Meet the Doctor

Dr. Atmar graduated with his doctoral degree in podiatric medicine in 2011 from New York College of Podiatric Medicine.

Continuing his education, Dr. Atmar was selected by New York Methodist Hospital to perform his surgical residency. Dr. Atmar received additional surgical training at St. John Episcopal Hospital in New York, where he served as a Chief Resident before starting his private practice.

Dr. Atmar is currently serving San Diego county with hospital affiliations at Paradise Valley Hospital in National City, and North Coast Surgery Center in Oceanside. His immense dedication to patient satisfaction is evident by the relationships cultivated with his patients, and the time spent educating and developing personalized treatment plans proven to restore healthy feet.

Dr. Atmar proudly provides mobile podiatry services throughout San Diego County.

Mobile Podiatry Services

In addition to providing individualized in-office podiatry services, Dr. Atmar also provides house-calls for patients who suffer from significant mobility issues or advanced illness. He delivers compassionate, quality care to you in the safety and comfort of your home, whether home is a private residence or an assisted living facility.

Our professional, licensed podiatrist will examine your feet and looks for circulation problems, neurological problems, orthopedic problems, abnormal skin conditions, and symptoms of systemic diseases, which often appear first in the feet. Dr. Atmar is a podiatric physician and surgeon specializing in the treatment of all aspects of foot and ankle disorders.

We accept most insurances including Medicare, most PPOs, and private insurances. Patients with an HMO or an insurance not covered will be billed at a nominal flat-rate fee for our services. Call our office for billing details.

Dr. Atmar also provides the following services:

- Diabetic foot care, including prevention of complications & amputations.
- Geriatric foot care, including trimming of toenails, corns and calluses.
- Treatment of ingrown toenails, toenail fungus, and abnormal skin conditions such as athlete's foot, warts, etc.
- Treatment of infection, including cellulitis.
- Wound care.
- Traumatic foot injuries.
- Treatment of foot pain, heel pain, ankle sprains, sports injuries, and fractures.
- Custom orthotics, braces, and diabetic shoes.
- Provide stability devices (canes, crutches, walkers, wheelchair).
- Prescribe medications, therapies and perform diagnostic procedures such as vascular testing.
- Mobile digital Xray.
- Referral network includes Medical Doctors, other professionals to provide full Home Nursing, Physical and Occupational Therapy Services, home Nursing Assistants services, home Non-Medical Service Assistant services, Fall Prevention Education, Muscle Strengthening, and Home Needs and Obstacle Assessment.
- Perform foot & ankle surgery, including cosmetic surgery for correction of bunions, hammertoes, and other podiatric conditions.
