

# Privacy Policy for Turkey Chase

Last updated: April 23, 2026

## The short version

Turkey Chase (“the App”) does not collect or keep any personal information about you. The App displays advertisements, but those ads are non-personalized — they are not based on who you are, what you do, or anywhere you have been online. Turkey Chase is suitable for all ages, including children under 13, and is designed to comply with the Children’s Online Privacy Protection Act (COPPA) and the EU General Data Protection Regulation (GDPR).

This Privacy Policy explains, in detail, what information the App does and does not handle, how advertising works, and the choices you have. By using the App, you agree to the practices described below.

## 1. We Do Not Collect or Keep Any Personal Information

Turkey Chase does not collect, transmit, store, or share any personal information about you. Specifically:

- There are no user accounts and no sign-in.
- There is no first-party analytics or telemetry.
- We do not collect your name, email address, phone number, address, payment information, contacts, photos, microphone input, camera input, or precise location.
- We operate no servers, databases, or back-end systems that store information about you. There is nothing about you for us to keep.

The only information the App saves is stored locally on your device and never leaves it:

- Your high score
- Your audio settings (music volume and sound-effect volume)

This local data is stored using your device’s standard secure local storage and is removed automatically if you uninstall the App.

## 2. Advertising (Non-Personalized Only)

Turkey Chase displays advertisements provided by a third-party advertising network in order to support continued development of the App. We have configured the advertising network to serve non-personalized ads only. This means:

- No personal information is collected for advertising. Ads are not chosen based on who you are.
- No advertising profile is built about you. We do not track you across other apps or websites, and we do not share any identifying information with advertisers.
- No behavioral targeting. Ads are not selected based on your interests, browsing history, app history, or in-game activity.

- No use of advertising IDs for tracking. The advertising network is configured to operate in a mode that does not use Apple’s IDFA or Google’s Advertising ID for personalized tracking.

To deliver and measure non-personalized ads, the advertising network may automatically receive limited technical information that is standard for any internet request — such as device type, operating system, language, approximate (coarse) location derived from IP address, and a non-persistent ad request identifier. This information is processed solely to serve the ad, prevent fraud, and count impressions, and is governed by the advertising network’s own privacy policy. We do not receive, store, or have access to this data.

On iOS, the App respects Apple’s App Tracking Transparency framework: we do not request permission to track you across apps and websites. On Android, you may reset or limit ad personalization at any time in your device’s Google settings.

### **3. Children’s Privacy — COPPA Compliant**

Turkey Chase is suitable for all ages, including children under 13, and is designed to comply with the Children’s Online Privacy Protection Act (COPPA) of the United States as well as the children’s provisions of the EU General Data Protection Regulation (GDPR) and the United Kingdom’s Age Appropriate Design Code.

- We do not knowingly collect any personal information from children — or from anyone, regardless of age.
- The advertising network is configured to treat all ad requests as child-directed, serving only non-personalized, age-appropriate ads.
- The App contains no in-app purchases, no chat features, no social-media integration, and no links that take a child outside the App without a clear parental-control prompt by the operating system.

Parents or guardians who have any questions about how the App treats children’s information may contact us at the address in Section 8.

### **4. Permissions the App Uses**

- Audio playback — to play in-game music and sound effects.
- Text-to-speech — the App uses your device’s built-in text-to-speech voice to play in-game character voices. No audio data is recorded, transmitted, or stored.
- Internet access — used solely to load non-personalized advertisements as described in Section 2.

The App does not request access to your camera, microphone, contacts, photos, precise location, or any other personal data.

### **5. Third-Party Services**

The only third-party service the App uses is the advertising network that serves non-personalized ads, as described in Section 2. The App does not integrate any other third-party SDKs, social-media trackers, or analytics providers.

## **6. Data Security**

Because we do not collect, transmit, or store any personal information, there is no personal data of yours that could be intercepted, leaked, or breached on our side. The small amount of local data the App saves on your device (high score and audio settings) is protected by your device's standard operating-system security.

## **7. Changes to This Policy**

If this Privacy Policy is updated in the future, the new version will be posted at the same URL with an updated "Last updated" date. Continued use of the App after a change constitutes acceptance of the revised policy.

## **8. Contact**

If you have any questions about this Privacy Policy, please contact:
