Hand Sanitizer In Stock

ISO 13485

Liquid, FDA-compliant alcohol hand sanitizer produced by a proven partner in the biochemical industry for the past 30 years.

Is Your Hand Sanitizer Safe?

The FDA issued new guidelines¹ for ethyl-alcohol hand sanitizer in April. Our product meets the FDA guidelines to ensure products free of dangerous carcinogens. The highest quality of raw materials is sourced and tested in-house upon arrival at our partner's facility to ensure the final product you receive is one you can trust.

Performance

Liquid sanitizer provides benefits when compared to gel formulations. A study performed in 2017 showed that drying time was reported faster for liquid formulations than gel. This is especially relevant in clinical environments when gloves are being applied immediately after hand sanitizer.

Scholastic Barrier Series

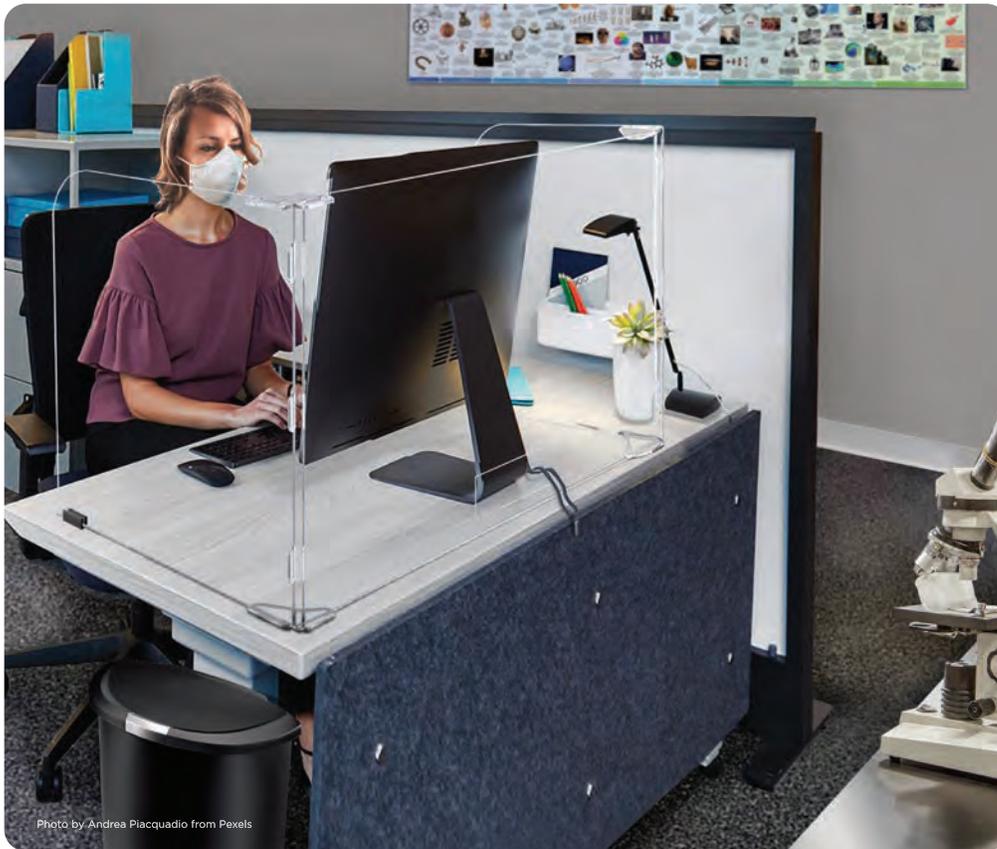

CDC RECOMMENDATIONS

For school readiness, the Centers for Diseases Control (CDC) recommends the installation of physical barriers, such as clear plastic sneeze guards, particularly in areas where it is difficult for individuals to remain at least 6 feet apart to reduce the spread of COVID-19 in K-12 Schools.

Non-Contact Face Recognition Screening Thermometer

Available as a Special Order

The latest in body temperature detection, face mask recognition and attendance management. Traditional methods of temperature measurement run at a higher cost and at a higher risk of infection. Reduce the administration expenses and errors of an ordinary staff member. We provide cutting edge technology to keep safety a priority.

Specifications

- Recognition Speed in less than 0.5s
- Accuracy level at a rated 99.8%
- Automatic report generation

Item No: 62636

Product Description

Model: JT-W020
Power consumption: 20W (max)
Identification time: <1s
Temperature measurement distance: 15.7-23.6inch
Effective pixels: 2 million
Screen size: IPS LCD screen
Resolution: 800x1280dpi
Face recognition height: 47.2-70.9inch (angle adjustable)
Temperature measurement range: 30 °C-45 °C
Memory: 2G (optional 1G / 4G)
Storage: 16G
IP: 34
Working temperature: 16°C-35°C
Operating humidity: 5% -9% relative humidity, no condensation
Network interface: RJ45 10M / 100M adaptive Ethernet port
Wiegand interface: Wiegand output, support Wiegand 26 and 34
Wiegand interface: can support Wiegand input root 26 and 34
Alarm output: 1 way switch output (switch)
USB interface: 1 USB interface (can be connected to an ID card reader)

Touchless Occupancy Indicator System

Available as a Special Order

Safety is Critical

Our Touchless Occupancy Indicator system provides a safe, socially distant visual indication of when a space is in use or available. Researchers find that providing visual cues at entry doors, remote locations, and other areas within a space promotes confidence, avoids unnecessary contact, and provides a sense of security and higher morale.

Specifications

- Ideal for restrooms, shared office spaces, anywhere the social distancing should be encouraged.
- Designed for fast, simple installation using wireless sensors and simple in field programming.
- Utilizes energy saving LED indicator lights in single or dual colors with silk screening available.
- Sensor provides a 45 second time delay before signaling vacancy to ensure area is unoccupied.

Occupancy Indicator System

The Occupancy Indicator System consists of a wireless occupancy sensor, radio receiver, and green/red indicator light. When motion is detected by the sensor, the indicator light will illuminate Red meaning the room is occupied. If motion is not detected for 45 seconds, the light will change to Green, indicating the room is unoccupied.

Specifications

Sensor

Dimensions H x W x D	5.83 in x 2.52 in x 1.8 in (148 mm x 64 mm x 45 mm)
Power supply	Indoor Light Harvesting Optional: Supplemental battery
RF communications	EnOcean 928 MHz, 908 MHz, 868 MHz
Transmission range	80 ft (25 m)
Motion detection range	50ft (15 m) wide angle / 100 ft (30 m) long range lens
Startup charge times*	First motion transmission / Linking = 5 min @ 200 Lux
Charge time to full	25 hours @ 200 Lux
Sustaining charge time	3 hours per 24 hours @ 200 Lux
Motion transmission interval	30 seconds
Unoccupied transmission	10 and 30 minutes since last motion detection
Heartbeat transmission	Disabled (default)
Environment indoor use	14° to 104° F (-10° to 40° C), 20% to 95% relative humidity
Operating life in darkness	80 hours from full charge
Optional battery life:	Infrequent bright light: 20 years Consistent low light: 15 years
Mounting height	6 - 8 feet (1.8 - 2.5 m) recommended

Receiver

Dimensions H x W x D	2.78 in x 1.65 in x 1.1 in (73 mm x 42 mm x 28 mm)
Weight	3.2 oz.
Power supply	120 / 277 VAC, 60 Hz
Maximum load	16 A @ 120 / 277 VAC
0 - 10 V output	35 mA max.
Power consumption	1.1 W full load, 550 mW quiescent
Surge protection	Exceeding IEC61000-4-5 installation class 4
Inputs/outputs	Flying lead style wires: Two (2) power input wires One (1) switched output wire 0-10 V control output 12 VDC external occupancy sensor interface (25 mA load max.)
Local user interface	Two (2) buttons, one (1) bi-color LED for device configuration, and manual control
RF communications	EnOcean 902 MHz
Transmission range	100 ft (30 m)
Mounting	Connect to electrical boxes using threaded nipple
Environment	20% to 80% relative humidity, 14° to 104° F (-10° to 40° C)

Indicator Light

Power consumption	35 mA max.
Color	Red / Green
Mounting	Flush mount, wall anchors
