

THE PATH TO TOTAL BLACK VICTORY IN ONE DECADE

By Komi I Gagnon

Chapter 1: Introduction

Chapter 2: Weapons of mass destruction

Chapter three: The death of white power

Chapter four: The rise of Zamint power

Chapter five: The annihilation of race traitors

Chapter six: The age of victory

Chapter one: introduction

The way this world moves is based on force, in one way or another, if you wish to make the world a better place, you must first be strong enough to overpower those that would like to make it a worse place. The Zamint race doesn't fall outside of this main law of the world. This law applies to us as it does all other things. The races of the world oppose the rise of our race. They all would rather us in a weak position. The race that would like us in a weak position above all the others is the white race. The white race has committed crimes against our race that are unforgivable, crimes no man worth anything will ever look past. They see the rise of the black race as an existential threat because we would be just enacting a TOTAL WAR FOR ANNIHILATION against them even if it ended up killing all of us, both white and black.

The whites currently through mainly america place their soldiers all over the world. In 2018, the U.S. Department of Defense suggested that the United States and Ghana enter into a Status of Forces Agreement (SOFA), a \$20 million arrangement permitting the U.S. military to increase its presence in Ghana.

As of 2025, the United States has approximately 29 military facilities across 15 African countries. These are only the bases that they publicly display. The anglo-Americans have been invasive since their very beginning. The current map of the United States was created through mass genocides of the non-whites that lived here. Today, there are effectively no native Americans left. It's idiotic to think natives are the only ones they have on their list or that there is no longer a genocidal empire existing as the Anglo American country. During those days of expansion, they were

happily tormenting the black population that existed in North America quite literally from the day they were born to the day of their deaths, for the sake of cotton production. They threw black babies to alligators as bait, mass raping and hanging as they pleased. They clearly have shown what they are willing to do. They have the desire to do these things now and are awaiting a time to begin again in their campaign of OPEN warfare against the black population within the border.

Today, they are covert and use things like abortion and drugs. 900 black babies die per day due to abortion in the U.S. which is about 330,000 per year. $\frac{1}{3}$ of a million. The founder of planned parenthood had this idea in mind. It was a planned attack on the black American population. They waged an absolute opium war against the black population in the U.S throughout the 80s in particular that hasn't gone away, even till this day in 2025. The DOJ Office of Inspector General published The CIA Contra Crack Cocaine Controversy in May 1999, documenting that the CIA shared intelligence on Contra drug traffickers with the DEA, confirming their contact between agencies over drug investigation. CIA FOIA documents show that Air America, a CIA proprietary airline operating in Southeast Asia, had employees implicated in opium smuggling—acknowledged internally as against company policy yet tolerated by higher-ups. Classified memoranda reveal the CIA maintained surveillance on known Contra-supporters engaged in drug trafficking, demonstrating institutional awareness of narcotics operations among its allies. In October 1996, Peter Kornbluh of the National Security Archive testified before Congress, presenting declassified CIA documents and asserting that the Agency knew its Contra allies were supplying crack cocaine to dealers in South Central Los Angeles. There was a full blown

opium war to target the black population in the u.s and harm it's health. They did not only destroy the lives of millions of black men, women and children, but the future generations that came afterwards. When this was done, they created laws to ensure they could use the situation to destroy even more black people in the us. While a person found with five grams of crack cocaine faced a five-year mandatory minimum prison sentence, a person holding powder cocaine could receive the same sentence only if he or she held five hundred grams. The version of this drug that whites were more likely to hold was the cocaine powder while the crack was the drug most likely to be in black hands. The law stated that whites would basically be free to hold the drugs to the point of 500 grams and the black drug would be limited to 5 grams. This allowed them to imprison the black people holding the drugs they pushed into the black communities en masse.

In 2004 white firefighters burned down Black homes because the town was getting too BLACK. This was done in charles county maryland. This was because the area was wealthy and they were not happy about black people buying homes in the area. Events such as this are happening in our time. It's the fool who believes it's impossible and that all humans are just friendly and will never be violent again because world war two ended. People who are unprepared and undefended will eventually vanish from the earth.

The anglos planned to destroy the black population in South Africa as well. They simply failed to do it since the british empire collapsed and the american anglos could not keep up against soviet aligned african nations. The american anglos supported the anglo south africans in their fight but ultimately they gave up due to the greater effects of waking up the black

race to the total destruction they could face if western whites were allowed another inch in the Zamint continent. This is no joke, this is the dire situation our race faces still. The white west is revamping it's efforts to be genocidal to the Zamint race.

Mexican-American War (1846–1848): Military conquest; resulted in the U.S. seizing half of Mexico's territory (present-day Southwest U.S.).

Overthrow of the Hawaiian Kingdom (1893): Backed American settler coup over Queen Lili'uokalani; later annexed in 1898.

Spanish-American War (1898): U.S. defeated Spain and took control of the Philippines (annexed; led to Philippine-American War), Puerto Rico (annexed; remains a U.S. territory), Guam (annexed; remains a U.S. territory), and Cuba (occupied; controlled politically and economically under the Platt Amendment until 1959).

Annexation of Wake Island (1898–1899): Claimed by the U.S. during expansion in the Pacific.

Partition of Samoa (1899): U.S. and Germany divided Samoa; U.S. gained eastern islands (American Samoa).

Philippine-American War (1899–1902): Brutal counterinsurgency to suppress Filipino independence movement; U.S. maintained colonial rule until 1946.

Panama Canal Zone (1903): U.S. backed Panama's independence from Colombia, then gained control of the canal zone until 1999.

Banana Wars (Early 1900s): Military interventions to protect American corporate interests, including in Cuba, Honduras, Nicaragua, Haiti

(occupation 1915–1934), and the Dominican Republic (occupation 1916–1924).

Puerto Rico becomes U.S. territory (1917): Residents granted U.S. citizenship without full rights or independence.

World War II Occupations (1941–1945): U.S. occupied parts of Germany, Japan, and various Pacific Islands. Maintained long-term military and political influence in postwar Japan and Germany.

Post-1945 Global Military Presence: Informal empire through military bases and economic dominance in places like Korea, Germany, Philippines, Okinawa, and Saudi Arabia.

Cold War Interventions (1950s–1970s): CIA-backed coups and military operations in Iran (1953), Guatemala (1954), Congo (1960s), Vietnam (U.S. war and puppet government), and Chile (1973).

Global War on Terror (2001–present): Military occupations and nation-building in Afghanistan (2001–2021), Iraq (2003–2011; ongoing presence), and continued operations in Somalia, Yemen, Syria, etc.

The only comparable openly hostile white population are the French. The French have been behind assassinations, coupes, and sabotage events across the Zamint race's continent.

Laurent-Désiré Kabila, President of the Democratic Republic of the Congo, was assassinated in 2001 shortly after trying to remove foreign troops

Sylvanus Olympio, the first president of Togo, was killed in 1963 after refusing to integrate French-trained ex-soldiers into the national army and resisting pressure to maintain close military and economic ties with France. His push for economic independence from France, including creating a national currency separate from the CFA franc

Thomas Sankara, President of Burkina Faso, was assassinated in 1987 after implementing radical socialist reforms that rejected Western aid, nationalized land and mineral wealth, and criticized the influence of the IMF and World Bank.

Patrice Lumumba, the first Prime Minister of the Democratic Republic of the Congo, was assassinated in 1961 after calling on the Soviet Union for assistance during a civil conflict triggered by secessionist movements and Belgian interference. His stance against Belgian interests and his appeal to the USSR at the height of the Cold War scared the United States and Belgium. Declassified CIA documents and Belgian parliamentary reports have openly confirmed Western plans to remove him due to their own fears.

The source of the problem is obviously the outside world. The whites, in this case particularly, France. We cannot solve anything unless we deal with the origin of the problem. WHITES! HOW EXACTLY DOES ANYONE FIX ANYTHING FOR THIS RACE IF EVERYTIME YOU TRY TO FIX THINGS, THE FRENCH FEEL THREATENED AND COME TO ATTACK AND KILL YOU? There is only a solution of making sure you can kill RIGHT BACK if they continue to attack. This is called Mutually Assured Destruction! This makes clear that we cannot ever solve the problems of our race by just going out to solve them. The rebels and “colonial troops” were all puppets of whites. The ones who

would turn on us for nothing but the instruction of the enemy race. We must have the capacity to mass genocide our race traitors because they are a constant threat. The day we solve our problems within is the day we rise. The west has always seen that as a threat. They will do all they can to prevent it. They have defended their puppets, theyve defended the idiots of this race because of the use they see in them. They will arm them in any typical gun fight against the righteous, brave of this race. So then, how do we get around this? Defense!

The rap industry is mostly controlled by three major record labels: Universal Music Group (UMG), Sony Music Entertainment, and Warner Music Group. These companies are owned or led by people of mostly European or Jewish-American background. Each group has several smaller labels under them and signs many of the biggest Black artists in the world.

Universal Music Group (UMG) is owned by Vivendi (a French company), with significant shareholders including Chinese and U.S. investors. The CEO is Lucian Grainge, who is British and Jewish. UMG owns Interscope Records, Def Jam Recordings, and Republic Records.

Artists under Interscope Records include, Kendrick Lamar, Dr. Dre, Snoop Dogg, Eminem, Playboi Carti, DaBaby

Artists under Def Jam include, Big Sean, Pusha T, Jadakiss, LL Cool J, Public Enemy

Sony Music Entertainment is owned by Sony Corporation, a Japanese company. The CEO is Rob Stringer, who is British. It owns RCA records, Columbia records, and epic records.

Artists that have been signed under Sony's labels are, Beyoncé, Travis Scott, A\$AP Rocky, Lil Nas X, Future

Warner music group was owned by Access Industries, controlled by Len Blavatnik, a British-American businessman of Jewish descent. Its larger labels are Atlantic records, Warner records, warner records and 300 entertainment.

Artists under Warner and its subsidiaries include, Cardi B, Meek Mill, Wale, Gucci Mane, Young Thug.

White involvement is everywhere, they have created the culture that poisons our racial population and they promote it through all of the media outlets. The effort to take down these industries that poison our race would be a fight, we could not simply imprison the sources of this influence or even pick up a legal battle. The u.s government is totally onboard with this agenda of poison. They created these industries with the Cointelpro agenda in mind. They would defend their companies because they need them to keep poisoning our race. They would cheat their way through the whole process of us trying to fix this problem while within their nation. They would use it as an argument to close all black media and would use it as a path to only have white influence directly on the black race. There would be no way to work this.

The coupes around the black world, assassination, and military rebellions funded by the west show that if someone attempts to fix problems the black race faces, especially if they are sourced from the whites anyway, that whites will stop pretending to be doing good and ultimately use force to stop our victory. When black men in America built black wallstreet,

whites burned it down to the ground and massacred children, men and women within the community.

The whites proclaim to be friendly only to keep the race from awakening and realizing only force will solve the problem we have with them. Forceful restraint of the white race is THE ONLY WAY to stop their invasive behavior and all white meddling in the black race's affairs.

Chapter two: Weapons of mass destruction

Nations that possess the ability to be so detrimental to other nations that their economies crash, their populations lose tens of thousands all the way to hundreds of millions of people are truly sovereign. This ability makes any nation think 1000 times over, whether it's reasonable to attack you because such an attack could cause the death of their nations. The population can't support any leadership that will irrationally cause the death of them and their children assuredly. I say assuredly meaning, there will absolutely be no escape, death or disaster is CERTAIN. Any nation that tries to attack a nation with such capabilities will certainly die. There will be no reason to ever invade such a country because the supposed benefit will never be worth such detrimental strikes against their own nations. That's what weapons of mass destruction are for. Any nation that manages to build and have the ability to deploy weapons of mass destruction is immediately sovereign and cannot be invaded by any other nation on planet earth without that other nation being suicidal.

The Zamint race must have weapons of mass destruction to solve it's problems. Ignoring this part of the equation will only lead one in circles, never reaching success. Only a fool thinks you can raise the black race without having at least one of the ultimate deterrents there are. We have

already gone over the reasoning as to why strength and force are the only ways to bring change in this world. We must now enter the practical matters of how exactly one would act upon gaining this knowledge.

There are examples around the world proving that in order to be a successful nation, you must have the capacity to destroy cities and kill millions of men, women and children without sending the same number of soldiers with typical arms. We are in an age where typical arms like guns, tanks and conventional explosives are not ideal, even more so for the black race in our current position. When people think of our racial success and how to get there, they always think about a war in the old way. They think about a war like World War Two or a civil war, they think about something like the Russian revolution. This is stupid! Amazingly stupid, anyone who still believes this has never actually sat and thought about how to fight the other races for our sovereignty back. This is not to say guns and the other typical military tools are not going to be necessary. The power struggle isn't truly within the race. The men that can bring this race to victory already have the intelligence necessary to outdo the rest of the black race when left alone. We will not be fighting the white powers like America or France with guns and tanks. We will not magically outnumber them with tanks, guns and missiles. They out produce in those fields, we CANNOT fight on that battle front. There is no point even thinking about it yet. In order to produce weaponry like that, industry is necessary, we could go straight to building it, we could try to get democratically elected and then openly proclaim to the world that we plan on building military industry for the black race's sake. This would obviously only result in a bombing campaign by the white powers that would destroy all the work

that may have been done. This means we CANNOT focus first on typical military equipment.

The only typical military operation that would be done is that which is within the race. This is the operation that takes place to finally finish off all leftovers of the age of white influence. All coons, racemixers, traitors, Tribalists, partially white blooded beings that refuse to mix back in, etc. This fight doesn't require weapons of mass destruction to be used. This is a fight that could be done in a typical way because we, the smarter and more race loyal, United black men can produce far greater drones, guns and tanks than they could ever hope to.

A lot of race conscious black men have never even thought about Weapons of mass destruction. I will introduce you now to it.

The official definition of weapon of mass destruction of brttanica is as follows: a weapon of mass destruction (WMD), weapon with the capacity to inflict death and destruction on such a massive scale and so indiscriminately that its very presence in the hands of a hostile power can be considered a grievous threat.

The four main types of weapons of mass destruction are nuclear, radiological, biological, and chemical. These weapons are designed to cause widespread damage and harm to a large number of people.

When most people think of weapons of mass destruction, they think of a nuclear bomb, assuming that only nuclear bombs are capable of mass destruction. Nuclear bombs are only the most flashy of the weapons of mass destruction the black race could use to defend itself. They however, are not the ideal WMD for the black race to have as its first pick right now. In the state, we are not able to get uranium easily into the hands of

black men that want to use it for defense. Enriching the uranium is not the most complex part of the black race gaining nuclear weapons, it would be acquiring the uranium-238. This is the uranium that comes out of the ground. It's not the kind that blows up or produces large amounts of radiation. It's a stable element. The atom that makes this up only becomes capable of explosion when it absorbs neutrons. This is typically done using a nuclear reactor where u-235, another kind capable of explosion, is extracted from the u-238 ore. This is an expensive and time consuming process. This would ABSOLUTELY NOT be the method the Zamint race should use because of its expense and loudness. The method the Zamint race will likely use to produce nuclear bombs is the reactor method. When uranium-238 absorbs a neutron, it becomes plutonium 240. This is another kind of explosive nuclear bomb material. This is MANY TIMES EASIER. Neutrons can be produced through a number of ways. The ideal method for the Zamint race would be through gamma ray bombardment of beryllium. This produces neutrons. The process would start off with electrons, the electrons would bombard tungsten, this would produce the gamma rays. Those gamma rays would then bombard beryllium, out comes the neutrons into the u-238. Once enough neutrons have bombarded enough u-238 atoms, the system would then have enough plutonium to become a reactor in itself with enough graphite to reflect neutrons into the system. This is an extremely dirt cheap method because the electrons are produced by heating up metals that will then emit the electrons. It's a nearly free neutron production system. I tell you this because, too many have never actually sat down to understand possibilities outside of some 20th century gun fight. This isn't me suggesting we as the black race build nuclear bombs. I don't believe nuclear explosive deterrents will be the first WMDs the Zamint race will obtain

Nuclear bombs are also useful in different ways than simply blowing up cities. If the Zamint race were to build a single nuclear bomb, it wouldn't be used to blow up one city, that would be stupid. This would only result in a totally disproportionate response of which we could not respond any further to, which means we would not be defended by the nuclear bomb at all. When nuclear bombs are detonated at high altitudes, they generate something called an Electromagnetic pulse. This is a burst of force capable of pushing electrons. That includes the electrons in every single wire you can imagine. When a force too great pushes too many electrons, it produces heat, this causes burns and fires. When an ELECTROMAGNETIC PULSE goes off at an altitude of 200 miles, it could turn electricity off for an entire continent under it. This is far superior to whatever effects a single blast would have on one city.

former CIA director r. James woolsey said this:

“There are essentially two estimates on how many people would die from hunger, from starvation, from lack of water, and from social disruption. One estimate is that within a year or so, two-thirds of the United States population would die. The other estimate is that within a year or so, 90% of the U.S. population would die. We're talking about total devastation. We're not talking about just a regular catastrophe.”

The traditional use of nuclear bombs in the mainstream media is promoted for a reason. It's not for everyone to know how much damage one of these can do. What I want all black nationalist reading to realize from this section is that only one device if at a high enough altitude is capable of bringing total collapse to entire nations. A collapse that they don't want and that we wouldn't want. Which is why WMDs are the most important thing we could have for our race's defense. No nation would

ever attempt to Invade or wreak havoc on the Zamint race ever again if they knew the consequence would be the death of their nation FOR GOOD.

The next WMD I want to go over is the biological weapon. Biological killers are ALL AROUND US, and if not the actual biological killers, the spores or eggs of these biological killers. A biological weapon is defined as a harmful biological agent, such as a pathogenic microorganism or a neurotoxin, used intentionally to cause death or disease on a large scale. Biological weapons are THE weapon the black race should acquire first as a deterrent. This is the easiest to mass produce and acquire generally. It's the cheapest option capable of the most deaths.

A biological weapon can range from anthrax and botulinum to hepatitis and aflatoxins. Someone who was to take their saliva while infected with Covid and spray it in a classroom in a true aerosolized form would have started a disease spread in his school. Eventually the disease would spread from person to person from the original release and could begin to spread throughout a town. This would itself, if done correctly and thoroughly, be a weapon that injures an entire town population, flooding hospitals, causing a public health crisis in which schools and work places would shut down to prevent any further spread, low trust even within families. This would wreak havoc on the local economy and if it were a major city where this occurred, the impact would be heinous. It would be a disaster for the population. COVID-19 can survive outside the body on surfaces anywhere from a few hours to several days which means, simply leaving the gas in the air especially if there's moisture would allow it to stay and infect more and more people. This is a minor possibility. To truly grasp the possibilities. Imagine instead, this is done with the EBOLA VIRUS. Ebola

can survive up to several hours in a dried state, and up to several days in moist conditions. Up to two weeks in blood, and up to three months in semen. This is the virus option. A race that had these diseases on standby and was prepared to release them at any time would be a significant threat and the nation wishing to harm us would have to consider if they could deal with such a possibility of disaster.

The Covid pandemic alone resulted in a decline in overall economic output, estimated to be \$103 trillion less than what it would have been without the pandemic. It caused a nearly 14% decrease in GDP. employment in restaurants dropped 40%. The workers only survived due to government assistance. This means the government had to print immense amounts of money to keep afloat. All money printed totaled to \$5.2 for COVID. The combination of roughly 25% money-supply expansion and inflation surges has cut the value of the U.S. dollar by about one-fifth since the start of the COVID stimulus.

New York–Newark–Jersey City, NY-NJ-PA: \$2,298.9 billion

Los Angeles–Long Beach–Anaheim, CA: \$1,295.4 billion

Chicago–Naperville–Elgin, IL-IN-WI: \$894.9 billion

San Francisco–Oakland–Berkeley, CA: \$778.9 billion

Dallas–Fort Worth–Arlington, TX: \$744.7 billion

These are the five cities that make up the largest portion of the american economy alone. All together, these cities alone make up 22% of the U.S economy. A situation where these cities were to be uninhabitable and the workings of the city could no longer continue, would be detrimental to the nation as a whole and would certainly destroy the position of world

superpower. If completely disabled, U.S. GDP falls to \approx \$21.35 trillion. Even against China's \approx \$17.8 trillion (2023), the U.S. would on paper still be larger, but only just. These five metros produced \$6.01 trillion— \approx 22 % of the U.S. \$27.36 trillion economy. California, New York, Illinois, and Texas would lose huge portions of their tax bases, triggering cascading public-sector layoffs, service cuts, and state-sovereign defaults. Without stable revenue, the U.S. government couldn't fund Social Security, Medicare, defense, or debt service at current levels—forcing draconian cuts or massive additional borrowing (if markets still lend). NYC's financial district handles \sim 20 % of global equity trading and 30 % of bond markets. An EMP inactivating trading systems would freeze capital markets. Los Angeles/Long Beach is America's busiest container gateway (40 % of imports). San Francisco Bay ports handle another chunk of West-Coast trade. Shutting these down stops critical goods—everything from electronics to food staples. Chicago is the national rail hub (50 % of U.S. rail freight passes through). Dallas is a key trucking, energy, and telecom node. Critical supply chains for manufacturing, retail, and energy would snap—leading to shortages, price spikes, and further GDP contraction well beyond the initial 22 %. These metros employ over 20 million people. Immediate unemployment surges of 15–25 % nationwide would follow, driving U.S. unemployment above Great-Depression levels. Lost livelihoods drive social unrest, reduce consumer spending, and erode the tax base still further. San Francisco–Bay Area makes up for over 50 % of U.S. venture-capital investments and a third of tech start-ups. Los Angeles's creative industries (film, music, digital media) generate \$100 billion+/year in export revenues. **Recovery would be measured in decades, not months. In effect, losing these five economic engines in**

one blow would end the United States' ability to act as the world's leading power!

This is the effect of only 5 cities going down, this is not even touching the largest population centers. The ability to affect these 5 cities alone would be able to deter american aggression. The american nation would have to consider if the attack they wanted to bring forth to the Zamint race would be worth the disaster only a couple cities going down whether due to EMPs, Radiological weapons or a biological weapon. You may remember however that earlier in this book I stated only one EMP, if detonated high enough, could take out the electricity of entire nations and even continents. It's truly not in the interest of any nation trying to preserve the status of a powerful nation to be hit with one of these.

The weapons of mass destruction are not meant to be used. THEY ARE A DETERRENT. They are only to be ever detonated as proof of possession, never in an actual conflict. This would be a suicide. They are there to tell the white race that whatever benefit they imagined from attacking the Zamint race would not be worth it since it would just end up in their total annihilation. That is the purpose of weapons of mass destruction. It's a serious sign of Low IQ if one doesn't understand what WMDs are for. You may also just be a white reader and proving my point about your fear of Righteous Zamint Vengeance to the point of losing your own rationality. You would have to assume we were looking to kill you so eagerly that we were fine with a suicide that ended up killing us in a global exchange of world ending weapons. This is simply your own fear and doesn't necessarily reflect reality. It's an assumption as well that the end goal is the seizing of historical white land like europe. This as well is foolish

thinking, an assumption made up by irrational barbarian minds that are incapable of not automatically coming to that conclusion. There was no part of this writing in which I describe ways to ever invade or destroy whites for the sake of seizing their land. All parts of this book speaking about the effects of weapons of mass destruction are meant to clarify to all readers how destructive, detrimental and very possible Zamint WMDs are. It is to make clear that people can die from such a conflict, to make clear how WMDs make conflict undesirable.

My mission in this chapter is not to tell you how to build your own WMD nor am I demanding everyone know how to build them. This doesn't even go into the real possibilities. The things written in this chapter are only things I felt were ok to put in a book. I simply want to undo the typical thinking of impossibility that comes with weapons of mass destruction. Much of the laziness and inaction is sourced from a thought process that leads in circles. All black nationalist with IQs above 2 know fully that the solution to our problems is not entirely peaceful. The problem is, you likely thought about that and then automatically concluded that conflict with large amounts of rifles and soldiers would take place. You assumed the fight was going to be “the revolution” we’ve all been told about.

This is a task that would require hundreds of thousands of men, billions of dollars for regular arms and some way to get the same amount of tanks the enemies of the black race have. It would include somehow defending against drones and missiles. This is what leads people to a place of blank thought. Deep inside, you know that's an expensive and consuming job. It's due to a lack of scientific knowledge that so many come to such mental situations. Know that WMDs are not some impossible thing and even more so, know that the acquisition of hundreds of thousands of men

and the arms, camouflage to supply them with is a MILLIONS TIMES HARDER and FAR more expensive.

Chapter three: The death of white power

Whites will have a choice once these weapons are in the hands of the Zamint race. They will either choose total death of their own race or acknowledge that their days of influencing the black race through force are over. When we look back to the end of the British empire, we will see that the main blow to kill the British was the war with Germany. This was a war they chose to fight because they couldn't accept a world where there was another power as strong as them. This was ultimately a loss for them. They ended european power for nothing more than pride. This total war behavior however never came to be with the soviets who presented an even greater threat to the sovereignty of western europe and britain. They had to give up on ever destroying the soviets. The British were not going to fight the Soviets because they simply had no ability to. It was an impossible fight. The british nation was but an island, there was no hope of fighting any war with the gigantic soviet nation purely on a number bases. On top of that was the main fact that the soviets possessed nuclear, chemical, and biological weapons. They had all the means to destroy the british island in a day. The power of the british empire ceased to exist over the Soviets the minute the Soviets possessed weapons of mass destruction and were willing to use them.

White nations find their power in militaristic ability, NOTHING ELSE. Never be fooled into believing they have power over nations through economic influence or cultural influence. They have the ability to enforce

their trade policies because they bend the arms of nations all around the world. Once this is gone, they have no ability to influence any nation. The us has committed to a plan to economically isolate North korea. They enacted sanctions on exports like coal, textiles, and seafood. They enacted sanctions on foreign banks or companies that do business with North Korea. Asset freezes and travel bans on North Korean officials. Encouraged nations to expel North Korean diplomats. The U.S. has forced countries like malaysia, philippines, and thailand to cut trade ties with North Korea. North Korea YET HAS more beautiful cities and national health than ANY nation hosting anglo animal troops on their soil. This means North Korea has built a strong nation that cannot be invaded by the u.s and has joy within it. It's not possible to coupe North Korean leadership like african nations that have been puppeted by anglos for decades. White power can do nothing more to North Korea. Anglos have already attacked North Korea in every way they can and there are no cards left. This is called living in reality, not relying on the west for ANYTHING. WHITE POWER HAS DIED IN NORTH KOREA!

The Zamint Union we imagine would face something identical to what North Korea has faced, which is ultimately an attack in every way except forceful. This is something we are to get past. The choice is to face struggle and gain sovereignty or face struggle and lose sovereignty. We, the righteous, choose the path to sovereignty. This means we will have to rebuild a lot and do so very quickly because all the reliance on the west which is a situation ultimately constructed by the west will have to be undone. Everything we could possibly build needs to be understood from main infrastructure to advanced technologies.

white power will cease to exist over the Zamint continent and they will have to deal with it. The white's best path forward is to embrace a peaceful separation and lines of influence around the globe for races. This will mean white power lives to expand in space and to exist upon their own lands. There will be no more black people in white states and no whites in Zamint states. There will be no internal racial conflict for Zamint or white nations. Each race shall embrace his own state.

Chapter four: The rise of Zamint power

With the death of white influence over the Zamint race, we can begin to build our structure, solidifying the position of the stronghold men. Stronghold men are what I refer to as the Zamint supreme. These men are particularly important because they begin things. ZS men will be the first creators of the Zamint future. A majority of the black race lacks original will. When a path has not yet been created, they will not know what to do. Their directions will be decided by outside forces. Most human beings are like this. Most humans only do what appears to be immediately comfortable, never looking to a greater goal. Most humans are animalistic directionless leaves in the wind. The men who matter to us in such an important construction age are only to follow for immediate gratification and monetary comfort. These are paid pets, WE DO NOT NEED THEM. Those animals are the exact ones living day to day, doing nothing to ensure our long term racial survival. They are the ones so stupid that when whites promote media that is anti-Zamint, they listen to it and absorb it. They are broken men that when we preach the message of victory, will understand nothing or worse, understand everything that is said but are effectively paralyzed. Entities like this cannot be considered at this stage.

They are like prostitutes, meant to be bought and used by whoever can overpower or pay them.

We, at the time of this writing, live in a world where whites have arms upon arms upon arms! A world where they have such an overhead of arms that at any time they could wage a total war against the black population in the U.S and around the world and there would be no defense. We currently have no nuclear bomb, no known stockpile of biological weapons, no radiological weapons or even a top ranking military. This is a time of UNBELIEVABLE amounts of danger. There are fully grown black “men” that walk around as though all things are normal, as if there isn't total death constantly hanging around the corner awaiting a time to strike. Some of them even have toddlers, pregnant wives, children, fathers, mothers, brothers and sisters and DO NOTHING ABOUT THE DEATH HANGING OVER THEIR HEADS! They not only go on about normally but even worse, when told about these problems, DO NOT CHANGE! Are these even sentient beings? Are they to be considered for anything? Am I truly to believe these are full beings and not the literal equivalent of sheep with a greater ability to do math? That’s exactly what they are. They are totally useless to their own long term survival, they are driven by immediate things the same way a sheep simply follows the grass on the ground totally unaware that the trail is leading to a fire. This is the state of the common man in general but in this case, I speak of the common black man. I couldn’t care less about those animals.

In this age, we have no space to concern about the lesser men of our race. We have no time to worry about women. All parts of the black race that don't fit into the Zamint Supreme category are to be focused on only so much as it keeps them out of our way. This period would be one for the

construction of our leadership and the consolidation of our positions. This age would be used to place righteous Zamint men in power, in government, head military positions, control of media, etc.

Who is with us? Who is righteous? What counts as a good Zamint man? There is a range to our great men. We are not all the same, we have our own greatnesses and our uses for the Zamint race. The bottom line is putting the success of the race in the highest regard. This is the main necessity, anyone who doesn't have this mindset is subhuman and self-destructive. I am clarifying here that the only thing any Zamint man needs in order to be considered, with us, is to put the race first. We can always work with those men and they can be trusted with some position. There are other attributes that need to be considered and there are ranging levels of loyalty but we are simply defining the bottom line. Any man who puts the race first will have the mentality necessary for growth. A young Zamint boy born into such a world will always have a community to build him up from birth. This is what produces the best communities. This is how the best men of our race can be produced.

Ranks will exist

Class is not defined in our ideology like in capitalist nations. It is not based on degrees or family names. We do not require you to be a millionaire or a born mathematician. A man with our ideology who once had a 2.0 GPA with the willpower and care for his race's future will be more worthwhile in the age of construction than someone who has the 4.0 GPA but will work for whites instead for immediate pay. The man eager to help his race, aware of the potentials of victory and the dangers of defeat will have all the ambition and drive needed along with support from other Zamintists.

When Russia began its war with Ukraine, an immense
a number of western companies left Russia and Russia had to build due to
it.

Countries like China need Taiwan for advanced chip production. The same
issues will occur to us because so much relies on Europe. We need to have
things in place before ever disconnecting from the old structure that relies

on others. MICROCHIP MANUFACTURING NETWORK

CONNECTION/INTERNET

PHONE/COMPUTER PRODUCTION CAR PRODUCTION

AIRPLANE/JET/DRONE

PRODUCTION DIGITAL BANKING SYSTEM ARTIFICIAL
INTELLIGENCE

AUTOMATION Teams will be built to deal with each specific task with
respect to their skills and specific abilities. The teams will consist of
people

who are on the ideological scale somewhere. The ones who will have
the highest position in every team will be the one with the greatest
ideological connection and the greatest amount of skill.

We must form a culture that promotes endurance, enjoyment of progress,
strength and union. The Zamint culture must be built and promoted. This
is

something that is up to us to do. We must promote this culture through the
education system, media and entertainment. We must also destroy the
current culture that produces self-destruction and division by cleaning out
the media, recreating the education system and removing all the old gunk,
That is now called culture.

Constantly the question of division comes up. People ask, what about tribal divisions, cultural divisions, national divisions? The answer is strength. The idiots that care about stupid identities DO NOT HOLD STRENGTH. These are tribal village people, typically led by puppets only afloat due to western help. There is nothing upholding these lines in reality.

This is why control over infrastructure must be solidified. When the village's water system is under the control of Zamint loyal men, at any time, rebellion is impossible. Anyone who actually has the willpower and endurance to achieve anything will be with us and the rest of the population will be without any defense.

All financial institutions from banks to loan companies must one way or another be controlled by race loyal men to assure no mass funding goes to any race traitor aligned action.

Chapter five: the annihilation of race traitors

When the Zamint race's race loyal men have such defenses, it will be time to engage in an absolute and total war for total continental unity! The war

to rid our race of borders, to rid our race of dividing tribes, to rid our race of puppets, to rid our race of its viruses. It will be time to rid our race of any reliance on the white world. We can undo all the mental destruction of the last 400 years by burning all the broken minds. We will be able then to do AS WE WISH WITH ANYONE WITHIN THIS RACE! We wish to no longer have around those who act as viruses within our race. The ones who were paid to kill and take part in coupes in the past can be no more. Those stupid enough to sell drugs to their own population will be no more. Those who lived a life of inaction which ultimately helped the enemy ,will be no more. Those who helped in destroying Zamint families will be no more. Those who waged tribal wars of genocide and self genocide within our Zamint race will be no more.

There is an extensive list of the black people who are a detriment to our race. There are the greater enemies and the lower enemies

Mindless followers. Mindless followers are the people who may be useful to us. There will inevitably be scientists and engineers that we can trust, that never agreed with us. We, unlike nazi germany will not make the mistake of sending them off or ostracizing them. These are vital members of the Zamint race that we must include in whichever way we can. We have to know however that they are not truly with us and keep them on a list making that clear. There will be clearances that some Zamints simply can never be trusted with. They could at any time turn on us entirely or see some personal gain in our detriment. This knowledge allows us to make the next step. We can release these people in the nation to do good things for the race. We need to keep a watch on them to make sure they never actually harm us.

Blend-ins. Whenever any new power comes about, there will be the false members who wish to ride the ship to glory but would've gladly worked with the enemies to break down and burn our ship. There are traitors walking around today that will try and blend in with glory. They will be seen and investigated. They will be removed from our circles and kept amongst the watched.

Tribalists. Tribalsists are divisionists looking to keep this race broken and fractured. They do not wish to exist in a united Zamint state. Tribes have no right to exist. They would only end up keeping the race in it's current state, if they are left to continue on this path, they would only end up getting the race genocided as it nearly did a couple hundred years ago. When the europeans invaded north america, they used smaller tribes to work against larger ones. The divide and concur strategy of europeans was only possible due to tribalists and their stupid mentality. Tribalists must be listed and watched. Their future in a Zamint union is GRIM.

Ultra capitalists. These people put personal profit above all things. They have no real consciousness of nations and races. It's like a person that doesn't look up, doesn't see the world around him, only seeing the ground. He will happily turn on the nation and race for profit. They will work with enemies for the detriment of all Zamints. If someone's main focus is capital, you can ultimately pay him to die and even kill his own mother.

ZAMINTS AND NON-ZAMINTS

In 2100, The Zamint continent should only be men and women having **dark skin and type 4 hair**. There should be no other PERMANENT RESIDENTS within our race state. The question arises, what is to be done with the mixed and so called “light skin blacks”? All should mix back into the race, those who do not want to mix back into the race and want to keep alive their blood which is the legacy of a time when the Zamint race failed to prevent rape. They would like to keep the genes which were forced into our continent by those who have it in their hearts to destroy our race and attempt to do so. This obviously isn’t permissible or acceptable AT ALL! Many claim one can be 100% Zamint and not have dark skin and type 4 hair. This is simply a delusion. The goal for the continental image of 2100 has been set. The definition of a Zamint has been set.

Communists

I do not oppose the left, their goals are righteous when it comes to caring for people and destroying capitalists animals. They have a worldview that all should be cared for. They don't want to harm what is not stronger than them, but instead to uplift them as a people. They believe in common effort. They believe in communal sacrifice. The communist ideology is only NOW corrupted by liberal and individualist ideas. This was no accident either. This was done by the CIA. When the intoxicants are removed and the understanding that strength from every individual is needed in order to sustain their society, everything becomes much better. In order to have a soviet union, the men of that nation must be strong and united. The women of that nation must be on one accord with their fellow

men. They must raise their children to also be strong, so that the future of socialism is secure. It is liberal ideology that has crippled socialist power.

In the U.S, socialism has succeeded before. The new deal that FOUGHT THE BANKS, something that is unbelievable but did indeed happen in the U.S. The reason why banks can't just close and take all your money today and there is insurance on your deposits is because of the New Deal. Social security of today which allows you to one day retire is only due to the new deal. Most rural counties and towns having electricity and their little infrastructure is due to the new deal. The very LEGAL RIGHT to unionize which has been shot at and wounded since then was created during the new deal. There is socialism in every man's soul. The noble drive to help your fellow man is within every natural man. The white population is entirely willing to embrace socialism, but only for each other. Think about it, if the U.S built a true public train system or public bussing system, would they be happy sharing their public creations with a population of another race? If education was truly equal and quality, this would benefit a population that they do not want becoming truly knowledgeable. Why would whites contribute to true housing? Especially housing that kept the black family together? Would that not support black families? Would that not be one of the most important things necessary for black strength in the U.S? If worker rights were truly kept strong, would that not allow black men to work jobs and gain livable wages? This would allow them to take care of their families, this would allow for black children to live in stable and many times happier homes. This would take away from the instability and lack of resources that causes crime. This would create a strong black population. With stable and happy homes, the crack that the CIA pushed into the black population wouldn't appear appealing as an escape from

hell. This would undo all the work of the C.I.A. The CIA is not foolish to allow such a thing to occur.

Zamint socialists must understand that if you want socialism, you must not depend on outsiders for it, it is us who as a united race that will take care of our race. Our own tax dollars, hands, resources, man power, machines, and land will build our sustenance. The Zamint socialists who understand this will understand and join the Zamintist path to success.

Chapter six: The age of victory

At this stage, we have free reign, we have succeeded. Our world only consists of Zamint men with honor, strength, will, race loyalty and morality towards other Zamint men. These men cannot be interrupted from the outside. That means everything necessary for success is present. The days of traitors, coons, lazy and unwilling men walking amongst us will be over. The influence that the female gender had will have fallen to zero. There will be order, freedom to do what is right and a future of absolute victory. Everything will be working to uplift our race, every Zamint man born will be born into our heaven. We will have done the work to stop all outsider influence, there will be no outside media to influence our youths. There will be no person willing to take the money of enemies in exchange for treason. The punishment will be so severe that it will be a worthwhile endeavor for absolutely no person.

What now? There's one step before we go onto The future: construction, fulfillment, exploration of our universe, science, ships for the galactic empire we will build. The step is the ultimate consolidation. Solidifying our defenses, solidifying our ability to end the life of our enemies when/if necessary.

Our union, state, nation is built upon the values of unity, blood and Sovereignty.

BIRTH. A program or programs that produce new generations in a positive manner must come into reality. The children born must continuously be better. A decontamination project that reduces the white and asian blood in our continent must take place. All people in our continent must be dark skin with type four hair in two generations. All people produced mostly by rape or racemixing must be halted from reproducing. It would be an extreme loss if we were to allow the white man's rape soldiers to continue to exist. We would have allowed the white man to rape his genes into our race. This obviously cannot be allowed. This would be like me going to sweden with a million men, raping millions of women and then demanding sweden as a nation keep that blood i placed there. Not only this, but also claiming they are criminals for disagreeing with such a notion. This issue is not only one that exists in places like south africa but also much of the northern sahel. Places like sudan, northern and eastern chad, parts of niger and mali and much of mauritania. It must be done if we do not want to have entire portions of the nation that live as the product of enemy rape and hate us.

Racemicing and white blood products are not the only things that must be halted from reproducing. Certain inherited illnesses that hurt and weaken future generations must be stopped as well. These illnesses will only harm men who never asked to come into the world with those illnesses.

Economics cannot be ignored when considering how the Zamint race will move into the future. I will say, however, that the current state of

economics is largely corrupted by Caucasian thought and their ultra-capitalistic and bureaucratic models that create fake necessities. I largely believe that capitalism and the current economic model—centered around internationalist banking clans and the interests of globalist corporations—are far from what needs to be considered when speaking of the world we propose. These corruptions of the economy would be removed from our domain, and the reach of these internationalist criminals would be stopped. The focus of the Zamint Order economy would be on the Zamint man. The economy is centered around the Zamint man; the Zamint man will not be centered around capital, as we see today.

Today, the economic powers have proclaimed that man must be subject to capital and that man must do what capital demands. We can see that this is nothing more than those who control the flow of capital scapegoating and throwing blame on an “uncontrollable” and free-roaming system of banks, markets, and stocks.

The money men in New York, on Wall Street—the money men in the privately owned Federal Reserve—are the true rulers of capital, and therefore, the current rulers of all affairs. These people have loyalty only to themselves and their own personal increase in capital. An honest review of the capitalist situation makes clear that this system is not ideal for our race, and so the Zamint Order will never adopt it in any totality.

In their system, the military cannot even be nationalized; instead, it is made up of a number of corporations, independent and free to create prices as they please, and to create demand on their own—through unnecessarily spilled blood.

THE CAPITALIST ORDER HAS DROWNED MEN OF ANY COMPANIONSHIP, there is no such thing as a national effort now within the hearts of many. There is no longer the national interest for the men of that nation. There is no concern for the wellbeing of the fellow citizen and the continuance of the nation outside of Its necessity for the continued flow of capital. Men now wake in the morning with only the goal of accumulating more of the capital. The money men of the international banking corporate system then control the will of men. They have the carrot on the stick and have the ability to drive unaware men of the nation to any direction they wish. There is no consciousness of things of humanity.

The Zamint race has suffered immensely from this capitalistic disease. This disease that atomizes masses, no longer on a common road with consciousness but instead, all on their own track to follow the carrot on the stick, held by the money men. There is a problem where, when for instance a degenerate is criticized for being degenerate, the poor will justify the destructive nature of that degenerate by saying, well, he or she has money. This started when the destructive dealer of drugs, the robber, the prostitute was seen as a good thing to the youth of our race in North America. The rapper is seen as something good. He is a drug addict, serial single mother creator, robber, criminal, coward, homosexual, race mixing, greedy, gluttonous individual. This is a person that should not be seen in any positive light. However, in a capitalist order. Even the worst, most terrible creature with capital is seen as good or even righteous. That person is seen as someone the masses should follow. The internationalists money men use these methods to poison the minds of our racial populations not only in North America but now globally.

Within the African nations. Traitors are raised into puppet positions to play as presidents, and so called government officials. These rats work only for the money men of the opposite race. They are not in any position for the sake of their nation, race or tribe, they are there solely to serve the purposes of western capitalists. The only interest these traitors play to are those of their enemies. The nation is not something in mind for them, the millions, tens of millions, hundreds of millions don't concern them. Merely the capital of the western, internationalist money men. This does not only stop at these people. The love of capital causes many within the masses to somehow see these traitors as a pillar to look to, as a means to gain the only thing they care for, capital. So then they will also happily be traitors of the Zamint race to become lovers and followers of capital, this of course means doing the work of their own enemies, enemies that wish to in the end destroy them entirely, to eradicate their population from this planet. This is the way of the capitalist fool.

Instead of focusing on the ultimate struggle and righteous fight for his race's victory, instead momentarily having capital will keep him soothed. Like a dog with a bone. Happy to go into its cage so long as it has it. This is animalistic in nature, the inability to focus on grand ultimates, grand goals, the focus on momentary comforts given by their enemy in exchange for their death. These populations of capitalistic minded race traitors must be dealt with in a very **ABSOLUTE AND FINAL MANNER**. There must be a **FINAL SOLUTION** to the race traitor problem.

It was the race traitors that allowed opposing races into our continent the first time and that allow them into it now, it was those who were tribalist, focusing on worthless identities and not the greater more important racial identities that happily worked with the ultimate enemy, the opposing race

that helped them gain entrance way into the continent. Today, these same people are opposing different sections of the Zamint race, speaking of false nationalities, false tribes, identities that couldn't hold up to even face the neighboring tribe. These same people identify with gangs and neighborhoods not owned by them to oppose others of the Zamint race. People identifying with republicans or democrats, to oppose other sections of the black race. Those identifying with left or right and avoiding the reality that race is first. Those who are more loyal to a religion brought to them by their racial enemies than their very own racial victory. People who would rather be a pet to the Muslim or Christian world than a soldier on their own. Those identifying with nations named after Europeans aristocrats identifying with borders created by the white race less than 80 years ago. Identifying with flags of nations that were massacring their population in North America not long ago. Identifying with governments that are 99.99% white.

ALL black men who put these capitalistic objectives in mind are traitors and ultimately getting paid to die and not only die but to help kill the black race. Being paid to stay put and not build up their own race to ensure that the force of the white race can be overridden when necessary and stopped at the gates. The white race has its ties to the bank order due to greed and the non-care for others of that population. Willing to turn on their population for the capital. For our Zamint race to have success. We must bring an absolute end to all traitorous elements. We must destroy all ideology that suggests individualism, especially capitalism, there must be an absolute and total solution to this problem.

With that said, now the practical matters of economy in an ideal Zamint state with Zamint order policy. In a Zamint state, the focus is the well being of the Zamint man.

First of all things is that all Zamint men have good access to homes, education for them and their future sons, and food security.

First, food security. There are a number of crops that can be grown year round very easily that will continue to grow without immense infrastructure such as cassava , corn and rice. These types of food crops will be grown in a nationalized industry in which tax dollars pay for it. Policy is to keep it at a firm nearly free price to ensure that everyone has access to some sort of food no matter their personal condition. The land necessary for the crops will be nationalized land, the machinery will be produced using nationalized materials. Then only the labor to manufacture and operate the farms will be of cost. Outside of this will be a normal market in which those crops which are grown by farmers not within the nationalized food industry have the ability to price according to markets. The men of the nation based on their own personal revenue will have the choices to make. It is the nation's responsibility to ensure that no Zamint man nor his family is starving From that point each man will have more or the minimum given based upon his own route of life.

It's vital that Fathers be able to single handedly own the home, therefore ensuring stability and order. Without this The very core of the race will break and women will begin to have influence over children, children will be without order. Decay will begin again. Much land would be nationalized to ensure that there's space to build housing for Zamint men and their families. The land that the house is built on would then be owned by that Zamint man, the home construction materials would be given by the nation. The materials that are decided upon for home construction will be nationalized to a large extent to ensure the prices are kept at the firm limit necessary to keep stability in home construction. The resources

would then be provided for. Only the labor cost would need to be taken care of by the Zamint man.

These will be base prices, and quite good quality. This is simply to delete the possibility for any Zamint man or his family to become homeless.

Education: education for our race men is vital to keep intelligence on the increase in the sciences. It's not only important to increase scientific intelligence but to keep knowledge of our history, our ideology, and how to view the world. There are vital mental developments that the state must facilitate in every man and boy of our race. It's important that the men of our race are not merely following due to social cohesion or fear of being an outsider. We need all future men and boys of our race to understand the necessity of our ideology. This way even if many traitors were to exist, they would not be moved by them. We must increase the scientific knowledge so that with the ideology as a core, they have the ability to increase our racial capability.

This follows a similar route to the housing policy when constructing schools, materials for building the schools will be done with nationalized materials, and tax money will fund the labor for the construction. The school teachers may be lacking and where they would be lacking, recordings and the use of glorified tape recorders (A.I) would happen.

Free market must be allowed to the extent that it does not hurt and or oppose the nation. THERE MUST BE AN AGGRESSIVE ATTACK AGAINST ANY BUILDING OF CORPORATIONS THAT attempt to be a detriment to the Zamint man population. The natural elements under the Zamint land must be nationalized so that all projects that will benefit the race technologically can be subsidized.

Ultimately, We have all the raw materials needed to construct everything. We simply need to be able to develop every device with our own science. In this situation, we do not need to buy from the rest of the world. We need total self-reliance.

Workers unions are simply a necessity however, we are not communist and don't believe in the idea that the means of production should merely be controlled by workers alone. The man who builds a business or company up should indeed have greater say in his own company and business. The man who works in that company isn't to be ignored, this man has played his role in the creation of this business or company. These men that are the hands of the operation must operate alongside the greater creator of the entity. The owner will be free to operate as he sees fit. The governing force will only institute democratic company policy in the sense that employees will have a literal vote and say as to what happens with their portion of operations within law only if the company owner begins to attempt robbing the employees of the company. The policy is to fit both the employee and the employer never to just fit one. In order to create any company, it took the masses within that nation to ensure the security for you to build anything without our racial enemies coming to simply ROB YOU TO DEATH and so every man of our race that plays part in our racial victory must have his respect in the union at work.

In the case we succeed, and any capitalist wishing to look back to the capitalism of the day. We will remind them of how Jews were billionaires, native Americans used to own all the land in the US, and how anglos used to have India as their own personal company but without strength to defend what they have. It's only hanging on a slim rope. A truth I would like to give you is that your black man business whether it earns 3000 a

month or 3 million is nothing in a world with 2000 white nuclear bombs. Your black man business will only be defended once there are 3,000, 4,000, 10,000, 50,000 black nuclear weapons with the ability to defend that business from those that can currently take it from you whenever they want.

Inevitably, we must answer The space question. There are only three main races on the planet, the mongoloid, Caucasians and Zamints. Our counterparts, the caucasians and the mongoloids both now have space stations. We the Zamint race could very quickly develop the parts and send them into orbit with nuclear pulse propulsion, which is using nuclear explosions to propel objects into space. Space is only 60 miles up, a ship traveling at Mach 3(2301.81), which can reach space in only 2 minutes, then rockets can be re-ignited to get it into orbit. There are other options I have in mind like large helium lifting balloons. This works in the same way that regular balloons you have at parties do. The force is called buoyancy, buoyancy is the upward force exerted by a fluid (liquid or gas) on an object immersed in it, causing the object to float or rise. This force, also known as the buoyant force, is essentially the difference in pressure exerted by the fluid on the top and bottom of the object. We can use all sorts of methods to get our race in space. It must be done.
