

Cable Control Dampers

w Gasketed Damper, Outside Air Actuator & 42" Cable

Specifications: Our "Cable Damper Systems" are designed to be used when a motorized system is not practical. The flexible cable and wire can be routed around electrical conduit, piping and other obstructions, without fear of binding or catching. Our Rotary-to-linear (rack & pinion) mechanical actuator assembly securely holds the damper in position for precise dependable settings. Cables can be connected together if a greater length is required.

Size: of Tube/Sleeve 4"-24"

Length of Cable: 42"

Thickness: 24 gauge

Material: Galvanized Steel

Temperature for Continued Usage: -40 to 158 °F

Temperature for Intermittent Use: Up to 220 °F

Gasketed Damper: UL Approved Urethane gasket sandwiched between two galvanized steel blades

Air Leakage: 10 CFM @ 1" SP

Manufactured in the USA

Part Number: AZRD-CCD-XX
