BRAND STORY

My love for cycling is more than a hobby—it's a passion woven into my family's life. One summer evening, as the sun set in vibrant orange and pink, I took my wife and kids on a spontaneous bike adventure. We packed a picnic and rode through the countryside, wind in our hair, laughter echoing. Seeing my children's joy on the open road was unforgettable.

But I noticed the challenge of carrying our picnic supplies, blankets, and toys. My wife struggled with the weight, and the kids kept asking for snacks buried in our bags. It sparked an idea: there had to be a better way to combine my love for cycling with the practicality of family outings.

At home, I sketched designs for a cargo ebike—a bike to carry picnic gear, groceries, school bags, and more. It could make family trips easier and more enjoyable, helping other families experience the same freedom and joy we did.

Brand Mission

At Letrigo, our family's passion fuels every electric cargo bike. Born from playful innovation and practical design in our living room workshop, our bikes celebrate family moments, adventure, and quality craftsmanship. We ride to bring joy, creativity, and togetherness to every journey.
