

Native Land Digital

is empowering the public to engage with an interactive world map that more closely reflects the true historical narrative of land worldwide.

This Thanksgiving, we encourage you to spend time discussing this map with your family. We've included suggested questions below.

- What are your first impressions of this map?
- How is it similar and different than the map we usually see?
- Which area do we live in, and which groups lived here first?

Distributed by Creekside's DEI committee
