Hewlett-Packard   IBM   WorkWise Software

## Voice Over Testimonials

“Looking to make a statement for our latest WEB Video, we decided we needed a narrator who not only could command attention, but could keep our prospects tuned into our message. For this we decided that we would hire a narrator, and reviewed several different possibilities. We decided on Carl because we thought that he could not only understand what we were doing, but he could convey a tone to the audience that would keep them hooked.

Now that the project is complete and the video has been on-line, we are thrilled with the results. Carl Wysocki exceeded our expectations. Our video narration flows perfectly and he conveys a professional but never “stuffy” tone to his narration. In fact, we have been asked by several companies for Carl’s information.

Lets face it, selling ERP software is not exactly the most exciting

topic for someone to tune into. However, with Carl on our team, I know that our video's are only going to keep getting better. We look forward to using him for years to come.

Jon Zimmerman
