

SAFETY POLICY

Introduction

At Hydraroll safety is our top priority. This policy outlines the standards and practices required to ensure the safety of our operators, clients, and the public during our operations. Adherence to this policy is mandatory for all employees, contractors, and stakeholders involved in the business.

General Safety Guidelines

- **Personal Protective Equipment (PPE):** Mechanics must always wear appropriate PPE, including gloves, safety goggles, steel-toe boots, and flame-resistant clothing.
- **Vehicle Inspection:** The service vehicle must be inspected daily to ensure it is roadworthy and equipped with necessary safety tools and equipment.
- **Tool Maintenance:** All tools and machinery must be regularly maintained and inspected to prevent malfunctions that could lead to injury.
- **Work Area Safety:** Operators must ensure that the work area is safely cordoned off to prevent unauthorized access and minimize hazards.
- **Communication:** Always maintain clear communication with the client and inform them of potential risks during repairs.

On-Site Safety Measures

- **Hazard Assessment:** Conduct a thorough assessment of the worksite before starting any repairs to identify and mitigate risks.
- **Vehicle Stability:** Ensure that the client's vehicle is securely stabilized using jacks and stands before performing any work underneath.
- **Fire Safety:** Carry a functional fire extinguisher in the service vehicle and ensure employees are trained in its use.
- **Electrical Safety:** Exercise caution when handling vehicle batteries and electrical systems, avoiding short circuits and sparks.
- **Weather Conditions:** Avoid performing repairs in severe weather conditions, such as heavy rain, snow, or extreme heat, to protect both the mechanic and the vehicle.

Transportation and Road Safety

- **Driver Certification:** All employees must possess a valid driver's license and clean driving record.

“Building Reliability, One Repair at a Time”

- **Defensive Driving:** Employees must follow defensive driving practices to ensure the safety of themselves and others on the road.
- **Parking Precautions:** Park the service vehicle in a safe and legal location that minimizes disruption to traffic and pedestrians.
- **Emergency Protocols:** In case of a breakdown or roadside emergency, use hazard lights and warning cones to alert oncoming traffic.

General Safety Guidelines

- **Safety Training:** Regular training sessions will be conducted to ensure mechanics are updated on safety practices, equipment handling, and emergency procedures.
- **First Aid Certification:** All mechanics must hold a valid first aid certification to handle minor injuries and emergencies.
- **Policy Review:** This safety policy will be reviewed annually and updated as necessary to meet evolving safety standards.
- **Incident Reporting:** All accidents or near misses must be reported and documented to improve safety measures.

Emergency Response

- **Contact Information:** Mechanics must always carry a list of emergency contacts, including local police, fire departments, and medical services.
- **Evacuation Plan:** If a worksite poses an imminent danger, mechanics must evacuate immediately and notify both the client and emergency services.

Client Cooperation

- **Clear Guidelines:** Provide the client with safety instructions to follow during the repair process.
- **Restricted Areas:** Ensure clients and their families remain at a safe distance from the repair zone.
- **Post-repair Advice:** Offer guidance on safely operating the repaired vehicle and recommend further inspections if necessary.

Conclusion

This safety policy is designed to protect everyone involved in the mobile mechanic operations. Compliance ensures a safe and professional environment while building trust and reliability with our clients. Failure to adhere to this policy may result in disciplinary actions or termination.
