The Need for Collaboration & Wise World Governance

Dear Friend of Earth & Humanity,

We need great collaboration to create peace on Earth and sustainability for nature. Our political and economic systems are based on competition.

Politics, the world of work, and the 110 conflicts and wars around the world are based on being hyper-competitive. There are often few incentives in the short run to be collaborative and great incentives for individuals to be competitive. Without guiding values, people sell out for money and power.

Protecting the environment has become a competitive battle of pro-fossil fuels for cheap gas vs. alternative energy and nature's sustainability.

Wisocracy seeks to provide methods to improve democracy and help people, leaders, and systems be wiser and work for peace and nature.

This program explains the connections between our innovation, demographics, values, and politics.

**Let us work together,
