**MemberJets, LLC Announces Shuttle Program Exclusively for Charter Brokers**  
*Placing the charter broker at the forefront of the shared economy*

(Overland Park, Kansas, Nov. 30, 2018) MemberJets, LLC, the first and only FREE B2B Aviation Marketplace that seamlessly solves the complexity of DOT Part 380 for Charter Brokers and Part 135 Operators announced today that it is collecting proposals from aircraft operators to support a shuttle operation between Palm Beach, Florida and Teterboro, New Jersey.

Company Founder and CEO, Ty Carter said, "We will host the inaugural schedule and make seats available for booking through our partner network of charter brokers and travel agencies. Our embrace of these powerhouses is what sets us apart from the pack. The resulting benefit for the traveler is that their broker now has the resources to create, sell and purchase seats on behalf of their clients while offering an array of new flight options and prices historically unobtainable through a charter broker. This marketplace was designed to empower the players within the charter industry to legally compete in today's evolving shared economy without any associated expense. It is truly a new frontier."

Newly appointed company President Louis Jennings said that flights will initially operate four days each week from early January until around Easter, 2019. "We are truly unique since brokers control the majority of the marketplace. Whether creating a shuttle, special event flight or just a shared flight, the majority of flights and seats will be created directly by our broker partners," Jennings said. "It is exciting to provide a turnkey solution that allows the charter brokerage community the ability to rapidly grow and compete in a marketplace that has gone to lengths to pass them by."

MemberJets, LLC is a DOT 14CFR Part 380 Indirect Air Carrier that provides the first and only platform enabling approved charter brokers and aircraft operators to actively engage in the sale and management of individual seats, publish routes and provide transparent pricing. Any charter flight can be operated through the MemberJets program. The booking engine is free to qualified parties, providing the ability to increase revenue and customer satisfaction with no up-front expense.
