for Living Together Collaboratively on
A Flourishing Planet Earth

A Blueprint Vision for Living Together Competitively in A Sociopathic Society & Planet

SEX
Culture of Sex Sex Trafficking & Sex Industry 12/7 Pornography Loveless Sex with Games, Dolls & Robots Lack of Authentic, Meaningful Relationships Loveless & Loneliness for the Masses

POWER
Culture of Violence & Privilege Distrust & Paranoia Psychopathic / Sociopathic Leaders Manipulation & Domination Mutual Aggression Mutual Deterioration & Destruction

MONEY
Culture of Greed & Luxury Only Money Matters Crypto Burning Up The Planet Money Laundering Tax Avoidance & Evasion Money Buys Government

Conflicting Issues

- Problematic Multinational Alliances: (NATO, BRICS, OPEC)
- Global migration from corruption, crime, climate change
- Culture war
- Social media creating hostility
- Psychopathic leaders
- Military, Industrial, Congressional, Intelligence, Media/Entertainment, Academic, Think Tank complex generating violence and war industries

Fitness-for-Duty

Psychological Evaluation of Political Leaders

In 2023 there are 51 dictators on Earth

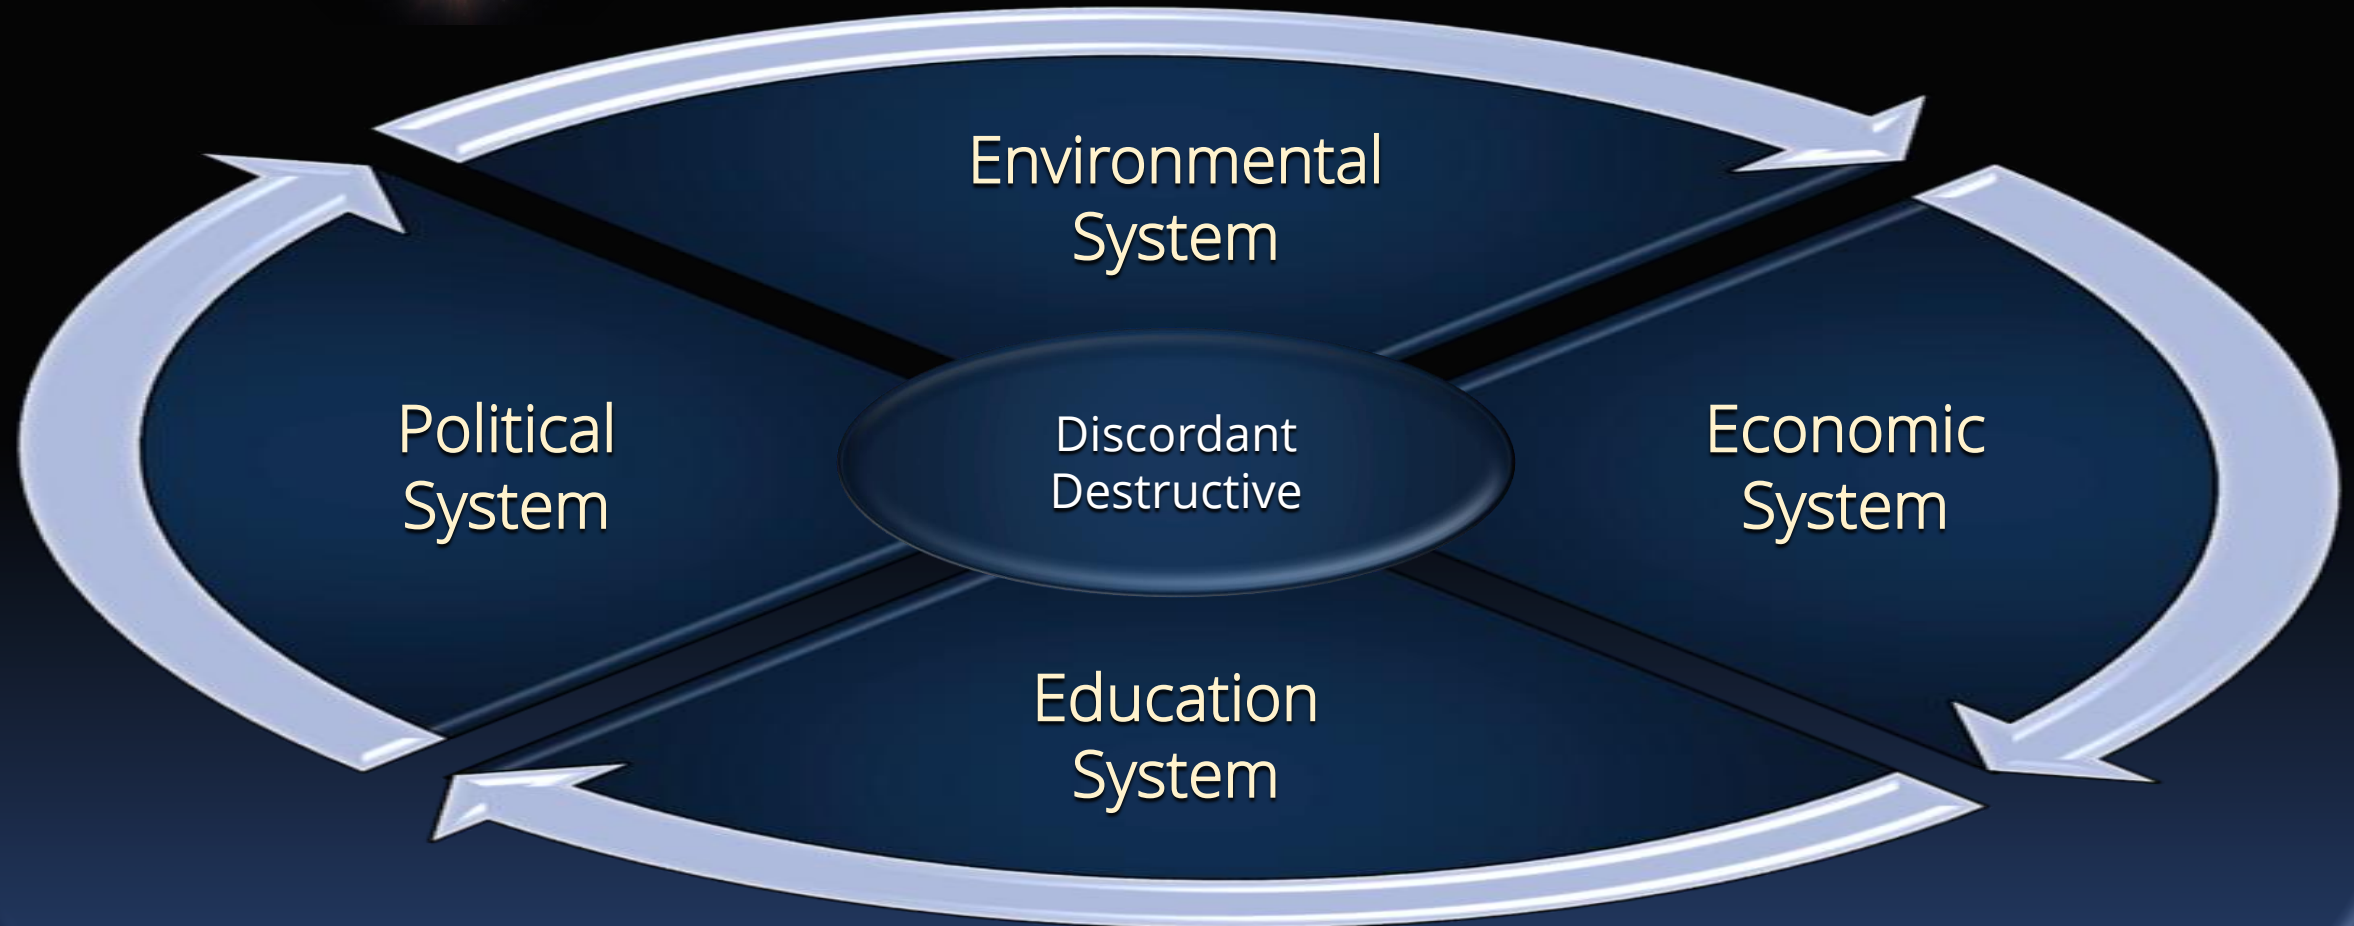

HEALTHY TRAITS	1	2	3	4	5	6	7	8	9	10	PSYCHOPATHIC TRAITS
Depth of thinking											Superficial / glib
Modest											Grandiose / boastful
Honest											Deceitful
Can feel remorse											Lacks remorse
Empathetic											Lacks empathy
Takes responsibility											Doesn't accept responsibility
Deliberate											Impulsive
Shows appropriately restraint											Poor behavioral controls
Goal-oriented											Lacks goals
Mature / responsible											Irresponsible
Healthy adolescent social behavior											Adolescent antisocial behavior
Healthy adult social behavior											Adult antisocial behavior

Major International Conflicts

- Russia / Ukraine / NATO / United States
- North Korea / South Korea / United States
- Taiwan / China / United States
- Israel / Palestine
- Iran / United States / Israel
- Sudan / Russia (Influencer)
- Pakistan / India / China (Influencer)
- Global migration causing arrival country backlash, shifting governments to the right.

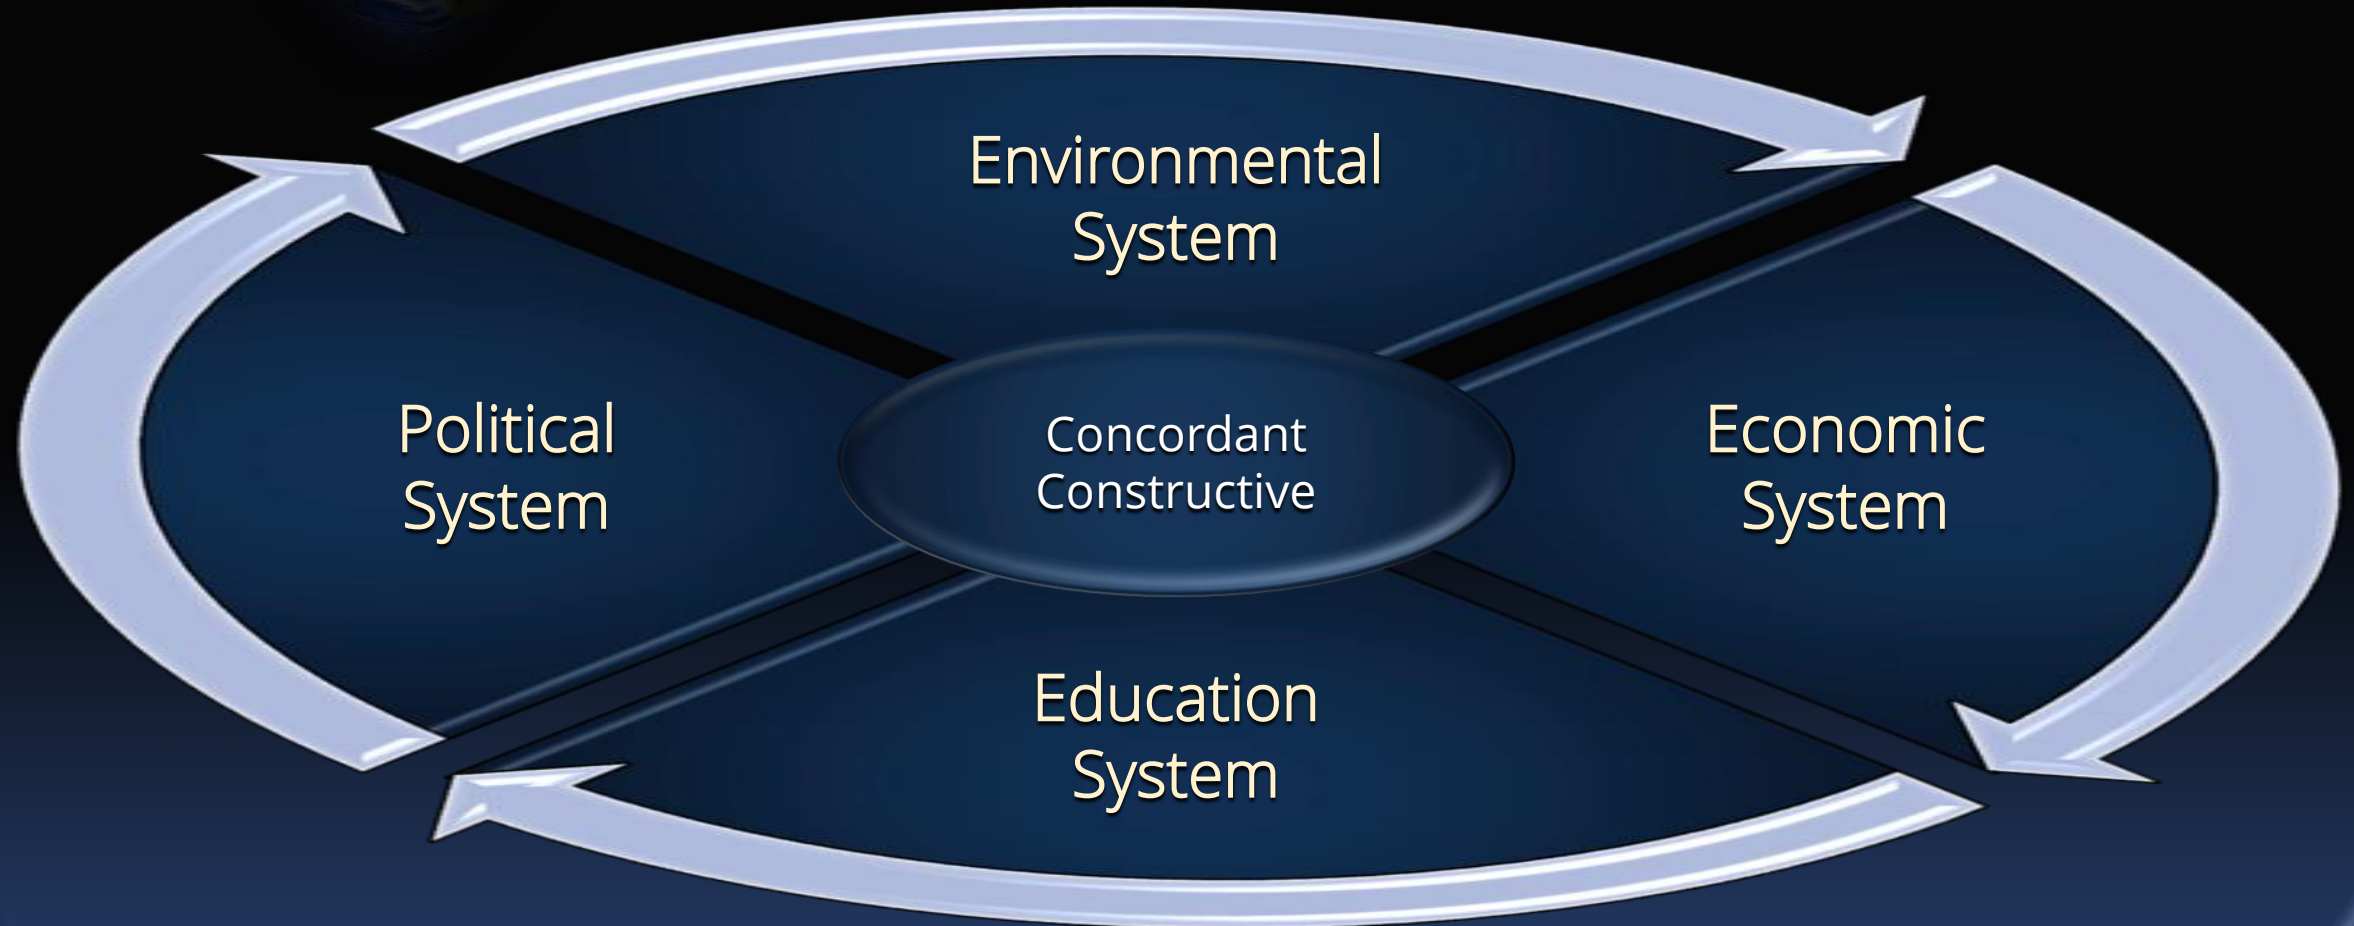

A Blueprint Vision for Living Together Competitively in A Sociopathic Society & Planet

Systems do not work and don't work together

A Blueprint Vision for Living Together Collaboratively on A Flourishing Planet Earth

Systems work and work together

A Blueprint Vision for Living Together Collaboratively on A Flourishing Planet Earth

Dear Friend of Earth & Humanity,

Hostile, competitive political groups within countries, and geopolitical competition for resources and power between nations, lead to distrusting each other and aggressively competing against each other nationally and globally.

This is leading groups and nations to arm themselves for protection against each other, deterioration of democracies, and geopolitical war that can destroy humanity.

We are meeting to clearly articulate a blueprint vision for how we can live together collaboratively, on a flourishing planet Earth, which can lead to groups and nations to work together for all and nature.

Please join us,
Sandy Hinden

WHY

The 17 UN Sustainable Development Goals (SDGs) are a process that can gradually lead to a better world, but is not a clearly articulated blueprint vision for living together collaboratively on a flourishing planet.

WHAT

Without a clearly articulated blueprint vision of how we will live together collaboratively on a flourishing planet, competitive political groups within countries, and geopolitical competition for resources and power between nations lead to distrusting each other and competing against each other nationally and globally. This leads groups and nations to arm themselves for protection against each other.

HOW

We are gathering people to clearly articulate a blueprint vision of how we can live together collaboratively on a flourishing planet. This blueprint vision will then be disseminated worldwide. With a clearly articulated blueprint vision, groups and nations can begin to work together.

INTRODUCTION

“The basic truth is that China and the U.S. will both be so powerful that can utterly destroy each other – or learn to find a way to live on the same planet with an acceptable rules-based order. We’re in the beginning of the transition to that existential choice.”

David Ignatius
Washington Post, Columnist covering foreign affairs

"No matter how deeply stuck you feel your country and war might be, there is always the possibility that you can snatch some kind of hope or future or possible way forward."

Cahir O'Doherty, 1990
Arts and travel editor for the Irish Voice

As a young man,
O'Doherty attended the premiere of the play
"The Cure At Troy" in the midst of "the Troubles."
It was an adaptation of a Sophocles' play set in the Trojan war,
but clearly was meant to speak to a divided Ireland.

“Rotary International
uses the
4-WAY TEST:

1. Is it the TRUTH?
2. Is it FAIR to all concerned?
3. Will it build GOODWILL
and BETTER FRIENDSHIPS?
4. Will it be BENEFICIAL
to all concerned?

We work for a
WIN/WIN WORLD
for all and nature.”

Michael Caruso
Past District Governor
District Peace Chair

Competitive Win/Lose Finite Games

are played with the goal of getting to the end of the game and winning, while following static rules. Every game has a beginning, middle, and end, and a distinctly recognizable final winner.

Collaborative Win/Win Infinite Games

are played for the purpose of continuing play rather than winning. An infinite mindset, and openness to change aligned with infinite play build stronger, more innovative, inspiring, and resilient organizations and systems over larger timescales.

- Abortion, Race, Migration, and LGBTQ are stubborn conflicts, with sides seeking apparent win/lose outcomes.
- These culture wars are leading to real wars.
- This is generating terrible turbulence for the public.
- **Competitive Win/Lose Finite Games** may produce the end of humans on Earth.
- Humans need to rapidly learn to play **Collaborative Win/Win Infinite Games**.

A Blueprint Vision for Living Together Collaboratively on A Flourishing Planet Earth

Funding
human, social
and Earth
needs

- **NEEDED COLLABORATION:** Right now, 2 billion caring people, in millions of NGOs and NPOs, are trying to save planet Earth, but they don't collaborate well because they each have to waste time and resources seeking funding privately.
- **AUTHORITARIANISM:** This leaves egotistical authoritarian leaders of nations controlling reality through propaganda and repression, wasting \$3.5 trillion a year on militaries, espionage, surveillance, police, and prisons to control the masses.
- **FUNDING NEEDS:** We need those resources to fund human, social and Earth needs.
- **CONSCIOUSNESS & HEART:** Addictions to food, drugs, alcohol, smoking, guns, mindless media, and violent entertainment are taking a toll on the consciousness and heart of humanity.

A Blueprint Vision for Living Together Collaboratively on A Flourishing Planet Earth

- **HISTORY OF RULES:** Human beings, throughout 10,000 years of recorded history, have created rules, procedures, commandments, codes, mandates, decrees, covenants, constitutions, and laws to guide the behavior of individuals, communities, and nations.
- **PRESENT DYSFUNCTION:** Presently, many of our rule systems are not working together to guide and govern individuals, societies, and humanity – to the detriment of humanity, nature, and future generations.
- **EXPLORATION:** We are meeting to explore creating a blueprint vision for living together collaboratively on a flourishing planet Earth.

A Blueprint Vision for Living Together Collaboratively on A Flourishing Planet Earth

1

CREATING
A BLUEPRINT VISION

What would life
look like on a
flourishing Earth?

2

CLARIFYING
CODES, RULES, BEHAVIORS

How would people
behave, and relate
to each other?

A Blueprint Vision for Living Together Collaboratively on A Flourishing Planet Earth

DYSFUNCTIONAL RULES

Humans may make up
Dysfunctional Rules Systems
that don't work, are unenforceable,
or cause harmful consequences.
(e.g. Allowing all people to own
automatic weapons in the United States.)

NO RULES

Without rules
for Earth, humanity,
and Artificial Intelligence,
humans may be eliminated,
and the Earth destroyed.

A Blueprint Vision for Living Together Collaboratively on A Flourishing Planet Earth

- People and political party beliefs are dominated by certain ideas.
- When there are competing ideas, society-culture can seem like it is splitting apart.
- There are seven sets of ideas in multi-party democracies.

Far Left	Left	Center Left	Centrists	Center Right	Right	Far Right
-------------	------	----------------	-----------	-----------------	-------	--------------

- Each group may criticize the others.
- They often don't clarify the policy and programs for how people would live, function, and relate if their dominant ideas took over.
- This leads to constant bickering and a waste of time.
- We need to clarify what living together collaboratively on a flourishing planet would look like.

Earth Wellbeing	Progressives	Liberals	Centrists Moderates	Conservatives	Libertarians	Far Right
1%	15%	20%	30%	20%	3%	10%
Doughnut Economics Wellbeing Economy Transition Towns Localists Intentional Communities Creative Protopians Eco-Civilization Flourishing Cities Cohousing Regenerists Wisocracy People's Government for Earth & Humanity	Government Solutions Environment Renewable Energy Fair Taxes Health Care for All Peace Gun Control Social Democrats Worker Cooperatives Mass Transit	Human Development Pro-Democracy Separation of Religion and State Women's Rights Pro-Choice LBTGQ+ Equal Rights Color Equity Gender Rights Black Lives Matter Gun Regulation	Status Quo Women's Rights Consumer Culture Fantasy & Fandom Fashionistas Foodies Entertainment Gamers Sports Fanatics Gamblers Addictions	Pro-Heterosexual Traditional Women's Roles Business Class Low Taxes Small Government Fundamental & Orthodox in Government Anti-Abortion	Radical Business Deregulation	Dictators Authoritarians Brutalists Dominators Bullies White Rights White Nationalists Secessionists Racists Anti-Immigration Oligarchs Law & Order Anti-Crime Gun Culture Pro-Cars Pro-Fossil Fuel High-Carbon Lifestyle

A Blueprint Vision for Living Together Collaboratively on A Flourishing Planet Earth

Protecting
One's Interests

- Financial
- Social
- Civil

People
would feel
their interests
are being
protected on
a flourishing
planet.

1. As most people become wealthier, they move to the Right politically to protect their financial interests and become more conservative.
2. Wealthy gay people most often stay within the Left progressive parties to protect their civil interests.
3. Most white religious people move to the Right to protect their financial and social interests.
4. Most black religious people stayed within the Left progressive party to protect their civil rights.
5. So, people seek to protect their financial, social, and civil interests within various political parties.
6. As people become wealthier, they tend not to need relationships as much because they can buy the help and services they need.

QUESTIONS TO OPEN AI

A Blueprint Vision for Living Together Collaboratively on A Flourishing Planet Earth

I asked OpenAI six questions:

1. What is a blueprint for all people and nations to flourish on Earth?
2. How can we help people go beyond being self-centered, selfish, and competitive?
3. What is the cause of greed and how can we heal it?
4. Can the thinking of authoritarian brutalists be made kinder and more constructive?
5. How do we get rid of the terrible leaders in the world who are destroying the planet?
6. How do we get rid of dictators?

1. What is a blueprint for all people and nations to flourish on Earth?

AS AN AI LANGUAGE MODEL, I can offer some insights and suggestions, but it is important to recognize that creating a blueprint for all people and nations to flourish on Earth is a complex and multifaceted challenge that requires input and collaboration from individuals, communities, and governments worldwide.

That being said, here are some key elements that could be included in such a blueprint:

SUSTAINABILITY: Any blueprint for human flourishing must prioritize sustainability, both in terms of environmental sustainability and economic sustainability. This means finding ways to reduce our impact on the planet, while also ensuring that economic growth and prosperity are sustainable and equitable for all.

EDUCATION: Education is critical for human flourishing, as it provides individuals with the knowledge and skills they need to succeed in life. A blueprint for human flourishing should prioritize education, ensuring that all people have access to high-quality education, regardless of their background or economic status.

1. What is a blueprint for all people and nations to flourish on Earth?

HEALTH AND WELL-BEING: Access to healthcare and the promotion of mental health and well-being are essential for human flourishing. Any blueprint should prioritize these issues, ensuring that all people have access to affordable healthcare and mental health support.

SOCIAL JUSTICE: Social justice is a critical component of human flourishing, as it ensures that all people are treated fairly and have equal opportunities to succeed. A blueprint for human flourishing should prioritize social justice, ensuring that everyone has equal access to education, healthcare, and economic opportunities.

COLLABORATION AND INNOVATION: Collaboration and innovation are essential for solving the complex challenges facing humanity today. A blueprint for human flourishing should prioritize these values, encouraging collaboration and innovation across nations, communities, and individuals.

1. What is a blueprint for all people and nations to flourish on Earth?

PEACE AND SECURITY: Peace and security are essential for human flourishing, as they provide a stable and safe environment in which people can thrive. A blueprint for human flourishing should prioritize peace and security, working to reduce conflict and promote peaceful resolution of disputes.

These are just a few key elements that could be included in a blueprint for all people and nations to flourish on Earth. However, creating such a blueprint will require input and collaboration from individuals, communities, and governments worldwide, as well as a commitment to ongoing learning and adaptation as we work to create a better world for all.

SUSTAINABILITY
EDUCATION
HEALTH AND WELL-BEING
SOCIAL JUSTICE
COLLABORATION
INNOVATION
PEACE AND SECURITY

2. How can we help people go beyond being self-centered, selfish, and competitive?

There are several ways to help people move beyond being self-centered, selfish, and competitive. Here are a few suggestions:

LEAD BY EXAMPLE: The best way to encourage others to be less self-centered and more empathetic is to demonstrate these qualities yourself. Be kind, compassionate, and generous with your time and resources. Show that you value cooperation and collaboration over competition and individual achievement.

ENCOURAGE PERSPECTIVE-TAKING: Encourage people to put themselves in other people's shoes and consider things from their perspective. This can help foster empathy and understanding, which can lead to more compassionate behavior.

PROMOTE TEAMWORK: Encourage people to work together towards a common goal. This can help foster a sense of community and shared purpose, which can help reduce self-centeredness and competitiveness.

2. How can we help people go beyond being self-centered, selfish, and competitive?

CELEBRATE DIVERSITY: Encourage people to embrace and celebrate differences in others. This can help promote acceptance and understanding, which can help reduce selfishness and competitiveness.

PROVIDE OPPORTUNITIES FOR SERVICE: Encourage people to engage in volunteer work or other acts of service. This can help foster a sense of altruism and encourage people to focus on the needs of others.

OFFER EDUCATION: Encourage people to learn about the benefits of collaboration and cooperation versus competition. This can help shift their mindset towards a more cooperative and less self-centered approach to life.

Remember that changing behavior takes time and effort, and it's important to be patient and persistent in your efforts to help others move beyond self-centeredness and competitiveness.

3. What is the cause of greed and how can we heal it?

Greed can be caused by a variety of factors, such as a desire for power or status, fear of scarcity, or past experiences of deprivation.

Greed can also be exacerbated by cultural and societal norms that prioritize material success and the accumulation of wealth.

To heal greed, it's important to address the underlying factors that contribute to it. This may involve examining and challenging personal beliefs about the value of wealth and success, as well as addressing any fears or past traumas related to scarcity or lack.

Additionally, developing a practice of generosity and gratitude can help shift the focus from personal gain to the well-being of others and the world at large.

Mindfulness practices such as meditation and self-reflection can also be helpful in developing awareness of one's own greed and cultivating a sense of inner peace and contentment.

Seeking support from a therapist or counselor can also be beneficial in working through underlying emotional issues and developing healthier patterns of thought and behavior.

What is the cause of greed and how can we heal it?

CULTURAL / SOCIAL	<ul style="list-style-type: none">• Culture that prioritizes material success, accumulation of wealth, and violence to protect it.• Education for a Culture of Peace, Wisdom & Wellbeing.
EMOTIONAL	<ul style="list-style-type: none">• Past experiences of deprivation.• Fear of scarcity.• Desire for power or status.• Address any fears or past traumas related to scarcity or lack.• Work through underlying emotional issues.
COGNITIVE	<ul style="list-style-type: none">• Examine and challenge personal beliefs about the value of wealth and success.• Mindfulness practices such as meditation and self-reflection to develop an awareness of one's greed.• Cultivation of a sense of inner peace and contentment.
BEHAVIORAL	<ul style="list-style-type: none">• Develop a practice of generosity and gratitude can help shift the focus from personal gain to the wellbeing of others and the world at large.

Can the thinking of authoritarian brutalists be made kinder and more constructive?

It is important to note that authoritarianism and brutality are not necessarily qualities that are amenable to being "made kinder and more constructive."

These traits are often associated with a desire for control and power over others, which can lead to harm and oppression.

That being said, it is possible for individuals with authoritarian and brutalist tendencies to develop more empathetic and collaborative ways of thinking and behaving.

This may involve increasing their awareness of the impact of their actions on others and learning to value and respect the perspectives of others.

Some ways that this can be achieved include:

4. Can the thinking of authoritarian brutalists be made kinder and more constructive?

EDUCATION AND AWARENESS: Encouraging individuals to learn about different perspectives and experiences, and to develop an understanding of the impact of authoritarian and brutalist behavior on others.

EMPATHY TRAINING: Helping individuals to develop greater empathy and emotional intelligence, and to learn to understand and relate to the feelings and experiences of others.

DIALOGUE AND COLLABORATION: Encouraging individuals to engage in open and honest dialogue with others, and to work collaboratively to find solutions that are fair and respectful to all parties.

Ultimately, changing the thinking of individuals with authoritarian and brutalist tendencies requires a willingness on their part to recognize the negative impact of their behavior on others, and to actively work towards developing more compassionate and constructive ways of thinking and behaving.

5. How do we get rid of the terrible leaders in the world who are destroying the planet?

Getting rid of terrible leaders who are destroying the planet is a complex issue that requires a multifaceted approach. Here are some possible strategies:

HOLD THEM ACCOUNTABLE: One way to address the problem is to hold these leaders accountable for their actions. This can be done through legal means, such as international courts or tribunals, or through political mechanisms, such as impeachment or votes of no confidence.

EDUCATE AND RAISE AWARENESS: Another way is to educate and raise awareness among the public about the negative impact of their actions on the planet. This can be done through media campaigns, grassroots movements, or educational programs.

PRESSURE FROM INTERNATIONAL ORGANIZATIONS: International organizations such as the United Nations, World Bank, and the International Monetary Fund can pressure leaders to adopt more environmentally friendly policies.

5. How do we get rid of the terrible leaders in the world who are destroying the planet?

ECONOMIC SANCTIONS: If these leaders refuse to change their ways, economic sanctions can be imposed by other countries or international bodies to put pressure on them to change their policies.

ENCOURAGE LEADERSHIP CHANGE: Lastly, efforts can be made to encourage a change in leadership through peaceful protests, elections, or other means of democratic participation.

It's important to note that there is no single solution to this complex issue, and a combination of these strategies may be necessary to bring about meaningful change.

6. How do we get rid of dictators?

Getting rid of a dictator is a complex and often a difficult task that requires careful planning and coordinated efforts by both internal and external actors. Here are some possible steps that can be taken:

MOBILIZE OPPOSITION: The first step to getting rid of a dictator is to mobilize opposition against their rule. This can involve organizing peaceful protests, strikes, and civil disobedience campaigns to put pressure on the regime.

BUILD COALITIONS: It is important for opposition groups to build coalitions and work together to present a united front against the dictator. This can involve reaching out to different political factions, civil society groups, and other stakeholders to build a broad-based movement for change.

INTERNATIONAL PRESSURE: International pressure can play a crucial role in getting rid of dictators. This can involve diplomatic pressure, economic sanctions, and other measures to isolate and weaken the regime.

MILITARY INTERVENTION: In some cases, military intervention may be necessary to remove a dictator from power. However, this is a risky and controversial option and should only be considered as a last resort.

6. How do we get rid of dictators?

NEGOTIATIONS: In some cases, negotiations with the regime may be the best way to achieve a peaceful transition to democracy. This can involve reaching out to moderate elements within the regime and working out a power-sharing arrangement.

It is important to note that there is no one-size-fits-all solution to getting rid of dictators, as each case is unique and requires a tailored approach. Ultimately, the most effective way to remove a dictator from power is through a combination of domestic and international pressure, building coalitions, and careful planning and coordination.

ENCOURAGE LEADERSHIP CHANGE: Lastly, efforts can be made to encourage a change in leadership through peaceful protests, elections, or other means of democratic participation.

It is important to note that there is no single solution to this complex issue, and a combination of these strategies may be necessary to bring about meaningful change.

5

TIMELINE OF CODES ON EARTH

A Blueprint Vision for Living Together Collaboratively on A Flourishing Planet Earth

Code
for
Human
Existence

- A friend introduced me to a man who spent his life conning other people for money. He is bankrupt, an alcoholic, and homeless except for a woman who has taken him in.
- When my friend and I talked later, I said if the man is going to change his life, the first line of internal code that has to be rewritten is “to be honest.”
- It made me realize humans are like a string of codes in a computer that creates our thinking, emotions, and behavior.
- I look forward to the Blueprint Vision meetings to clarify how to rewrite the string of codes of human existence to create a flourishing planet Earth.

A Timeline of Codes

The history of codes, commandments, laws, declarations, and constitutions dates back to ancient times and has evolved over centuries. They reflect the evolution of human societies and are efforts to grapple with fundamental principles and governance structures. They seek to meet new challenges and establish norms, rules, and laws, striving to bring about order, justice, human dignity, and progress. Here is an Open AI generated timeline:

- 2100-2050 BCE: The Code of Ur-Nammu is the oldest extant law code in the world. It was written by the Sumerian king Ur-Nammu.
- 1754 BCE: The Code of Hammurabi is created in ancient Babylon. It is one of the oldest known written legal codes, consisting of 282 laws that cover topics such as property rights, marriage, and crime.
- 1250 BCE: The Ten Commandments are given to Moses on Mount Sinai, as recorded in the Bible. These commandments form the basis of Jewish and Christian moral and ethical codes.
- 600 BCE: The Buddha's teachings, known as the Dharma, are recorded in the Pali Canon and other Buddhist texts. These teachings include ethical precepts and guidelines for living a virtuous life.
- 594 BCE: The Athenian statesman Solon creates a new set of laws for Athens that help to establish the city-state as a democracy.

A Timeline of Codes

- 450 BCE: The Twelve Tables are established in ancient Rome, providing a written code of law that is accessible to all citizens and helps to solidify Rome's legal system.
- 400 BCE: The Arthashastra, a treatise on governance and economics, is written by the Indian philosopher Kautilya. It includes detailed laws and regulations for various aspects of public life.
- 1212 CE: The Golden Bull of Hungary is issued, establishing a constitutional framework for the Hungarian monarchy and limiting the power of the king.
- 1215 CE: The Magna Carta is signed in England, limiting the power of the monarchy and establishing the principle that everyone, including the king, is subject to the law.
- 1648 CE: The Peace of Westphalia ends the Thirty Years' War in Europe and establishes the principle of state sovereignty, laying the foundation for modern international law.
- 1787 CE: The United States Constitution is written and adopted, establishing a federal system of government with a separation of powers and a bill of rights.
- 1789 CE: The French Revolution leads to the adoption of the Declaration of the Rights of Man and of the Citizen, which asserts the equality and freedom of all citizens and helps to inspire other revolutionary movements.
- 1863 CE: The Emancipation Proclamation is issued by US President Abraham Lincoln, declaring that all slaves in Confederate-held territory are henceforth free.

A Timeline of Codes

- 1945 CE: The Charter of the United Nations is adopted, establishing the UN as an international organization dedicated to promoting peace, security, and human rights.
- 1948 CE: The Universal Declaration of Human Rights is adopted by the United Nations, establishing a set of fundamental rights and freedoms that should be guaranteed to all people.
- 1950 CE: The European Convention on Human Rights is established, creating a legal framework for the protection of human rights in Europe.
- 1965 CE: The International Convention on the Elimination of All Forms of Racial Discrimination is adopted by the UN, committing signatory nations to work towards ending racism and promoting equality.
- 1982 CE: The Canadian Charter of Rights and Freedoms is added to the Canadian Constitution, establishing a set of rights and freedoms for all Canadian citizens.
- 2011 CE: The Arab Spring leads to the adoption of new constitutions in several countries, including Tunisia and Egypt, that aim to establish more democratic and inclusive political systems.
- 2015 CE: The Paris Agreement on climate change is adopted by the United Nations, committing countries to take action to limit global warming and reduce greenhouse gas emissions.

CODES FOR A
FLOURISHING PLANET

A Blueprint Vision for Living Together Collaboratively on A Flourishing Planet Earth

Rights & Rules for Individual Humans
Needs, Goals, Pastimes, Relationships

Rights & Rules for Society
Religions, Ethics, Politics, Economy, Community

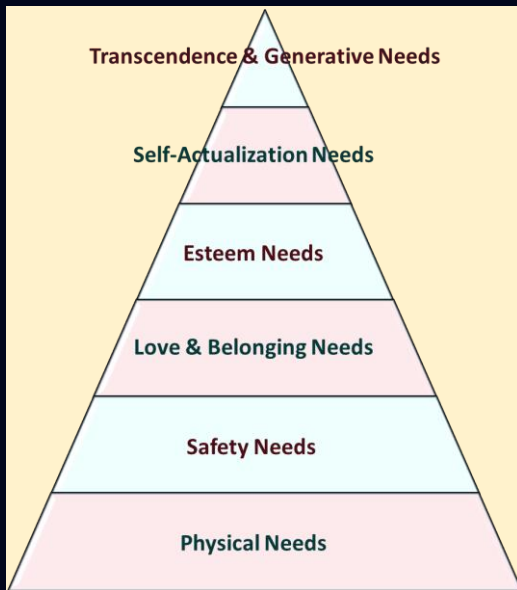

Rights & Rules for Nature
Water, Air, Land, Forests, Species

Some
areas for
discussion

Types of Codes

- To go beyond the different religions and their competing rules, we can understand there are universal codes that exist above sectarian codes.
- Humanity is facing extinction and needs to create a set of universal codes that include, yet transcend, differences between individual religions.
- **UNIVERSAL CODES** describe how to live based on universal human needs.
- **SECTARIAN CODES** are based on particular religions, rituals, myths, and stories with metaphors for how to live.

Human Needs

Needs are not hierarchical beyond basic sustenance.

Lack of needs satisfaction creates emotional and social conflict.

Transcendence & Generative Needs

Sanford Hinden

Educator, Administrator, Organizer, Author

- Sandy Hinden works for world peace, including *mutually assured survival* that includes *ending war, making peace with nature, and developing wellness for humanity*.
- Sandy provides [programs](#) for schools, libraries, and organizations in person and on Zoom in personal development, communications and relationships, and social and global development for peace and sustainability.
- He worked locally, nationally, and globally developing organizations, projects, and programs for peace, the environment, health, human services, education, and the arts.
- He helps seniors, adults, teens, and children reach their full potential and enjoy life more.
- Sandy was director of *Community Partners for Coordinated Services for Suffolk Community Council*, and executive director of the *Dix Hills Performing Arts Center*.
- In 2009, he wrote and published [7 Keys to Love – Opening Love’s Door to Joy & Wellbeing](#).
- In 2014, he created the *Commonwealth for Earth & Humanity*, proposing annual 10% global military reductions to be used for funding human, social, and Earth’s needs.
- Sandy currently works on [Wisocracy Learning Lab](#) for wise democracy, peace, wisdom, and wellbeing.
- His work uses psychology, economics, and politics to explore [Global Gang Transformation](#) and movement toward a [People’s Government for Earth & Humanity](#).

“Sandy's whole-systems thinking is empowering and enlightening. I would recommend any educational materials he creates as of superior value.”

Meg Rivers

Senior Production Specialist

HBO / HBO Max

Sandy Hinden is a very exceptional human being entirely devoted to a better, ideal world. I have known him for more than 30 years.

He constantly inspired me for my work and efforts at the United Nations. He had ceaseless great ideas. He encouraged me to not give up.

I would be so happy to see him in charge of a major newspaper section on good news and happiness for the people. He would be very precious for a major philanthropic organization, especially one dealing internationally. I would support his candidacy with the highest terms.

Dr. Robert Muller (1923-2010)

Former UN Assistant Secretary General

Cofounder, UN University for Peace, Costa Rica

“Sandy is an inspirational actionist! He is not afraid to ask the tough questions and explore heartfelt responses to them. The ones that have to do with how we got into this mess as humanity, and what it's going to take for us to get out of it. His wealth of experience and human kindness, combined with political savvy and collaborative working style, make learning with and from him an enriching experience, and always a joy.”

Alexander Laszlo

Global Systems Educator

“Sanford Hinden is one of the most humane, compassionate, loving human beings I have ever met. He speaks and acts from deep wisdom about what people need – and what the world needs now. I trust him and have learned immensely from him.”
