.
It is spending the sweat of its laborers,
the genius of its scientists,
the hopes of its children.”**

**General & President Dwight Eisenhower
“Chance for Peace”, April 16, 1953**

Insane Systems & Mad Technology

A system is insane if it destroys the conditions that allow it to exist.

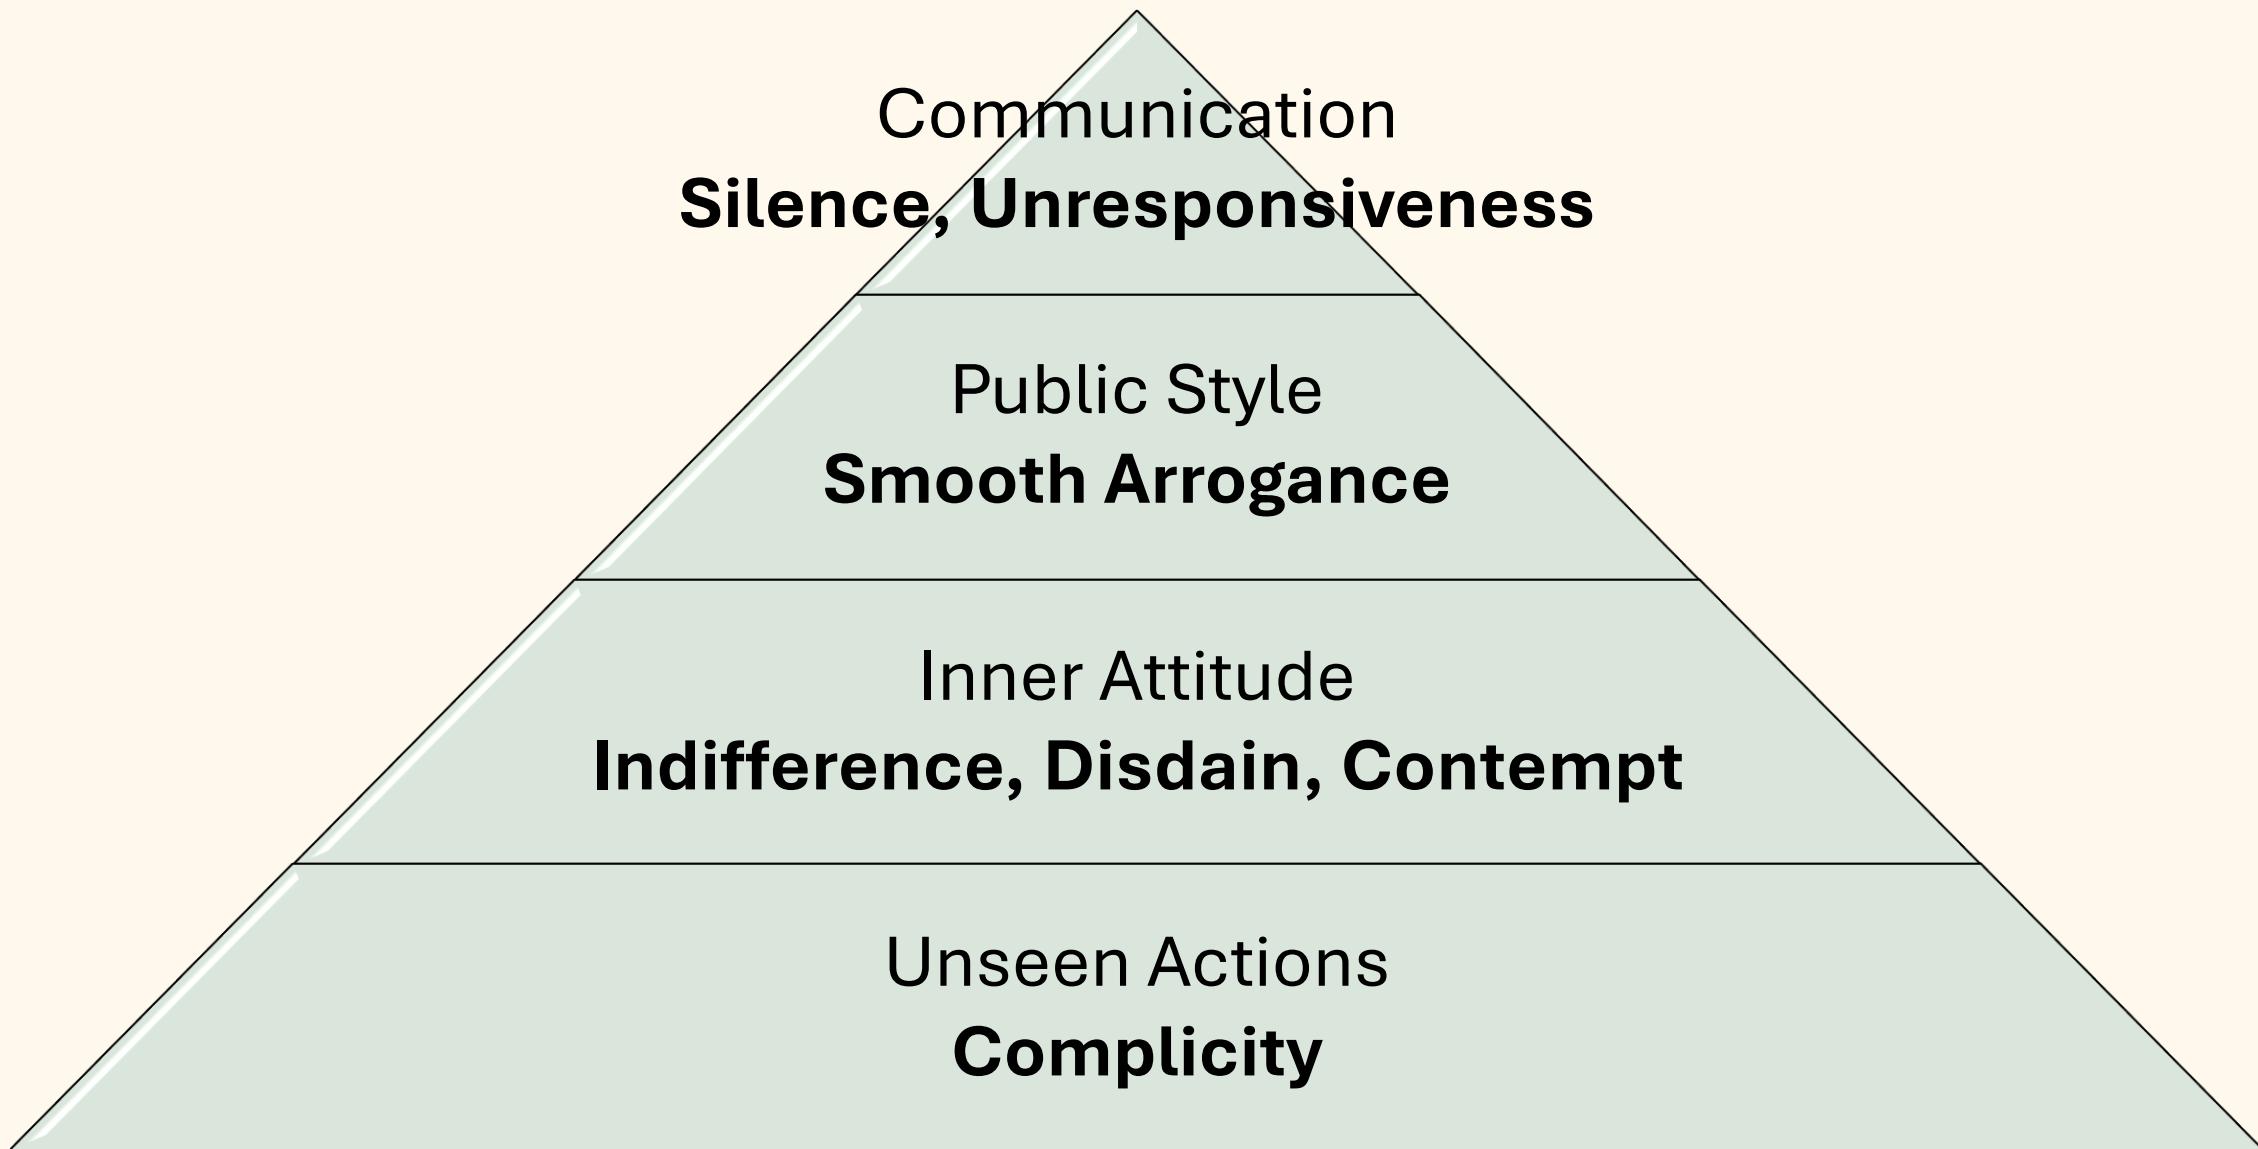

Unintended consequences are the logical outcomes of systems optimized for extraction rather than life.

Nuclear Waste	10,000 years of destructive waste material
Overheating Fossil Fuels	Overheating the environment, heat deaths, massive fires, super storms, rising seas, massive flooding
Big Agriculture	
Corporate Owned Housing	Inability to afford rents and to buy a home
Insurance Based Health Care	Inability to afford health care
Military Industrial Complex	Ever-expanding spending starving humanity and Earthcare of needed funds
Hypersonic Missiles	Ever-expanding destructive capability
AI Warfare	Unstoppable destruction
Artificial Intelligence Work	Ultimately, with no rules, up to 4 billion displaced workers

Extractors' Toxic Relating

Possible Paths

Possible Paths to Disarmament

- **Seeking the use of the Smartsettle mediation system** at the Conference of the Parties (COP), the annual United Nations summit where nearly 200 countries gather under the UN Framework Convention on Climate Change (UNFCCC) to negotiate and make decisions on global climate action.
- **Seeking Canadian leaders** to address United Nations Security Council reform to address the dysfunctionality of the superpower veto.
- **Seeking UNESCO collaboration.**
- **Seeking to engage 5% of humanity in peace and disarmament.**

Designing Regenerative, Trauma Reducing Systems

The Logic of Insane Systems & Mad Technology

A system is insane
if it destroys the conditions that allow it to exist.

**Unintended consequences
are the logical outcomes of systems optimized for extraction
rather than life.**

Extraction systems don't self-limit.

Technology accelerates whatever logic governs it.

Moral appeals don't stop runaway optimization.

Only structural constraints can stop runaway optimization.

Preemptive Structural Containment

Civilizations fail when they:

- Expect predators to self-regulate
- Confuse moral insight with structural power
- Delay redesign until collapse forces it

So, will they be contained?

Only if humans accept this final lesson:

- A civilization that does not design for its worst actors will be ruled by them.
- Containment is not about optimism.
- It is about **designing systems that make predation unsustainable**.
- That window is narrowing — but it is not closed.

Preemptive Structural Containment

This requires **civilizational maturity**

Key mechanisms:

1. Hard limits on extraction

- Planetary boundaries embedded in law
- Absolute caps, not “offsets”

Preemptive Structural Containment

This requires **civilizational maturity**

Key mechanisms:

2. Power-limiting architecture

- Anti-monopoly enforcement with teeth
- Wealth ceilings, not just floors
- Separation of economic power from governance

Preemptive Structural Containment

This requires **civilizational maturity**

Key mechanisms:

3. Incentive inversion

Make extraction:

- risky
- unprofitable
- reputationally toxic

Make care:

- stable
- rewarded
- scalable

Preemptive Structural Containment

This requires **civilizational maturity**

Key mechanisms:

4. Moral codes enforced by systems, not sermons

- No dependence on goodwill.
- No reliance on conscience alone.

The uncomfortable but essential truth

- Extractionists do not need to be converted.
- They need to be **outgrown, out-designed, and out-constrained**.
