

Company Overview

PMP Construction is a Prime, Woman-Owned Small Business, General Contractor. The corporate offices are centrally located in Kansas City, KS, with a satellite office located in Nashville, TN. PMP Leases 25,000 SQ/FT of production and storage space, and possesses a full fleet of vehicles located in offices in Kansas. PMP Construction performs the renovation of existing structures.

Differentiators

- PMP Construction self-performs a significant portion of designing, building, manufacturing, and installing mechanical products.
- PMP has the internal operational structure, system capabilities, staffing, experience, and complete corporate capability necessary to support customers regardless of project size and location.
- PMP has a team of employee project managers, safety, quality assurance, distribution, technicians, and office personnel to begin work on any size project, providing estimating, scheduling, management, quality control, and safety services.
- PMP provides A&E services from the team's regionally acclaimed design partners.
- PMP Construction is a 'Safety First' proven leader in CM and product manufacturing; PMP will ensure customer requirements are safely performed and completed to the technical specifications, and the highest quality standards.
- PMP Construction is a recognized leader in supplier diversity and supply chain inclusion. PMP 'sets the bar' for small, diverse participation and inclusion; many industry-leading, extremely large construction firms cannot compete with the PMP Construction diversity development program for Women, and Small Disadvantaged Businesses.

Past Performance

PMP Construction successfully completed over 2,500 projects in 10 states for commercial, state, and Federal Agencies. PMP Construction routinely delivers projects on time and at the highest quality – without sacrificing safety. PMP reports a 4-year history of providing employees and subcontractors with the safest sites and conscientious safety leadership in the industry (zero OSHA recordable injuries). PMP innovates with design, material selection, and efficient construction practices that make it the fastest-growing, privately held, diverse construction company in public construction.

PMP Construction self-performs significant portions of nearly every project with the Team's internal production facility. The PMP team includes experienced, W-2 project managers, accountants, tradesmen, and estimators who prepare detailed cost and schedules

Core Competencies

- ✓ Design Build
- ✓ New Construction
- ✓ Renovations, Additions, Expansions
- ✓ DoD and USACE

Premier Mechanical Products

COMPANY OVERVIEW

PMP is in the business of manufacturing precision-machined low volume, and OEM orphaned parts and components to meet our customer's urgent mission needs, casualty repair requirements and DPAS Rated Orders. On average we can provide cost savings of 20 percent and 30 percent faster order fulfillment over other manufacturers and distributors.

CORE COMPETENCIES

- Additive Manufacturing
- 3D Milling
- Fabrication via 3D model
- CNC Machining
- Fabrication to specification

DIFFERENTIATORS

- Over 15 years of manufacturing experience
- 25,000 SQ/FT Production and Storage Facility
- In-House customized design, and manufacturing of thousands of varieties of Mechanical Insulation and Ancillary Products
- Mil-I-45208 Inspection system
- Navy Nuclear and Submarine Safe qualified products
- Incorporates a rigorous Total Quality Management system to ensure manufactured parts and components are affordable and meet our customer's strict tolerances and specifications
- Extensive knowledge of Military Specifications, including bar coding, labeling, marking, preservation and packaging
- PMP is a partner for the NSA threat intelligence collaboration - which protects critical Department of Defense information held on Defense Industrial Base (DIB) company systems.

Government Past Performance

PMP has successfully completed over 10,000 contracts in 15 states for Federal, State and commercial customers.

Products & Services on Back

Premier Mechanical Products

POC: Ashley Tumberger | Ashley@pmproduct.net | www.pmproduct.net | (913) 271-5002

Products & Services

- Marine Insulation Sheets & Lagging Urethane (MIL-PRF-24172)

Service Hi-Temp -100°F to 400°F

Temp -297°F to +300°F

- Calcium Silicate: Thermo 1200 (MIL-I-2781)

Temp: Up to 1200°F

- Rubber Insulation (EB 4013)

Temp: -297°F to 220°F

- Cellular Glass (Foamglass) (MIL-I-24244)

Service -450°F to 900°F +

- Phenolic Foam

Service -290°F to +250°F

- Extruded Polystyrene (Styro)

Service -297°F to +165°F

- Industrial Pipe, Valve & Fittings

- Miscellaneous Building Materials

Vapor & Weather Barrier Cladding

Saran, ASJ, FSK, Mylar, I30

Aluminum, Stainless Steel, PVC
