A New Standard for Evaluating Social Impact: Pilot Launch

Strategic Evaluation for Purpose-driven Leaders

The Question

Are you scaling your business—but not your impact?

The Pattern

Across social change enterprises, the same outcomes persist:

- Revenue grows
- Partnership expands
- Resources are deployed
- BUT
- Impact does not compound; social impact is not sustained.

The Reality

These are not execution failures.

They are **system design failures**.

Systems are not designed to **scale impact with growth**

Most social change enterprises are not structured to generate **changemaking network effects**, the conditions under which:

- Participation grows
- Trust compounds
- Learning spreads
- Impact sustains and scales

Your Opportunity

Impact Sphere Global is launching a **pilot Strategic Briefing and Diagnostic Evaluation** to assess how social change organizations actually function—and why impact is not compounding. This opportunity evaluates:

- System coherence
- Coordination effectiveness

- Outcome sustainability

This is not consulting.

This is a **structured evaluation** of your organization's capacity to produce sustained social impact with insight and recommendations **to enhance capacity.**

What You Receive

- Diagnostic assessment across core performance domains
- Quantitative scoring model
- Live Strategic Briefing (executive-level)
- Written report identifying systemic constraints and leverage points

What This Enables

- Clear understanding of why impact is not scaling
- Identification of high-leverage intervention points
- Alignment across strategy, operations, and networks
- A pathway to sustained, system-level social impact

Participation

- Limited to **6 organizations**
- Designed for leaders of social change enterprises and organizations
- Early access to a new global evaluation standard

Next Steps

For leaders navigating complexity, clarity is the first requirement for impact.
