Instant Prints vs Digital Prints

15 OCTOBER 2024

- Instant Prints -

An instant print is not just some photo you take home. There is value towards these photos as you can display them, frame them and stick them. It is a never ending memory that you cherish forever which symbolises the very special moment of joy and happiness you shared with your loved ones. This is essentially why we're here to facilitate physical prints so you can look back and reminisce about the nostalgic times celebrated with those around you. Such tangible memories are only permanent and can never be torn down.

- Digital Prints -

Digital prints can offer many benefits such as instant download onto your phone, quick SMS message sent to those you have taken the photos with and a galley full of valuable memories captured. Having digital prints allows you to endlessly scroll through a night full of valuable and funny images. Plus, within our digital software system we also accommodate images that can be taken in a GIF or boomerang to which it can be downloaded and shared onto your social media platforms. 😊
