In each of the rodeo events, if there is a tie between two or more contestants or a split of two or more places, then the points will be added together and divided equally among the number of contestants in a tie or split.

For example: two contestants tie for first place in an event, points awarded for first and second place are added together then divided between two contestants.

First Place – 23 points

Second Place - 19 points

Total of 42 points ÷ 2 = 21 points per contestant
