

CIVIL ENGINEER INTERN

Hess Engineering and Construction Consultants is looking to hire a full-time, civil engineer intern. This is an excellent opportunity to learn and gain experience in a supportive environment.

Job Description:

A civil engineer intern is responsible for assisting with the design and preparation of a wide variety of civil engineering projects. The intern will work under the supervision of a licensed civil engineer and will be responsible for a variety of tasks including research, data analysis, and project management.

Responsibilities:

- Assisting with the design and construction of infrastructure projects
- Conducting research and data analysis
- Preparing reports and presentations
- Assisting with project management tasks
- Attending meetings with clients and other project stakeholders

Qualifications:

- Currently pursuing a degree in civil engineering
- Strong analytical and problem-solving skills
- Proficient in the use of computer-aided design (CAD) software
- Strong written and verbal communication skills
- Must be willing to work in a team environment

The internship is full time with a duration of 3-6 months.

Compensation is negotiable depending on the experience level and qualifications.

To apply, please email your resume to William Hess, PE at whess@hessengineeringllc.com.
