

# TAILORED *Energy* OFFER

for our Care Home  
customers.

**We assist you  
in securing the  
best energy rates possible!**

*As a care home you will have very different energy requirements to most others organisations. Typically high users of Gas & Power, Fidelity Energy has a pedigree in finding the best provider for you to deal with.*

## *Personal to you*

### **What do we offer?**

- Market timing. Constant monitoring of the market allows us to forward buy energy at the low points in a constantly fluctuating market.
- Dedicated account managers will work with you to agree a smart meter roll out. Smart meters can help cut energy bills.
- Multiple suppliers. We contract with 14 major energy companies who all bring different skills and pricing.

Prices can vary by 28% between the highest and the lowest quote for each client. If you only check the price of one supplier, it's rare that their prices will be the lowest.

- Proactive contract management to ensure that you never fall on to high out of contract rates.

### **What we need from you:**

Copies of your most recent bills and a signed LOA that allows us to go to market on your behalf.

**Contact Steven Crocker to arrange a no commitment  
comparison of possible savings**
