

CLS Drug and Fitting Policy

Please note, when you agree to the indemnification form that is required for entry, you are agreeing to have read and abide by the CLEVELAND LIVESTOCK SHOW General Rules and Regulations, including the following Drug & Fitting Policy.

All animals that are shown at the CLEVELAND LIVESTOCK SHOW shall be drug-free at the time the animals are checked in at the CLEVELAND LIVESTOCK SHOW grounds, and the animal shall remain drug-free during the time such animals are at the CLEVELAND LIVESTOCK SHOW ("show"). Further, no animal may be shown at the CLEVELAND LIVESTOCK SHOW that has ever, during its life, been administered any quantity of an unapproved drug. The purpose of this Policy is to protect the food chain and to ensure fair competition among exhibitors. As used in this Policy, the term "drug" shall mean any drug, chemical, medication, or feed additive.

The details of the Policy are set forth below:

A. Exhibitor's Responsibility for Any Drug Use

The use by non-veterinarians of animal drugs, or other substances, in any manner other than in accordance with the labeling approved by the FDA is a violation of federal law. Exhibitor, or exhibitor's parent and/or guardian, agree that:

1. They are, absolutely, the person/persons responsible for the care and custody of the exhibitor's animal.
2. As a condition for participation in the Show, the exhibitor, and exhibitor's parent and/or guardian agree to submit his/her animal to any drug test required by the CLEVELAND LIVESTOCK SHOW. Animals not tested IMMEDIATELY following the conclusion of the show will be disqualified from the Auction and/or Freezer Sale and shall forfeit any/all awards given. The CLEVELAND LIVESTOCK SHOW shall be entitled to disqualify any exhibitor whose animal tests positive for any drug – even if the exhibitor and the exhibitor's parents and/or guardian are innocent of any wrongdoing and did not administer the drug and even if the source of the drug is unknown.
3. The drug test results of the testing laboratory used by CLEVELAND LIVESTOCK SHOW shall be final and binding and without recourse by the exhibitor against the CLEVELAND LIVESTOCK SHOW, or its Directors, Officers, Managers, Representatives, Agents, or Employees.

B. Exhibitor/Animal Disqualification for Drug Use or Unethical Fitting

1. Unapproved Drug Use

An exhibitor is prohibited from showing an animal that has at any time in its life, been administered any quantity of any unapproved drug, chemical, or medication. Such drugs include but are not limited to, any diuretic, unapproved growth stimulator, or other unapproved medication. Unapproved means not approved by the FDA and/or USDA for slaughter animals including animals that may be destined for human consumption. All animals shown at the CLEVELAND LIVESTOCK SHOW will be subject to random drug testing as detailed below.

2. FDA/USDA Approved Drug Use

All animals that are shown at the CLEVELAND LIVESTOCK SHOW shall be drug-free at the time the animals are checked in at the CLEVELAND LIVESTOCK SHOW grounds ("Grounds"). If prior to check-in, an animal has been administered a drug that is FDA and/or

CLS Drug and Fitting Policy

USDA-approved for that species, sufficient time must have passed, so that the animal does not test positive for that drug at check-in at the Grounds. As stated plainly, all animals must be free and clear of all drug and chemical residues at the time the animals are checked in at the Grounds. All animals shown at the CLEVELAND LIVESTOCK SHOW will be subject to random drug testing as detailed below. Please note that elimination time is generally longer than the labeled withdrawal time for most approved drugs. Under this Policy, a drug that is not approved by the FDA and/or USDA for the specific species to which that drug is administered is an unapproved drug. Also, if an approved drug is administered by a route, in a dosage, or for a condition that is not approved by the FDA and/or USDA, that drug, as so misused, is an unapproved drug.

3. Unethical Fitting

Unethical fitting means any attempt to alter the natural appearance, conformation, musculature, or weight, of an animal by any unnatural means. Unethical fitting includes but is not limited to, the use of injections, or feeding of any substance not conducive to the health of the animal, or that is detrimental to the safety, or the marketability, of its carcass. Unethical fitting also includes but is not limited to, artificially filling animals by stomach pumping, injecting the animal with air, bruising, or feeding the animal beer, or other alcoholic beverages. Animals unethically fitted, or showing signs of unethical fitting will be disqualified.

C. Drug Testing of Animals

1. Cleveland Livestock Show reserves the right to drug test any animal on the grounds.

2. Random Drug Testing

The Grand Champion and Reserve Champion will be drug tested immediately following the conclusion of each show. Cleveland Livestock Show reserves the right to drug test any random animal from any division immediately following the conclusion of the show.

3. Drug Testing After Show

When an animal is initially drug tested, the test sample will be split into two samples; such that, if the animal tests positive on the initial drug test, the remainder of the split sample will be available for a confirming drug test ("Confirming Test"). An Exhibitor whose animal tests positive on the initial drug test can request a Confirming Test, provided however, that the Confirming Test will be conducted at the Exhibitor's expense and a laboratory chosen by the CLEVELAND LIVESTOCK SHOW. The Exhibitor requesting such a Confirming Test must pay the CLEVELAND LIVESTOCK SHOW for the full cost of such Confirming Test before the CLEVELAND LIVESTOCK SHOW submits the sample to the laboratory.

D. Penalties for Drug Use or Unethical Fitting of Animals

1. Unapproved Drug

Unapproved drugs are prohibited. Unapproved means not approved by the Food and Drug Administration (FDA) and/or the United States Department of Agriculture (USDA) for slaughter animals that may be destined for human consumption. This includes the use of all products that are not FDA-approved including but not limited to any diuretic, unapproved growth stimulant, or other unapproved medication meant for human usage. Any exhibitor whose animal tests positive for any unapproved drug will be disqualified and shall forfeit all sale proceeds. The disqualification of an exhibitor will not alter the placing of the class of animals or the sale order. Further, the disqualified exhibitor and the immediate family

CLS Drug and Fitting Policy

members of the disqualified exhibitor, residing at the same premises, will be banned for 1 year for the 1st violation and shall forfeit all sale proceeds. Should there be a 2nd violation they will not be allowed back to CLEVELAND LIVESTOCK SHOW to show and shall forfeit all sale proceeds.

2. Approved Drug

If an animal has been administered a drug that is FDA-approved for its species, sufficient time must have passed so that the animal does not test positive for that drug upon arrival at the CLEVELAND LIVESTOCK SHOW. Animals must remain free and clear of all drug and chemical residues while on show grounds. Please note that elimination time (the time it takes for no drug residue to be found in the system) is generally longer than the labeled withdrawal time for most approved drugs. Any exhibitor whose animal tests positive for any approved drug will be disqualified and shall forfeit all sale proceeds. The disqualification of an exhibitor will not alter the placement of the class of animals or the sale order. Further, the Board shall have the discretion as to whether, or not, to forfeit the privilege of the disqualified exhibitor, and the immediate family members of the disqualified exhibitor, residing at the same premises, will be banned for 1 year for the 1st violation and shall forfeit all sale proceeds. Should there be a 2nd violation they will not be allowed back to CLEVELAND LIVESTOCK SHOW to show and shall forfeit all sale proceeds.

- Zero Tolerance is based on the elimination period, rather than the withdrawal period. There is a difference between the withdrawal and elimination period. The withdrawal period is the amount of time that must pass for consumed products to safely enter the food chain. The elimination period refers to the amount of time it takes for all residue to be eliminated from an animal's system. For most drugs, the elimination period is longer than the withdrawal period.
- Another important point to remember is that products labeled "all-natural" that are not FDA-approved may contain ingredients that can result in a positive test. It is your responsibility to know what ingredients are included in products labeled as "all-natural".

What are the common types of drugs that I may be penalized for?

- *Antibacterial Therapeutic Medications* – Used to treat infection, these compounds don't create a competitive advantage but can create food safety concerns if not used according to label directions. Many are only FDA-approved for particular species, meaning that extensive research has been conducted regarding the proper dosage and type of administration to be efficacious in that species as well as the withdrawal time that is necessary for meat products to be safe for human consumption.
- *Non-Antibiotic Therapeutic Medications* – Inclusive of anti-inflammatories, antipyretics, diuretics, and anesthetics, these medications can result in a competitive advantage by altering the physical appearance of the animal and/or concerns with food safety. Some are available over the counter and others can only be legally sourced and administered through prescription by a licensed veterinarian. Many are only FDA-approved for a particular species and use in any other species without a prescription by a veterinarian is illegal.
- *Beta-agonists* – These may cause food safety and animal welfare concerns if used in an unapproved species or not used according to the label. They also may create an unfair competitive advantage.

CLS Drug and Fitting Policy

Please note any exceptions to the use of beta-agonists below:

Zilpaterol Hydrochloride (Zilmax®) THE CLEVELAND LIVESTOCK SHOW WILL NOT TOLERATE THE PRESENCE OF ZILPATEROL HYDROCHLORIDE (Zilmax®) IN THE URINE OF MARKET STEERS. Further, the Show will not tolerate the presence of Zilmax® in any other market species or breeding animal.

Ractopamine Hydrochloride (Optaflexx™, Paylean®, Topmax™) The CLEVELAND LIVESTOCK SHOW will not be testing for the presence of ractopamine hydrochloride in steers (Optaflexx™), market swine (Paylean®). Exhibitors who choose to use these products are expected to follow all label directions. The CLEVELAND LIVESTOCK SHOW will not tolerate the presence of ractopamine hydrochloride in species, or classes within species, for which they are not FDA-approved including Market Lambs, Market Goats, Commercial Heifers, Market Broilers, and Market Rabbits.

3. Unethical Fitting of Animals

Any exhibitor found to have unethically fitted an animal shall forfeit all sale proceeds. The disqualification of an exhibitor will not alter the placing of the class of animals or the sale order. Further, the Board shall have the discretion as to whether, or not, to forfeit the privilege of the disqualified exhibitor, and the immediate family members of the disqualified exhibitor residing at the same premises will be banned for 1 year for the 1st violation and shall forfeit all sale proceeds. Should there be a 2nd violation they will not be allowed back to CLEVELAND LIVESTOCK SHOW to show and shall forfeit all sale proceeds.

4. Any exhibitor who fails to comply with the CLEVELAND LIVESTOCK SHOW Drug Policy will not be allowed to apply for any CLEVELAND LIVESTOCK SHOW Scholarship.

5. Emergency Treatment of CLEVELAND LIVESTOCK SHOW Grounds

What are the best practices for a show animal that falls sick, ill, or injured leading up to the Show?

If an animal requires emergency treatment while on the grounds, the exhibitor shall notify the Livestock Vice President prior to the treatment of the animal, and the Livestock Vice President shall witness such emergency treatment of the animal. Only licensed veterinarians will be allowed to administer any drug, chemical, or feed additive to the animal. If the drug, chemical, or feed additive is administered by the veterinarian prior to the time the animal is shown and judged at the Show, the animal will be disqualified. If the drug, chemical, or feed additive is administered by the veterinarian after the time the animal has been shown and judged in the Show, the animal will not be disqualified, but the animal must be withheld from slaughter for the full elimination time of any such drug, chemical, or feed additive administered to the animal, so that, the animal is drug and chemical free at the time of its slaughter.

- **Consult with your veterinarian.** First and foremost, consult your veterinarian. Do not administer any medications before visiting your veterinarian. As a part of this conversation, make certain that both you and the veterinarian are aware of the show rules. Carefully consider the amount of time prior to arrival at the show and assume that the elimination period is longer than the labeled withdrawal period. From there, you, your family, your supervising CEA/AST, and your veterinarian should discuss options before making the best decision.

CLS Drug and Fitting Policy

- **Make an informed and the best decision possible.** The utmost priority should be the animal's welfare. The welfare of the animal should always take priority over competition. This could result in leaving the animal project at home.
- **Document all treatment records.** If the animal is treated with an approved drug and withdrawal times are observed, maintain an official record of treatment from the veterinarian, including the date of administration and dosage.

E. No Exceptions May Be Granted to This Policy

No Director, Officer, Manager, Livestock Committee Chairman, or any other agent or representative of the CLEVELAND LIVESTOCK SHOW, has the authority to grant an exception to this policy. Such persons, therefore, cannot grant an exception of any kind to this Policy, and no alleged exception – even if granted by such person – will be binding upon, or honored by the CLEVELAND LIVESTOCK SHOW, and any such alleged exception will not, in any manner, effect, or excuse, or prevent, the enforcement of this Policy.

Further, no letter of explanation, note, or excuse, from a veterinarian or a vocational agriculture teacher to an exhibitor, or the CLEVELAND LIVESTOCK SHOW, as to the administering of any drug, chemical, medication, or feed additive to an animal, shall grant an exception to this Drug Policy. No such letter of explanation, note, or excuse from any such person will be honored by the CLEVELAND LIVESTOCK SHOW, and any such alleged exception will not, in any manner, affect, or excuse, or prevent, the enforcement of this Policy.

F. The Administration and Enforcement of This Policy

The General Livestock Directors shall implement and administer this, Policy; provided, however, the final decisions as to the interpretation of this Policy, and final decisions as to the resolution of any dispute, or question, with respect to this Policy, including, but not limited to, the disqualification of an exhibitor and an animal, rests solely and exclusively with the Board of the CLEVELAND LIVESTOCK SHOW. The Board's decisions as to this Policy and its enforcement, including the disqualification of an exhibitor, shall be final.
