

## Basement Flooding Protection Subsidy Program

### A. Pre-Qualification

Homeowner's Name

Homeowner's Address

Address where work is being performed:

Telephone # (Home)

Telephone # (Work)

E-Mail Address

### NEW: 'FAST-TRACK' OPTION

The City is now offering applicants the option to 'fast-track' their subsidy applications. The Fast-Track option still requires an application to be submitted prior to beginning the work, however, the applicant will not have to wait for the Courtesy Inspection to be performed before having a plumbing contractor perform the work. **However, due to the fact that a final determination of eligibility of the work performed does not occur until after the City of Windsor Building Inspector has performed the final inspection on the Building/Plumbing Permit, there is some risk to the property owner that they may not be entitled to receive a subsidy payment.**

Prior to doing the work, the plumbing contractor is required to perform a pre-conditions assessment.

Would you like the FAST-TRACK ☐ Yes ☐ No  
option?

## B. Proposed Eligible Works:

Maximum Eligible Subsidy Limit is \$2,800 Per Home/Unit

If known, please indicate what work you are applying for under the program.

- ☐ A) Install Backwater Valve(s) (Licensed plumber required)  
100% of cost, (\$1,000 maximum)
- ☐ B) Install sump pump with sump pump overflow and disconnect foundation drains to floor drains  
100% of cost, (\$1,750 maximum)
- ☐ C) Install only sump pump overflow to discharge outside to surface (applies to existing sump pumps only)  
100% of cost, (\$300 maximum)
- ☐ D) Install backwater valve and sump pump with sump pump overflow  
100% of cost, (\$2,800 maximum)
- ☐ E) Disconnect foundation drains from floor drain and/or dye testing and camera work as required.  
100% of cost, (\$400 maximum)
- ☐ F) Downspouts (eaves troughs) require disconnection (Complimentary City Service)
