Case Study

Design & Architecture Firm Simplifies
Mobility Management and Achieves
Substantial Monthly Savings

Carbon-Neutral Gas Energy Provider **Cuts**
Overspending on Zero-Usage Lines with
Automated Plan Transfers

The Challenge

Lack of Visibility and Overspending on Mobile Resources

This firm faced ongoing challenges managing mobility expenses across hundreds of devices and multiple carriers. Without centralized visibility, the IT and operations teams struggled to track usage, identify cost inefficiencies, or manage carrier contracts effectively. Monthly bills were complex and time-consuming to audit, with inconsistent reporting structures and unpredictable overage charges. Despite using unlimited plans, the company continued to see rising wireless expenses and lacked actionable data to address them.

The Solution

Automation and Centralized Mobility Management

GoExceed's Solve(X) platform transformed mobility management by automating manual processes and providing centralized visibility across all devices. The AI-powered system analyzed usage patterns and delivered data-driven recommendations to optimize domestic and international rate plans while identifying inactive lines for potential suspension. Through backend integration, audit tools, and real-time data optimization, the firm reduced redundant carrier tasks and improved cost transparency.

Within months, Solve(X) uncovered thousands in previously overlooked domestic and international savings and significantly reduced IT's administrative workload—creating a sustainable, data-informed foundation for ongoing mobility optimization.

The Result

Measured Savings and Improved Operational Efficiency

Within the first few months of implementation, the client achieved measurable financial and operational gains through Solve(X)'s automation and visibility tools. The solution generated an average of \$3,000 in monthly savings, totaling \$15,572 since January 2025 plus savings from reduced administrative workload.

Solve(X)'s optimization capabilities delivered \$11,389 in domestic savings, supported by additional audit, tax, and international cost reductions. In addition to financial improvements, centralized visibility simplified reporting, reduced manual carrier tasks, and allowed the IT team to manage mobility more effectively.

About GoExceed

GoExceed, founded in 2001 in Elmhurst, Illinois, is a market leader in data management automation software, with a focus on mobility solutions. Our clients achieve significant cost savings, ranging from 20% to 40% annually, by employing our cutting-edge, AI-powered solution, Solve(X), and without changing carriers and contracts. But our value proposition goes beyond simple cost savings, as we also help clients automate their IT processes and fully leverage their existing enterprise software.

About TeamKC Telecom

TeamKC Telecom brings over 20 years of telecommunications and information technology experience to deliver custom solutions for your business. We leverage our diverse portfolio of relationships to meet your needs and ensure you have the most cost-effective infrastructure to take your business to the next level. Partnering with us affords you time to focus on managing your network and drive your business objectives.
