

**Key Features:**

- **User-Friendly Interface:** Features an intuitive design for simplified system administration and ease of use.
- **Scalable Architecture:** Designed to support large-scale deployments with capacity for over 7,500 readers.
- **Real-Time Monitoring & Alerts:** Instantly tracks and notifies of critical security events to maintain situational awareness.
- **Auto-discovery of Hardware:** Automatically identifies new controllers, streamlining system expansion and integration.
- **Role-Based Access Control:** Provides precise permissions management tailored to individual roles for optimal security.
- **Comprehensive Audit Trails:** Generates detailed logs to support compliance requirements and facilitate forensic analysis.
- **Multi-Factor Authentication:** Enhances security with multiple layers of user verification.

**Seamless Integrations:**

- **Wireless Lock Technologies include ASSA Abloy Aperio & Intelligent Wi-Fi:** Offers advanced door control capabilities for a more versatile access solution.
- **Milestone Video Integration:** Integrates seamlessly with video surveillance systems for enhanced security management.
- **Storage Locker Solution with Integrated Video Wall:** Centralizes control for more efficient facility management.
- **LDAP Integration:** Simplifies access control by managing Card Holder databases using existing LDAP data, ensuring consistency and efficiency.

**Convenient Access & Management:**

- **Mobile App:** Provides remote control and monitoring capabilities, available on Apple and Android devices.
- **Web-Based Interface:** Accessible from any standard web browser, eliminating the need for additional software installations.
- **Graphical Map Import:** Improves facility oversight with visual mapping for easy navigation and management.
- **Badge Designer:** Enables quick and professional creation of custom badge designs for seamless identification management.

**Control Hardware:**

- **Powerful ARM Processor Field Controller:** Delivers reliable and high-performance access control functionality.
- **PoE+ Capable:** Simplifies installation by eliminating the need for separate power supplies, enhancing power management.
- **Supports Two Hardwired Doors per Controller:** Manages access for two doors, complete with DPS, REX, Lock, and other controls.
- **Auxiliary Inputs & Outputs:** Additional inputs and outputs on each controller provide expanded system capabilities.
- **MDI-Owned & Manufactured Hardware:** Ensures superior quality and control over every system component, with dedicated support.
- **Upgradable Firmware:** Allows for seamless server-side updates, keeping the system current and secure.

**Proudly American:**

- **100% American-Owned:** A fully American company committed to delivering the highest quality.
- **100% American-Made Hardware:** All components are manufactured in the USA, ensuring stringent quality standards.
- **100% American-Developed Software:** Software solutions developed domestically to meet specific security needs.
- **Best-in-Class Support:** Unmatched support services dedicated to assisting with every aspect of your security solution.
- **Long Lifecycle with Continuous Updates and Support:** Designed to provide over a decade of dependable performance and updates.
- **Lifetime Warranty:** Backed by a lifetime warranty, underscoring our commitment to quality and reliability.

*iTRUST by MDI combines cutting-edge technology with American craftsmanship, offering an access control solution that is both innovative and dependable.*
