

RECHARGEABLE GPS TRACKER

USER GUIDE VER 07.24

Thank you for purchasing our Rechargeable GPS Tracking Device.

This user guide shows you how to operate the device correctly.

Please ensure that you read the guide carefully before using this product.

Failure to follow the supplied instructions such as correct charging procedure may invalidate your 12-month warranty.

Specifications and information supplied are subject to change without prior notice.

Any such changes will be integrated in the latest release of this guide.

Quick Charger

This device supports a maximum 2A current quick charger.

Connect the device to your own USB charger (Output voltage: 5V, current: 2amps) with the supplied USB C cable.

Please use the original USB C cable to charge this device,

Warning:

Lithium batteries contain harmful chemical constituents and may explode, please do not damage, puncture or expose to fire.

Please use the device initially outdoors to enable an initial GSM and GPS satellite fix.

***The internal rechargeable battery charge state can be monitored direct from our web tracking platform.**

We advise a recharge when battery is at approximately 20%.

Charge time of the internal battery from 20% is approx. 6-8 hours.

Please do not charge for longer than this period as this will substantially reduce the working life of the internal battery and may invalidate your 12-month warranty.

Specifications:

Content	Specification
DIM.	112mm x 77mm x 27mm
Weight	300g
Standby Time	90 days +
Band	850/900/1800/1900Mhz
GPS sensitivity	-159dBm
GPS Accuracy	5m
Battery	Rechargeable 3.7V 10000mAh Li-ion battery
Storage Temp.	-40°C to +85°C
Operation Temp.	-20°C to +55°C
Waterproof Grade	IP67

INDICATOR LIGHT STATUS	MEANING
Yellow light -Solid	No GPRS signal
Yellow light -Flash	GPRS connection
Blue light -Solid	No GPS signal
Blue light -Flash	GPS connection

Multi Network Sim Card

Your GPS tracker is installed with a Multi Network Sim Card with all tracking data included. This sim card is not fixed to a mobile network, which means it will connect to the strongest network in your area, giving you the best connectivity possible.

Our Multi network service goes beyond the UK, covering the EU at no additional cost to you.

If not already installed then please insert the supplied sim correctly into the sim card slot. Your tracker if charged will then switch on automatically. Removing the sim card will turn off the tracker.

Online Tracking Platform

You have unlimited online tracking for a full 12 months. You are able to monitor the position of your asset in real-time and data will automatically be saved for 90 days allowing you to view historical locations with ease. You are also able to setup Geozones where you will be notified if your asset leaves or enters a defined area.

iOS/Android App

Our App is available to download from the relevant App store and works simultaneously with the server allowing you to fully monitor your tracker from your smartphone.

Settings

Your Rechargeable GPS tracker has been fully configured for you prior to dispatch. You are able to monitor your trackers battery strength directly from our web platform.

Supplied user name and password can be changed from the tracking platform.

Technical Support

If you require any support with setting up Geozones or using our Mobile App etc then please either:
