Our Mission

To improve the quality of life for underserved communities around the world through supporting their charity and development projects by engaging services of volunteers, professionals, and students in collaborative work with our partnering organizations.

A Message from Our President

Dr. Hoai-An Truong
President and Co-Founder

Dear Friends,

As we celebrate the holiday season, I wish you and your family health and happiness. The year 2020 has been a challenging time for all of us, yet I am very grateful for your time, talent and treasure as volunteers, donors and supporters. Thanks to your commitment and dedication, ICI reached a 5-year milestone in carrying out its mission, initiatives and projects. On behalf of the ICI Board of Directors, I express our sincere appreciation and would like to share our collective achievements in this special reflection issue for ICI's 5-year anniversary: 2015-2020.

With more than 50 volunteers in the U.S. and other countries who may speak different languages and have different talents, **we share a common bond—the language of humanity**— to help

those who are less fortunate. It is in that spirit that we reflect on our humanitarian missions and projects. Over the past five years, ICI has conducted seven public health, medical and humanitarian missions with twelve partners in the United States, Haiti and Vietnam. In addition, ICI renovated a dining hall for patients and caregivers as well as a lodging area for volunteers at an interfaith Kinh 7 Charity Clinic in Kien Giang, completed eight clean water projects, and supported children at an orphanage in Vietnam. These humanitarian missions were only possible with the generosity of donors and supporters from charity and fundraising events in Maryland, Virginia, Georgia, California and Texas. Finally, ICI partnered with the University of Maryland Eastern Shore, health departments and other organizations to conduct local health fairs and implemented a tele-health education program on ICI YouTube channel. Please visit our website www.icius.org for our projects, reports, photos and videos of our collective team efforts over the past 5 years.

It has been and continues to be an honor and a privilege to have your support for humanitarian causes. Together, we accomplish a lot more and make life a little easier for many others who need help. It has been an incredible and rewarding journey with you by our sides who provide your wings of support. Please continue to fly with us into the next 5 years and beyond. Thank you.

With sincere appreciation,

A handwritten signature in black ink that reads "Hoai An Truong". The signature is written in a cursive style with a long horizontal stroke at the end.

The Kinh 7 Charity Clinic Team and Project

ICI has supported collaborative efforts of the Kinh 7 Charity Clinic, located in Kien Giang, Vietnam, to renovate its dining hall and lodging area as well as to provide training for clinic staff and strengthen sustainable community health education programs for the 25-year old charity clinic in 2015.

The project's goal was to rebuild the heavily deteriorated and collapsing kitchen facility being used by interfaith volunteer groups to provide free meals for 250 to 350 patients and caregivers daily. In addition, this project added a lower level extended stay rooms for the clinic volunteers and upper level guest rooms to accommodate short-term stay volunteer healthcare professionals, students and others who support the clinic's community health initiatives to serve the increasing needs and number of poor patients and caregivers in the Kinh 7 local and surrounding areas.

Medical Mission Trips to Vietnam

Inaugural Mission December 2017

ICI, in collaboration with University of Maryland Eastern Shore (UMES) School of Pharmacy and Health Professions, organized and conducted an **inaugural public health and medical mission** to the Kinh 7 Charity Clinic in Kien Giang, Vietnam from December 11 to 15, 2017. Please visit <https://icius.org/vietnam-medical-mission> for more information and a video.

WHAT WAS ACCOMPLISHED?

- ⇒ 44 clinic staff, including physicians, nurses, pharmacists, and allied health professionals were trained on stroke, chronic obstructive pulmonary disease, and smoking cessation, which are leading causes of death in Vietnam.
- ⇒ 561 community members were educated through lectures and hands-on activities to increase awareness and prevention of these diseases.
- ⇒ 1,320 patients received primary care services and medications for chronic diseases and medical conditions.

Medical Mission Trips to Vietnam

October 2018

The ICI team surveyed and received a project completion report for a **Clean Water Project**. This 4,000 liter-per-day filtration system installation provides purified water for drinking and improves standards of living for up to 10,000 people who are mostly Ede, Muong, and Kinh ethnic minorities in a rural community in the Buon Trap region of Dak Lak Province, Vietnam.

The team also conducted a **Vietnam Humanitarian and Medical Mission** in collaboration with its partner **Second Chance Aid (Ngon Nen Tinh Yeu)** organization to provide primary care and medications for about 1,000 patients in two rural and underserved communities in Kontum and Nam Dinh, Vietnam.

The ICI team provided training on diabetes with a focus on insulin therapy and blood glucose monitoring for over 40 clinic staff at the Kinh 7 Charity Clinic in Kien Giang, Vietnam. Additionally, the team worked with Kinh 7 Charity Clinic leaders to complete a needs assessment and plan for the ICI 2019 Public Health and Medical Mission.

Our team visited with “Mai Am Tinh Me” – an orphanage with 25 children – to assess their needs to support their daily living and education. As a result of the ask for support and this needs assessment, ICI facilitates supporters for \$1 to \$2 per day (\$365 to \$730 a year) per child to provide basic needs and education for these children. Please visit our website at <https://icius.org/mai-am-tinh-me-orphanage> for more information and sponsor a child. Thank you for your generosity and support for the orphanage.

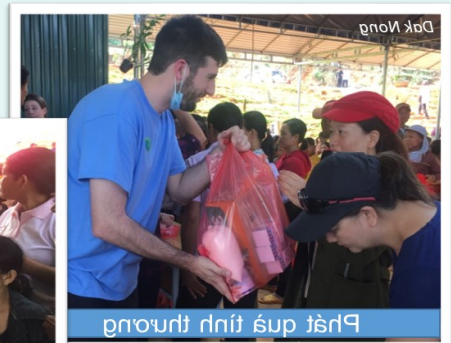

Medical Mission Trips to Vietnam

April 2019

WHAT WAS ACCOMPLISHED?

- ⇒ Provided primary care and medications for 986 patients and food for 800 people for the M'ông ethnic minority in a rural, underserved community in Bon Bulum, Dak Nong Province, Vietnam. View our mission video at: <https://www.youtube.com/watch?v=sDV6qCFnBrw&feature=youtu.be>
- ⇒ Trained over 40 clinic staff for sustainability and provided health education with a focus on diabetes for over 100 patients in the community. The team also provided primary care and medications for 1,024 patients at the K7 Charity Clinic in Kien Giang, Vietnam.
- ⇒ Visited Mai Am Tinh Me orphanage in Kien Giang, Vietnam and provided food and education support for orphanage children.

Mái Ấm Tình Mẹ Orphanage

ICI has been recruiting sponsors for orphans at Mái Ấm Tình Mẹ since 2019. For \$1 to \$2 a day, you can change the life of a child and help provide him/her with a bright future. One-hundred percent of a donor's donation will go to Mái Ấm Tình Mẹ Orphanage at Kinh 7, Kien Giang, Vietnam to provide food and education for these children. These orphans may die from preventable causes, drop out of school due to poverty, violence, exploitation, neglect, and/or vulnerability in crisis, and be taken advantage by gangs or similar groups. Please lend ICI a helping hand and provide these children the opportunity for a bright future. Let's work together to make sure these kids develop skills to succeed in school and in life! Visit <https://icius.org/mai-am-tinh-me-orphanage> to sponsor a child.

Clean Water Project

In many of the ethnic minority villages in Vietnam, villagers face extreme conditions all year round due to the lack of food and water. For generations, their only source of water has been from ravines and rock crevices, which are heavily polluted by deforestation, indiscriminate exploitation of land, and extremely toxic chemicals from fertilizers, drugs, insecticide, pesticides and herbicides. This water is a great harm to their health and is the culprit of the most prominent illnesses including gastrointestinal diseases, especially diarrhea. These diseases sometimes lead to lost lives. Disease is common, from birth to adult, due to polluted water. In fact, the high life-expectancy only reaches the age of 50.

As of December 2020, ICI has collaborated with our partners to provide 8 free purified water systems to over 41,000 villagers from many ethnic minorities at Dak Ha, Kontum (2020), Dak Neang, Kontum (2020), Dak Wet, Kontum (2020), Quang Truc, Dak Nong (2019), Dak N'drung (2019), Buon Trap (2018), Dak Ya (2016), and IA Tiem (2015) communities. Each water well and filtration system included: 5 years of maintenance and 4,000 liters of purified and safe drinking water daily, including humanitarian relief to the poorest village families. Hundreds of people also received basic sanitary living education from ICI's donors. For more information, please visit our website at <https://icius.org/clean-water-projects>

Since the beginning of the project, local vicars have enthusiastically stated that "The whole village no longer has a stomach ache!" In fact, the father rarely has to distribute gastrointestinal medicine anymore, as very few people need medications due to improved water conditions. Since the majority of people living in the villages have clean water for domestic use, diseases that people often contract from the use of polluted water have been reduced. Additionally, the majority of the villagers have changed their behaviors on health and personal hygiene as a result of the education provided.

The impact of this project is far-reaching and indispensable. It is also greatly rewarding, as the money donated to this water project saves the villagers at risk of disease. Not only has health improved, but labor and the economy has improved as well. The future and destiny of the people here are counting on us! Please visit our website at <https://icius.org/clean-water-projects>.

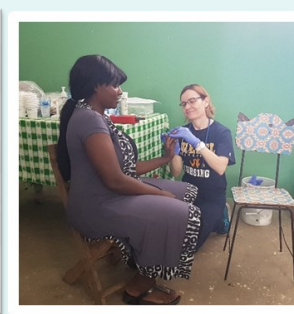

HANDICAPPED KIDS SUPPORT

The Khuyết Tật Tình Thương Mỹ Lâm School of Disabilities belongs to Caritas in Diocese of Long Xuyen, which was built in 1994. This is a charitable institution that teaches culture and careers to children with disabilities in Kien Giang Province and the surrounding region, creating favorable conditions that let them integrate with the social community. The school trains children to become cultural, ethical, and responsible people who are self-reliant.

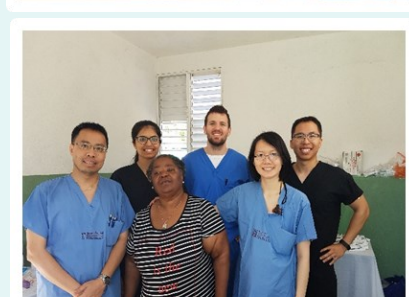

The above embroidery painting (tranh thêu) was made by deaf-mute, handicapped children at Khuyết Tật Tình Thương School in xã Mỹ Lâm, huyện Hòn Đất, Kiên Giang, Vietnam. If you have a chance to visit the school and meet those young people, they are engaging, enthusiastic and so proud to be doing what they do. For more information, please visit our website at: <https://icius.org/handicapped-kids-support>

Haiti Mission Work

May 29 - June 5, 2016: A team including ICI president who is also a pharmacy professor, and five pharmacy and physical therapy students at University of Maryland Eastern Shore (UMES), School of Pharmacy & Health Professions, and three non-healthcare volunteers joined a Haiti Medical Mission, organized by Dr. Frank Nice and Mrs. Pat Labuda who started Haiti missions over 20 years with Health and Education for Haiti (HEH) and St. Francis of Assisi Catholic Church (SFA). During the mission, the team conducted health needs assessments at a clinic, set up a pharmacy, provided health care and medications for children at an orphanage and a clinic. Upon returning, ICI organized an inaugural Haiti Mission Charity Banquet on October 8, 2016 and a second Haiti Mission Charity Banquet on September 22, 2017 in collaboration with HEH, SFA and UMES and raised over \$13,000 for a future mission to Haiti.

February 3-11, 2018: ICI president and another pharmacy faculty, physicians, nurses, and three UMES pharmacy students joined another Haiti Medical Mission, also organized by Mrs. Pat Labuda with HEH and SFA. The team provided primary care for 1,010 patients who had 1,307 medical conditions and dispensed 1,877 medications over 5 clinic days. For a Haiti reflection, visit: <https://icius.org/programs>

Puerto Rico Mission Work

WHAT WAS ACCOMPLISHED?

June 2, 2018: ICI, in collaboration with the University of Maryland Eastern Shore (UMES) School of Pharmacy and Health Professions, Maryland Pharmaceutical Society (MPhS), and Maryland Pharmacists Association (MPhA), organized a Puerto Rico Post-Hurricane Relief and Medical Mission Fundraising Banquet and raised about \$4,700 for a mission to Utuado, Puerto Rico. For more information, visit <https://icius.org/puerto-rico-banquet>

June 12–15, 2019: A team of physicians, nurses, pharmacists and two students led a post hurricane relief and medical mission to Utuado, Puerto Rico, a rural mountain region that was still recovering from Hurricane Maria. The team collaborated with a local clinic and healthcare professionals to conduct home visits and set up a pharmacy with medications.

THE FACTS

Tele-Health Education—For your health Awareness Campaign Talk Series

The International Community Initiatives (ICI), in collaboration with the Maryland Rural Health Association (MRHA) and the University of Maryland Eastern Shore (UMES) School of Pharmacy and Health Professions, launched an inaugural virtual health education program: “**Tele-Health Education – For your health Awareness Campaign Talk Series – THE FACTS Initiative 2020-2021**” with monthly webinars from September 2020 through August 2021.

Building on an academic-community partnership between ICI and UMES for global health service program, including public health and medical missions to Vietnam since 2017 to provide training for clinic staff, primary care for rural and underserved patients, and health education for the community, it has been an exciting initiative to collaborate with the MRHA to promote health and wellness for the public.

The **Mission of THE FACTS Initiative** is to promote healthy habits and raise health awareness through an interprofessional collaboration and telehealth delivery of health information for the community.

The goal is to provide accurate health information and resources based on selected **national health observances** to promote health and prevent disease.

Date	Episode Topic
Sept 22	Depression, Older Adults and COVID-19
Oct 17	Breast Cancer Awareness
Nov 4	Diabetes Awareness
Dec 17	Children’s Toy Safety
Tune in! Visit: https://icius.org/the-facts	

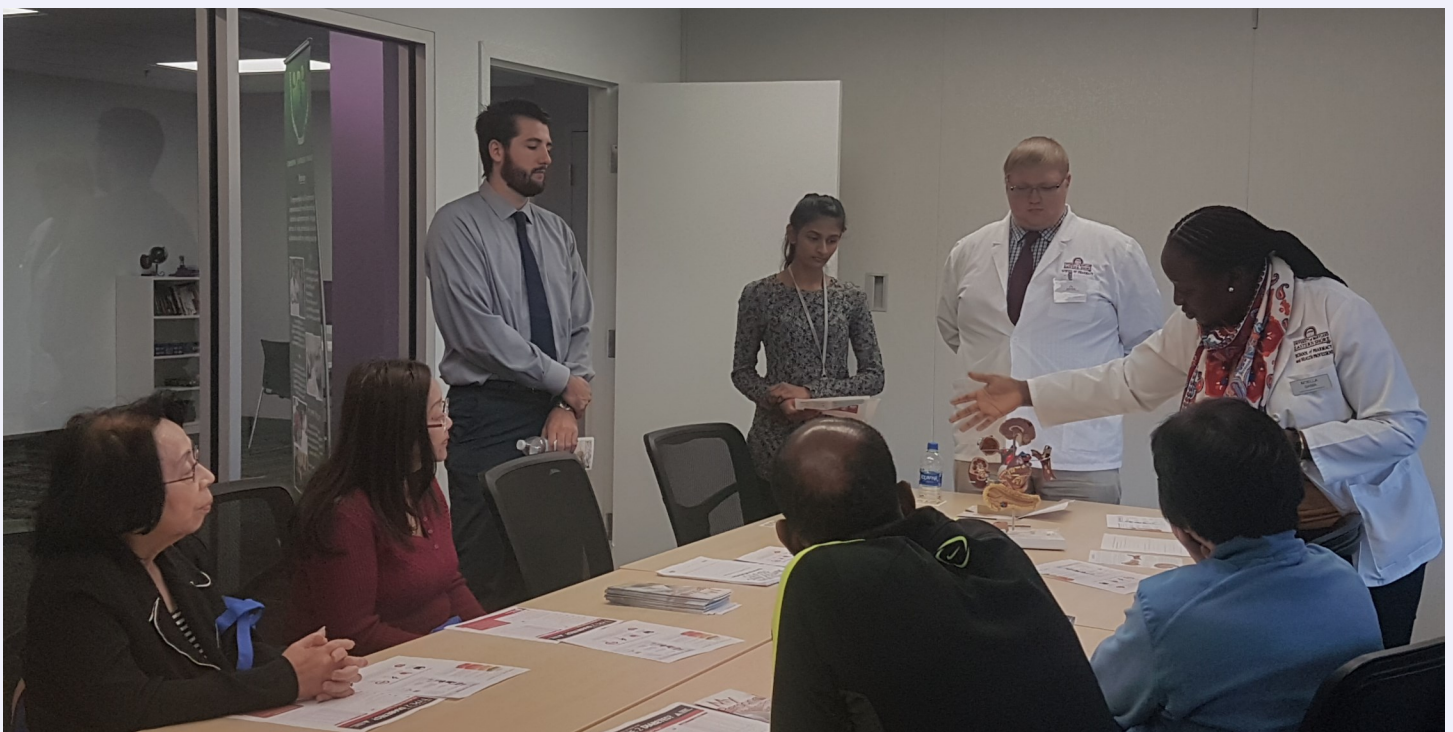

Monthly 30-minute telehealth education episodes are presented by nurses, pharmacists, physicians and other healthcare professionals for the public. There are opportunity to view the telehealth education program during the year on the ICI YouTube channel. Tune in!

Health Fairs

To serve the local community, ICI joined a ***Colorectal Cancer Awareness Event*** of the Health Resources and Services Administration and ***“Fall into Healthy Habits” Community Health Event*** with the Montgomery County Department of Health and Human Services and University of Maryland Eastern Shore (UMES) in 2019.

Thank You to Our Volunteers!
