

Knitting in the Shadows: an Introduction to Shadow Knitting

This technique is truly magical. Working with one color of yarn at a time, and only knit and purl stitches, a fabric can be created that reveals an image when viewed at an angle. In this workshop we explore shadow knitting, become comfortable with navigating its instructions, and then explore the general methods involved in creating shadow knitting patterns of our very own.

BEGINNER CLASS

basic knitting skills required

Basic knitting supplies needed:

2 skeins of worsted weight yarn that are high in contrast, circular knitting needles appropriate for the yarn you have selected (I like to have a variety of needles with me when creating a new design), stitch markers, pencil, stick ruler, measuring tape, calculator, sticky notes or magnetic board to keep your place on the chart, and the usual knitting bag filled with treasures.

HOMEWORK:

Be sure all yarns are wound and ready to use.
