## Furthering Your Career with Semi Permanent Makeup

Of course, providing these services requires a whole new set of skills. Eyebrow and eyeliner tattooing are not only the most sought-after offerings, but the easiest to master. Lip procedures are more advanced and this is because the skin on the lips is much thinner and more delicate than that on the face each course comes with full Semi-Permanent makeup fundamentals in each course .

### Lip Blush

Lip blushing is a type of semi permanent cosmetic tattooing procedure achieved by depositing pigments in your lips using small needles. Lip blushing focuses on altering both color and shape to create younger-looking lips

### Semi Permanent Eyelash Enhancement

The lash enhancement is a tiny tattoo done with a tiny needle, and it's done underneath your natural eyelash line. This is known as lash enhancement or invisible eyeliner, and it involves tattooing an ultra-thin black line along the lash line to create the illusion of fuller, darker lashes—much for a natural, eye-opening effect . Excellent for adding income to your permanent makeup business
