

**M.V.P.I. MANAGEMENT LCC**

# **Request For Proposal**

<https://mvpimanagementllc.com>

## Introduction

# Who We Are?

**MVPI Management LLC, based in Houston, Texas, is one of the largest and most trusted real estate consulting groups, specializing in comprehensive solutions for property management and investment. In addition to our expertise in real estate, we offer business consulting services tailored to the needs of IT companies, providing strategic guidance and innovative solutions. With over 20 years of experience, we are committed to delivering exceptional results and fostering lasting partnerships with our clients.**

# What Are We Looking For?

We are seeking mid-size software companies with proven expertise in developing high-quality Android and iOS applications for a global audience. The ideal companies will have a skilled and dynamic team, a commitment to delivering results on time, and the ability to adhere to guidelines while exceeding expectations. We value partners who are driven to innovate and outperform competitors in a fast-paced, competitive market.

---

## Objective of the RFP

The objective of our Request for Proposal (RFP) is to identify a capable and reliable software development partner(s) to collaborate with us in designing 2 distinct applications within a specified timeframe. These applications are being developed for some of our most prestigious clients, each with unique requirements that demand precision, innovation, and adherence to strict deadlines. Our goal is to deliver high-quality solutions that align with our clients' expectations and uphold our reputation for excellence.

# TRAVEL HUNTER APP.

**Your Ultimate Travel Companion: AI Based:**Travel Hunter is a one-stop solution for seamless travel planning. From pick-and-drop services to hotel selection, it offers the best global deals on accommodations, dining, shopping, and holiday packages. Enjoy smart budgeting tools, price comparisons, and effortless booking for flights, trains, buses, and taxis. With family-friendly recommendations, emergency support (medical assistance, legal counsel, and nearby pharmacies), and exclusive discounts, Travel Hunter ensures a stress-free journey. Discover top-rated attractions, personalized gift options, and more—all in a single, user-friendly platform.

---

# FASHION CURATOR APP.

**Revolutionizing the Fashion Industry with a Unified Digital Hub: AI Driven:** This all-in-one fashion industry platform seamlessly connects key players, from leading fashion houses and renowned brands to emerging designers, models, and event organizers. By leveraging AI-powered matchmaking and real-time event management tools, it streamlines collaborations, networking, and business opportunities. Fashion brands can easily connect with talent, while show organizers can coordinate logistics for flawless event execution. Integrated booking services for venues, models, stylists, and technical crews simplify high-profile event planning. A dedicated marketplace enables talent discovery, sponsorships, and PR management. With virtual showrooms and live-streamed runway shows, this platform transforms the fashion ecosystem, making it more efficient, accessible, and globally connected.

## Compensation

# Explore the opportunity

This opportunity offers a chance to work in a dynamic global environment, collaborating with prestigious clients and gaining exposure to diverse projects. It is an excellent platform to showcase your expertise, build lasting client relationships, and establish your company as a trusted brand in the industry. Success in this collaboration can open doors to larger, high-profile projects in the future, solidifying your position as a leader in software development.

This platform provides an opportunity for you to not only develop the applications but also manage them for a year before the final technology handover. During this period, we expect you to train our technical team to independently manage the applications effectively. Additionally, we require your support (physical presence) for 2-3 months to upload the applications to our servers and address any issues that may arise during the User Acceptance Testing (UAT) phase, ensuring a seamless transition and successful deployment.

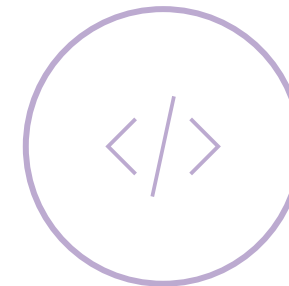

## Our Expectations

### Application Design and Implementation

We require you to design the application(s) from the ground up, ensure their successful deployment on our servers, and provide support until full implementation is achieved.

### Next Step

If your company is confident in its ability to deliver results for this project, please visit our website to complete a brief requirement form or reach out to us via email. Upon reviewing your response, we will arrange a Zoom meeting to discuss the next steps in detail.

We are seeking to collaborate exclusively with experienced and dedicated software development companies. To be clear, if your team lacks the necessary expertise or skill set to design the required applications, we kindly request that you refrain from applying. Detailed information about the project is available on our website.

## Conditions

Vendors may select their preferred payment structure, whether milestone-based, hourly, or turnkey project payments. We are open to all options, as long as the pricing remains competitive.

We will collaborate closely with you to secure the necessary approvals from the IRS, the Federal Trade Commission (FTC), the State Governor's Office, the Department of Finance, and other relevant Government agencies.

As this program is Advance Based, and to safeguard the interest of our Clients the outsourced project must comply with recently updated stringent laws, which include a mandatory "Caution Deposit" of \$4,500 (Four Thousand Five Hundred USD) collectively for both projects.

# Thank You
