Buffalo's Premiere Security Provider

Smarter Security Starts With
LinkLogix.io

Why are the solutions we provide better than a standard security camera installation? **Because they're smart.**

Our solutions perform better because they work together, and they keep your business safer than a typical security camera array.

Visualize Trends
Increased visibility into the activity trends your business naturally follows means you can make smarter decisions around staff, schedules, energy use, and more.

Spotlight Activity
Pinpoint suspicious activity such as unexpected entry after hours, or doors propped open that could cause energy waste or safety concerns. In addition, keep a historic timestamp of which users disarmed the system, which people were coming and going, and where and when they were at all times.

Simple Interface
You don't need an IT team to help you understand your smart business. Choose from single or multi-site reporting, and customize your report schedule to view data analysis daily, weekly or monthly.

SECURITY CAMERAS
Our Video Monitoring solution includes an extensive camera lineup, cloud viewing, and secure stored video access — easy-to-use, state-of-the-art surveillance.

ALARM SYSTEMS
Alarms are smarter than ever, and our partner Alarm.com continually improves and enhances the customer experience for easy, intuitive control.

ACCESS CONTROL
Monitor comings and goings from anywhere, on any device. Easy-to-scale systems provide maximum security, real-time updates, and seamless integration.

INTERCOMS AND MORE
We offer everything you expect with best-in-class security, plus smart automation features and technology that makes your business work smarter.
