

The World Regenerative Economics Compact

You may be feeling exhausted, cynical, and fragmented.
Your wealth, intelligence, and compassion may have been wasted.
We may feel boxed in.

Their AI is being designed to take over Earth & humanity.
Their psychological armor in the modern world is the reason
our empathy, wisdom, and reform have slid off the surface.
Their systems are built to resist reflection and regeneration.

Fair Share & Earth Care

is our global effort to redirect what already exists
— our money, our talent, and our care —
toward the healing of life on Earth.

We are not powerless — only disconnected.
The power to heal exists in what we already have:
our money, our intelligence, our care.
Let us use them — together — for life.

Fair Share & Earth Care

Join a gentle revolution of care. No banners. No slogans.
Just people redirecting what already exists
— toward fairness, peace, and the living Earth. Fair Share & Earth Care.
It's time to make the economy humane again.

Fair Share & Earth Care

The World Regenerative Economics Compact for Earth & Humanity

*“The Great Work now,
as we move into a new millennium,
is to carry out the transition from a period of human devastation
of the Earth to a period when humans would be present
to the planet in a mutually beneficial manner.”*

Thomas Berry

Humanity stands at a crossroads between breakdown and breakthrough.

The wealth, knowledge, and technology to heal the world already exist — yet they are trapped in systems that reward greed, militarism, and destruction.

We do not face a scarcity of resources, but a scarcity of wisdom, justice, and will.

Fair Share & Earth Care calls for a global redirection of wealth and purpose — from the machinery of war to the architecture of care.

Our movement unites citizens, economists, scientists, and moral leaders in a common goal: to build a regenerative world economy that serves **life, not empire; equity, not extraction.**

Our Core Principles

- 1. Fair Share Economics**
- 2. Earth Care Investment**
- 3. Care-Based Prosperity**
- 4. Democratic Regeneration**

Our Core Principles

1. Fair Share Economics

The richest individuals and corporations must contribute their just portion to humanity's wellbeing through progressive taxation on wealth, speculation, and pollution.

A Global Fair Share Fund will finance Earth restoration, health, education, and social protection everywhere.

Our Core Principles

2. Earth Care Investment

Redirect half of global military spending within a decade toward planetary renewal:

- Clean energy
- Reforestation
- Food security
- Cooperative local economies.

Peace pays better.

Our Core Principles

3. Care-Based Prosperity

Recognize caregiving, teaching, and ecological stewardship as essential economic pillars, equal in dignity to any industrial sector.

A civilization survives only when it cares for what sustains it.

Our Core Principles

4. Democratic Regeneration

Place economic decisions in the hands of communities, cooperatives, and accountable public institutions.

Empower citizens to shape budgets that heal, not harm.

Our Shared Commitment

We pledge to replace fear with fairness, competition with cooperation, and despair with design.

We call upon governments, movements, and individuals to join a **World Regenerative Economics Compact** — a practical, moral covenant to ensure that **every dollar, every policy, and every technology serves the living future.**

This is our generation's *Great Work*: to move from an economy of possession to an economy of compassion, from endless consumption to conscious restoration, from the arms race to the care race.

Together, we will turn **Fair Share & Earth Care** from vision into reality — so that all people, and the Earth itself, may thrive in peace, balance, and wisdom.
