

ESSENCE

fierce, fun and fabulous!

Earth Day (April 22nd) is an annual reminder that we should be living in a sustainable fashion. Here are three ladies — Monique Péan, Robin Wilson and Korto Momolu — who design to keep us in a constant green state of mind.

Eco-friendly designer Robin Wilson, CEO of Robin Wilson Home, has built a lifestyle brand focused on healthy living.

Wilson does it all, from designing interiors that promote the health and wellness of indoor air quality to 100% cotton robes and kitchen cabinetry. “My grandmother worked in the kitchen during the era of *The Help*, now my name is *on* the kitchen in the era of eco-friendly design,” Wilson tells ESSENCE.com.
