

Established in 2024, SRG is an engineering firm dedicated to providing quality geotechnical and material testing services. Styron Reyes provides senior level attention and the flexible, timely response only a nimble firm can deliver.

SRG has experience working in public and private sectors such as: Municipal, School Districts (K-12), Higher Education, County & State Projects, Energy Projects, Industrial Facilities, Retail, Office Spaces, Multi-use Projects.

We are committed to being the best servants to each other, our clients, and our community.

John P. Styron
PE LEED AP,
President

Robert Reyes
CEO

Michael Pompa
Project Manager

With over 100 years of combined experience, our team brings deep expertise in geotechnical engineering, materials testing, project management, construction, and consulting. We have successfully coordinated and executed projects across the State of Texas and beyond, delivering reliable solutions and trusted results.
