Who is MPS?

We are a Security and Firearms training company owned and operated by former law enforcement officers and security professionals, certified and credentialed by the State of Texas. We provide ACTIVE SHOOTER training as well as firearms training to security details at churches and synagogues.

WHAT DO WE DO?

We provide ACTIVE SHOOTER training by offering the following :

- ◇ We conduct a comprehensive study of your place of worship in an effort to identify the building's weaknesses and strengths from a security point of view, and make suggestions to improve its security.
- ◇ We train your church staff and your designated security detail with the latest ACTIVE SHOOTER EMERGENCY OPERATION PLAN recently developed by the FBI to assist places of worship to develop a plan of action during an emergency.
- ◇ We develop a very specific on going firearms training program for your security detail in an effort to identify any deficiencies and how to improve them. This training also includes firearms marksmanship and training scenarios.

WHERE DO WE

TRAIN? MPS provides

all the training at your place of worship. The firearms training, however, is provided at Extreme Tactics & Training Solutions (ETTS) in Waxahatchee, Texas. Our training bay provides enough room for several shooters to train at the same time while conducting a number of scenarios.

WHEN? Contact us to discuss a unique customized plan of action tailored to your facilities. We will work around your schedule.

WHY? Because unfortunately times have changed, and places of worship are typically vulnerable.
