

# COMPARE ON THE ISSUES

Compare Mark Robertson and Dina Titus on **the issues**. Mark clearly represents the people of Nevada's First Congressional District better.

Issue	Mark Robertson	Dina Titus
<b>Abortion</b> In Nevada, abortion is settled. The people voted to allow abortion up to 24 weeks.	Mark will oppose any Federal legislation that overturns the will of the people of Nevada. The Supreme Court returned the issue to the States, and that's where it will stay.	Titus has already voted to overturn the will of the people. She voted to <b>allow abortion up to the moment of birth</b> and have your tax dollars pay for it.
<b>Border Security</b> Biden policies have allowed eight million people to enter illegally, costing hundreds of billions of taxpayer dollars.	Mark will fight to secure our border and to reform immigration laws so that we only allow people in who can contribute to our economy.	In her own words, Titus is "Ridin' with Biden" on his failed border policies. She voted against a House bill that would strengthen border security.
<b>Inflation</b> Since Biden took office, prices have climbed by nearly 20% costing average Nevada families more than \$10,000 per year.	Mark will work to stop runaway government spending and reverse Biden's terrible energy policies which have created the worst inflation in decades.	Titus voted for trillions of dollars of new deficit spending which took inflation to record high levels. Your dollar is worth 35% less since she joined Congress.
<b>Social Security</b> Social Security and Medicare are headed for bankruptcy in just a few years. Seniors could see a cut in their monthly income and a rise in their healthcare costs.	Mark will work with other members of Congress to strengthen and protect Social Security and Medicare so that the programs deliver the benefits you have already paid for.	During her 14 years in Congress, Titus has done nothing to fix these programs and admits she has no plans to fix them. She stated she will "keep her hands off" these programs even as they head for insolvency.
<b>School Choice</b> Nevada parents want the ability to choose which school is best for their children, whether that is public, private, charter, co-op, or home school.	Mark supports school choice. He supports eliminating the U.S. Department of Education and returning the \$86 billion they spend each year back to the States as vouchers that parents can use to pay for their school choice.	Titus believes that bureaucrats in Washington should dictate education decisions for Nevada families. She puts the interests of lobbyists and political donors ahead of the welfare of our children. Her failures have contributed to Nevada's ranking 49 <sup>th</sup> in math, reading, and science.
<b>Loyalty</b> Nevadans want representatives who put people before party and principles before politics.	Mark will be loyal to the Constitution and to the people he represents, not to any party, person, lobbyist, or corporation.	Titus repeatedly votes against the will of the people she is supposed to represent. She votes with her extreme liberal friends and the Democrat party nearly 100% of the time.
