

TLA CURRICULUM

OUR STUDENTS PATH TO
SUCCESS STARTS NOW

With a combination of our **Structured class time** (needed when its time to enter school and real world situations) and **self initiated learning thru play** (important to develop self awareness, decision making skills and self discipline).

ARTS AND CRAFTS

We allow young ones to express their individuality and creativity thru art with a variety of colorful material such as crayons, markers, construction paper, glitter, paint, glue and a variety of crafting ideas for all ages.

READING CORNER

"Oh' the Places You'll Go!
We will venture off into the world of adventure and make believe thru reading and comprehension of a variety of reading material, puppets and recordings. The learning never ends.

Creative Curriculum

Once a child is ready and able to concentrate, we use Basic worksheets to develop drawing, writing, spelling and counting skills necessary for success upon graduation.

MATH AND MANIPULATIVES

Blocks, Connectors and Puzzles are an example of manipulatives used to teach young ones shapes, sizes, colors and numbers thru fun play.

DRAMATIC PLAY

Children roll play, cook, clean and pretend to be their favorite super hero, all while learning to share, communicate and get along with friends. Using material such as play foods, dress up clothes and pretend broom and mops.
Learning thru Play.

MUSIC AND MOVEMENT

Dancing, moving and grooving combined with outdoor play time on our safe, age appropriate play space encourages healthy habits that will help keep our body in shape, our brains alert and an overall health experience
