Minimize Downtime with Technical Support in Your Pocket

The Viper Pocket Training guide is an interactive tool that helps technicians expedite solutions that keep customers up and running.

At Cornelius, we understand how crucial technical support is throughout the equipment life cycle and to the overall success of owner-operators. Our industry-leading 99.75% defect-free out of the box rate ensures that you can trust the quality and attention we put into every one of our Viper frozen beverage dispensers.

We know that downtime on equipment can be costly, and we are constantly striving for ways to keep customers up and running more often. As a result of this, we are excited to introduce our new Viper Pocket Training guide! Link goes to Viper guide:

This interactive, easy-to-use pocket guide gives technicians step-by-step instructions on when and how to address all the common questions related to servicing Viper equipment. Minimize service call times while expediting installation and service times.
