

The Rule of Law on Earth

Justice ❖ Sustainability ❖ Peace

The Rule of Law on Earth

Justice ❖ Sustainability ❖ Peace

This constant lying is not aimed at making the people believe a lie, but at ensuring that no one believes anything anymore. People that can no longer distinguish between truth and lies cannot distinguish between right and wrong. And such people, deprived of the power to think and judge, is, without knowing and willing it, completely subjected to the rule of lies. With such people, you can do whatever you want.

Adapted from Hanna Arendt who discussed the erosion of truth and its impact on politics extensively, especially in her book "The Origins of Totalitarianism" and in her essay "Truth and Politics." She argued that totalitarian regimes often use propaganda and lies to create a reality where objective truth is undermined, making it difficult for people to distinguish between truth and falsehood, and ultimately between right and wrong. She was concerned about truth and its role in maintaining a free and just society.

RULE OF LAW ON EARTH

Dictators, Billionaires, and Corporations profit with impunity from militarization and fossil fuels, destroying Earth and humanity.

NGOs need to hold them accountable.
We need The Rule of Law on Earth project.

- Many organizations are working on different aspects of law for Earth and humanity within numerous associations.
- Many NGOs work in silos, competing for attention, positions, and resources.
- We need a new space to solve our new problems with new paradigms, new processes, new ideas, and new funding for new solutions.
- Wicked problems need Fluid Networking, Collaboration, and Creative Processes to develop Innovative Solutions to solve them.
- We need Wise Global Governance and the Rule of Law on the global systems level or the creative criminals just get richer and richer by using technology, manipulating weaknesses in the systems, and corrupting governments.
- Join us and network for peace, justice, and sustainability to strengthen Law on Earth.

The Rule of Law on Earth

Justice ❖ Sustainability ❖ Peace

**Rule of Law
on Earth**

**Oil and gas companies, banks, and fossil fuel investors are committing ecocide.
Media is complicit by not connecting increasing fossil fuel production and use
to climate change and weather changes, fires, floods, and drought.
Media creates short-term myopia to vote for cheap gas,
creating an ecological dystopia.**

**“Yes, we Canadians are sickened by the devastation to Jasper.
The only way I see to change this is for lawyers to sue the governments
and the oil companies. Money talks. We have sued the tobacco industries
for causing harm. We now need to sue the fossil fuel companies.
Fridays for the Future, youth, here in Ontario have sued our provincial government
for not doing enough to protect us from climate change.
The initial court didn't agree but it is going to be appealed.
In Canada. we don't have enough water bombers, and those that we do have are antiquated.
We need new and more water bombers, not F35s.
We also need to support the Fossil Fuel Prohibition Treaty.”**

support the development of
effective and enforceable international law,
global justice, security, and peace,
equal rights and opportunity for humanity,
and Earth's sustainability.

The Rule of Law on Earth

Justice ❖ Sustainability ❖ Peace

Currently, over 70% of the world's population is living under authoritarian rule. Oil and gas companies, banks, and fossil fuel investors are committing ecocide. Media is complicit by not connecting increasing fossil fuel production and use to climate change and weather changes, fires, floods, and drought. Media creates short-term myopia to vote for cheap gas, creating an ecological dystopia.

Wisocracy Rule of Law

posts links to the latest research, articles, videos, and events, and will create a Rule of Law on Earth Dashboard to show annual world progress or decline in these five areas:

Earth Sustainability	International Laws & Treaties	Global Justice	Security & Peace	Equal Rights & Opportunity for Humanity
-------------------------	----------------------------------	-------------------	---------------------	---

Wisocracy supports the creation of Wise Law & Wise Governance on Earth by facilitating a monthly meeting for faculty, students, practitioners, and all working on any Rule of Law project, program, or course of study around the world.

How
Justice
is Fostered

I Have
Chosen to Challenge

War
Crime Injustice
Ecocide

I Have Chosen to Challenge

**Peace, Justice
Sustainability**

I have chosen to challenge Rotarians to appreciate and engage effectively in the Rotary International democratic local to global movement to help save the human race from human-caused extinction.

This is difficult for North American Rotarians. Because of the privilege, isolation, prosperity, size and power of the West, led by USA, we exploit and misuse power over others to benefit ourselves misguidedly for the cause of national security. The West claims to stand for a “rules-based order” when in fact it stands for rules that benefit them manipulated by them by coercion.

USA, France and UK, but especially USA, by not signing and ratifying Rome Statute, not supporting UNESCO for years, invading Iraq and Afghanistan, and misusing unilateral coercive powers and election interference in other countries in South and Latin America and elsewhere, are correctly seen by the global south and small countries, to be hypocrites and double standard practitioners. Until they stand authentically, and by example for human rights and responsibilities, abolition of nuclear weapons, a just global security system for all for all to have equal opportunity to flourish, our risk of perishing by human causes increases.

[more...](#)

I Have Chosen to Challenge

Peace, Justice
Sustainability

Countries like Canada and other NATO countries and Mexico are so used to USA dominance, and in the case of Canada, in addition, a historic relationship with France and UK, that they do not stand up for what is right for justice, survival and thriving of the global human family.

My work is focused first on Rotarians in Canada and in its cross-border district countries to do what is morally right and obviously needed for what I call ***“the cause”***
- human survival, flourishing, justice, and equity.

Rather than Rotarians financing and volunteering their time as do-gooders, in effect paying reparation for abuses of power, arrogance, and ignorance, is it not time to address the root causes.

Why not rather focus on changing local to global systems and help create an authentic ***“rule-based” effective enforceable global just world order*** with a ***justice system to prevent wars and violent cross-border aggression, resolve conflicts, and expose the truth hidden from us by governments.***

[more...](#)

I Have Chosen to Challenge

**Peace, Justice
Sustainability**

Rotarians can help best to advance “the cause” by taking a first step.

Recognize the Rotary entities we belong to have always been and continue to be suppressed by or induced to be allies with our governments.

But governments cannot suppress us as individual Rotarians if we stand in solidarity from doing service above self actions in relation to our governments as called for by RI in “Seven Paths to Peace” unless we self-suppress out of real justifiable fear for safety, a lack of courage or a lack of willingness to sacrifice for survival, justice and equity for all.

We in democratic privileged countries like Canada, USA, France and UK must stand up first by example. Failing our doing this, those risking life, health and livelihoods in other countries if they stand up to their governments will do nothing until a critical mass of their business, professional and community leader and allies do so.

Once Rotarians and allies are seen to be the trusted means to advance “the cause” Rotary will grow exponentially.

[more...](#)

I Have Chosen to Challenge

**Peace, Justice
Sustainability**

The influence of power with each other to advance effectively support for “the cause” will spread country by country, whether democratic or not.

194 Countries by consensus in 2023 supported new principles for peace education.

UN General Assembly Resolutions of over 120 countries are common, even when one or more veto power countries use coercion or favours to oppose them.

That is why it is so important for USA, France, and UK to earn trust by example by offering secure sustainable support for “the cause”.

What do you think? Will you support “the cause”?

If not, why not?

“Cowardice asks the question - is it safe? Expediency asks the question - is it politic? Vanity asks the question - is it popular? But conscience asks the question - is it right? And there comes a time when one must take a position that is neither safe, nor politic, nor popular; but one must take it because it is right.”

Dr. Martin Luther King, Jr.

UN Secretary-General António Guterres

"Our world is becoming less safe by the day.

After decades of stable power relations, we are transitioning into an era of multipolarity.

This creates new opportunities for leadership and justice on the international stage.

But multipolarity without strong multilateral institutions is a recipe for chaos.

As powers compete, tensions rise.

The rule of law, and the rules of war, are being undermined.

From Ukraine to Sudan to Myanmar, the Democratic Republic of the Congo and Gaza, parties to conflict are turning a blind eye to international law, the Geneva Conventions and even the United Nations Charter.

The Security Council is often deadlocked, unable to act on the most significant peace and security issues of our time.

The Council's lack of unity on Russia's invasion of Ukraine, and on Israel's military operations in Gaza following the horrific terror attacks by Hamas on 7 October, has severely – perhaps fatally – undermined its authority.

The Council needs serious reform to its composition and working methods."

Peace, Happiness & Justice

- We are adding the language of justice to our quest for peace and happiness.
- Without justice, including the rights of people and nature, peace is not sustainable.
- We can compile a checklist of treaties and legislation that need to be enacted globally and nationally to have a Just Planet.
- In addition to laws and treaties, we all need to hold ourselves responsible and accountable for our actions.
 - I can act with integrity and high ethical standards.
 - I can deal fairly with others and treat them with respect.
 - I can mentor young people, especially by our example.
 - I can help those with special needs.
 - I can improve people's quality of life in my community and the world.
 - I can build goodwill and better friendships.
 - I can do what is beneficial to all concerned.
 - I believe with these values and principles we can solve problems and honor differences in ways that can increase peace and happiness.
 - I am capable of choosing to act on these values and principles today.

Solving Wicked Problems & Rule of Law

- There are organizing limitations in the Government, Corporate, and NGO sectors.
- The most efficient, transparent, and intelligent government entity is unable to resolve socioeconomic wicked problems.
- That also goes for the Corporate and NGO sector entities as their inherent governance styles limit the delivery of complex solutions.
- Many NGOs work in silos, competing for attention, positions, and resources.
- In the past we only had those three sectors as our socioeconomic tools.
- There is an emerging fourth sector of networked creatives and the advantages it brings to the present day to design wicked solutions.
- We need a **new space to solve our new problems** with new paradigms, **new processes, new ideas, and new funding for new solutions.**
- Wicked problems need **Fluid Networking, Collaboration, and Creative Processes** to develop **Innovative Solutions** to solve them.
- We also need **Wise Global Governance** and the **Rule of Law** on the global systems level or the creative criminals just get richer and richer by using technology, manipulating weaknesses in the systems, and corrupting governments.
