Dear Friend of Earth and Humanity,

Global wars and conflict are proliferating along with systems for mass destruction and autonomous killing machines run by artificial intelligence.

Global wars have destroyed climate safety progress and are absorbing the resources needed for the transition to a sustainable planet.

Fossil fuel production is increasing, leading to +2°C by 2050, and +4°C by 2100 – an uninhabitable world.

You are cordially invited to a Zoom meeting to explore Economic Models for International Peace & Climate Safety.

Please share this invitation with members of Rotary, the United Nations Association, other NGOs, United Nations personnel, and all working for a better world for all life on Earth.

Please join us,

Economic Indicators for Local Peace
8 Pillars of Positive Peace

1. Well-functioning Government
2. Sound Business Environment
3. Equitable Distribution of Resources
4. Acceptance of the Rights of Others
5. Good Relations with Neighbours
6. Free Flow of Information
7. High Levels of Human Capital
8. Low Levels of Corruption
The focus of the model of the 8 Pillars of Positive Peace is local and national.

Wars and conflict are often international.

The 8 Pillars of Positive Peace fit into the model of Rotary as primarily a locally-based organization.

The 8 Pillars of Peace are good for local development.

With increasing political polarization, caused by international wars, international drug trafficking, and the violence that comes with organized crime and gangs, the 8 Pillars of Peace are not able to address how to deal with international conflict and war.
TRANSGNATIONAL PROBLEMS
PREVENTING WORLD PROGRESS

We need people who care and collaborate to solve local, national, and global problems. We need to find ways to communicate it is in people’s interest to support peace and nature.
- Percentages are estimates.
- Wisocracy is a long-term development process.
- World Wellbeing is here.

This group is highly organized and is creating conflict and chaos in the world.

1. There are probably 2 billion supporters of world change toward wellbeing.

2. There are many obstructionists, authoritarians, and now fascists growing on Earth who support repression and war, and are against the environment.

3. Many people are stuck in their silos and paradigms, politically obstructing each other’s agendas.

4. Many people continue doing what they are doing, with the system not changing.
5. Economic insecurity and lack of trust can lead to lower cooperation.

6. People don’t like to think their ideas and ways of life are wrong. They don’t like to question their thinking, perspective, and lifestyle.

7. People in the middle, the status quo, the majority, are often not interested in doing what needs to be done to create the system change that is needed.

8. Many are decent, locally-focused, business-oriented people. Some care deeply about the whole world.
9. They may react defensively to information about the need to evolve a better economic system.

10. We need to reach status quo organizations, show them a better way of living, enlarge their awareness, and create a shift in consciousness.

11. We need to accelerate change.

12. We need to help humans evolve to then reach goals for peace and nature.
13. We need to develop smart electric systems, renewable energy, mass transportation, and end fossil fuel use.

14. We can support *Divestment from Weapons, War, and Carbon Fuel*, and at the same time *Investment in Human, Social, and Earth Wellbeing* – a peaceful, green, sharing, and caring economy.

Sandy Hinden is a very exceptional human being entirely devoted to a better, ideal world. I have known him for more than 30 years. He constantly inspired me for my work and efforts at the United Nations. He had ceaseless great ideas. He encouraged me to not give up. I would be so happy see him in charge of a major newspaper section on good news and happiness for the people. He would be very precious for a major philanthropic organization, especially one dealing internationally. I would support his candidacy with the highest terms.
Dr. Robert Muller (1923-2010)
Former UN Assistant Secretary General
Cofounder, UN University for Peace, Costa Rica

“Sandy is an inspirational actionist! He is not afraid to ask the tough questions and explore heartfelt responses to them. The ones that have to do with how we got into this mess as humanity, and what it’s going to take for us to get out of it. His wealth of experience and human kindness, combined with political savvy and collaborative working style, make learning with and from him an enriching experience, and always a joy.”
Alexander Laszlo
Global Systems Educator

“Sanford Hinden is one of the most humane, compassionate, loving human beings I have ever met. He speaks and acts from deep wisdom about what people need – and what the world needs now. I trust him and have learned immensely from him.”
