

BEEFO BINGO

Teacher Instructions

What You Need:

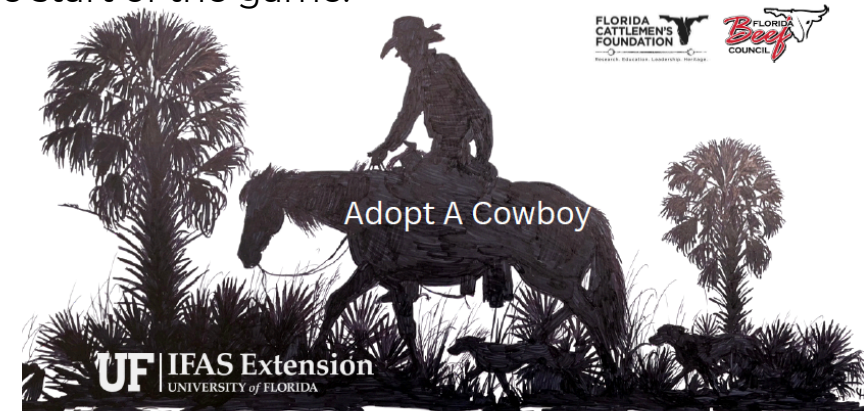

- One printed bingo card for each student (included in this packet).
- One printed “Hat Pull” card (included in this packet), cut into individual squares.
- A container such as a bowl, bag, or hat.
- Place markers for students (suggested: mini marshmallows, beans, pennies, highlighters, or buttons).

How to Play

- Distribute one bingo card and a set of markers to each student.
 - Explain that each square shows a beef by-product. The goal is to mark five squares in a row horizontally, vertically, or diagonally.
 - Draw one square at a time from the “Hat Pull” container and announce the item.
 - Students place a marker on the matching square if they have it.
- hint: The center square is a free space and should be marked at the start of the game.
- The first student to complete five in a row calls out “Bingo!”
 - Check the winning card against the drawn pieces to confirm.
 - Continue the game for additional winners if desired.
- 
- A detailed illustration of a palm tree with many fronds, positioned in the bottom right corner of the slide.

Tips

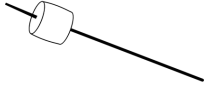

Print bingo cards and the hat pull card on cardstock for durability. Laminating the hat pull pieces allows for reuse year after year. Store hat pull pieces in a small container or bag for easy access.

Print this page on cardstock. Cut out each piece to use as the “hat pull” pieces.
