Meet

MARGARITA KHOSH, MBA

The GO-TO Healthcare Policy Strategy Expert

- Global Healthcare Administration Certified -

In 2020 when COVID took her father, she made it her **mission** to **simplify** and **humanize** the healthcare system.

She propels the implementation of a **modern** healthcare experience that funnels to benefit all healthcare stakeholders by reducing cost, decreasing provider burnout, and contributing to a health system that works better for everyone.
BIO

Leveraging her over 20-year international healthcare operational experience in mental health, specialty care, and navigating insurance payor terminology, contracting, regulatory compliance, and Healthcare MBA, she launched <u>MK Medical Solutions, LLC</u> to shift the mindset of providers and health systems to understand that the patient is a consumer.

Her experience includes traveling to 3 continents to perform health policy analysis, starting a nonprofit pediatric special needs rehab, overlooking medical billing revenue cycle, managing contractual efforts for the largest specialty Managed Services Organization in the country, designing emergency management response, teaching 12,000 therapists, and more. The work gave her a profound insight into what clinicians want and need to do the work they love, how it impacts patients, and how to avoid <u>surprise medical bills</u>. She has also interviewed NYT Best Selling Authors such as Dr. Bessel van der Kolk, Lori Gotlieb, MFT & Deb Dana, LCSW.

TALKING POINTS

- <u>**Mental health licensing**</u>: How does it contribute to the mental health crisis?
- **Mental health in underserved communities:** Why they're underserved and how to reach them?
- <u>**Telehealth**</u>: How did policies <u>delay</u> tele-everything advancements, hindering our response to the **pandemic? What happens after** COVID?
- <u>**Vaccination distribution:**</u> How does it work and why is there a **disproportion?**
- <u>**Public Option**</u>: What is it & how will it **decrease** costs, lower premiums, and **save** money?
- <u>**International healthcare models:**</u> What can we learn from them?
