

ELECTRONIC POOL GATE

Dove Tree Has Updated Pool Gate Security

The 2020 pool season highlighted the need for improved gate management at our recreation facilities for safety and to facilitate homeowner's requests for extended use. To service these needs, a new electronic gate management system has been installed on the main pool gate. This system is now operational, and access will be given to homeowners and associates who are up to date on dues. This new system, by Open Path, works via a smart phone app or a physical key fob. To use the smart phone app the Dove Tree HOA needs a valid email address on file for each member. ***Smart Phone Access and 1 Physical Key Fob*** will be given to each homeowner and associate in good standing. Extra or replacement key fobs can be purchased from the HOA at \$10/each. Extended use hours will be published in a separate communication. See you at the Pool!
