

WATCHMAN

Quick Setup Instructions

Step 1: Connecting Watchman to your WiFi

- Power ON your Watchman and wait for the display to show “Offline”.
- Go to WiFi settings on your tablet/mobile/PC, and look for ppC_noInternet_..... network
- Connect to ppC_noInternet_..... network (refer figure below on left)

Internet may not be available

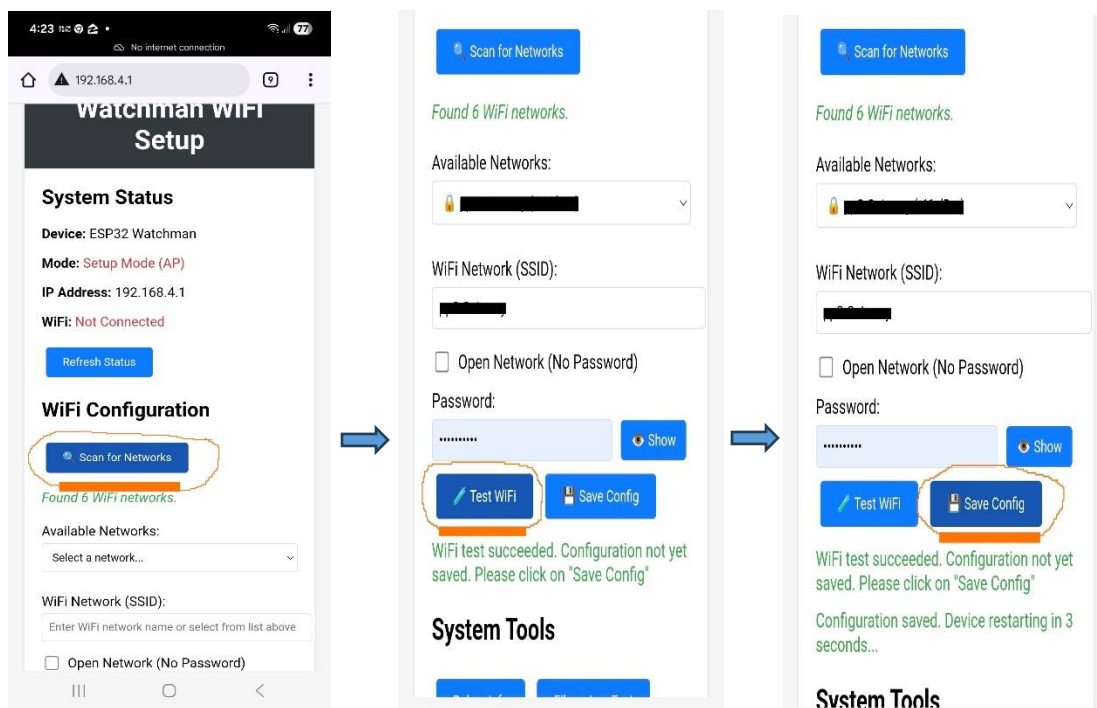

If you want to connect to this network without internet access, you can connect only this time or you can set your phone to always connect to it even if internet isn't available.

You can change this in Settings > Connections > Wi-Fi > Intelligent Wi-Fi > Switch to mobile data > Network exceptions.

If your Mobile Hotspot internet connection isn't working, check whether your service provider measures tethering data separately from other mobile data. If you don't have any tethering data left, your Mobile Hotspot won't work.

Connect only this time

- If a popup shows, click on “Connect only this time” (refer figure above on right)
- Once connected, go to a browser (google Chrome, Safari etc) and type **192.168.4.1** in URL field and hit enter.
- Click on “Scan WiFi networks” (left-most picture)

- Select WiFi, input your WiFi password.
- Click on “Test WiFi” (middle picture). On successful test, click on “Save Config” (right-most picture)
- It completes the WiFi setup.

Step 2: Setting up for logs and alerts

[If you are an existing customer, skip step “a” and “b” below]

- a. Go to <https://watchman.online/> and click “Register” button.
- b. Once registered, you will receive an activation email (if it does not arrive within a few minutes, please check spam folder). **Click on activation link before your first login.**
- c. Login (to <https://pp-code.com/>), click on “Activate/Add your Product” and follow the steps, [Please find the product ID on the back of your Watchman]
- d. Once activated, it will take you to Watchman page where you will see your Watchman. Click on it, you will be at the log page. Please note that first log is test log (sent by the system). **Your actual logs may appear an hour later.**
- e. On the same page (top right in red color), you will see “**Alert Configuration**”, click on it to configure your alerts.

Download our App “Watchman Online” – for easy access to logs.
