

**EVOLVE Cloud Services in partnership with Amazon Web Services can now offer an AWS fully funded Optimization & Licensing Assessment to help customers optimize their Microsoft licensing costs, mitigate audit compliance risk, lower existing AWS costs as well as understand total costs for moving new workloads to AWS**

## The Process

- An independent assessment from a software audit advisory expert without any software publisher bias or oversight
- Deployment of industry leading tool to collect baseline data & performance measurements for the duration of the engagement
- Review of existing Enterprise Agreement and other Microsoft Licensing Agreements to reduce costs & provide a detailed review of how recent Microsoft licensing use right changes can impact existing and future workloads
- Understand your Licensing Position for both your existing AWS & on-premises environments

## The Value

- Avoid the license compliance traps that recent Microsoft licensing rule changes can cause
- A detailed roadmap for how you can & can't use existing volume licenses in AWS
- Understanding the Pros/Cons & costs of bringing existing Microsoft volume licenses versus using AWS License Included
- Microsoft Windows & SQL Server licensing cost optimization recommendations
- Great for preparing for Enterprise Agreement true ups, renewals or to just get a no cost, no risk assessment of your Microsoft licensing position
- AWS instance sizing, pricing and application dependency details for moving on-premises workloads to AWS

For additional information on how you can receive a fully funded Optimization & Licensing Assessment through AWS & EVOLVE Cloud Services, contact:
