

DIRTY DEEDS INDUSTRIES AND BAMUFFLER EXHAUST SYSTEM GUIDE

The below will be a road map to your custom exhaust system that matches your budget and preferences exactly while, explaining our build process and customer satisfaction.

As you navigate through the following, know that this is only a guide and we can become as custom as you want to get. "Dirty Deeds can make anything faster!" Tube size, material, and adjustments can be made to better fit your needs. We have built systems for every make of vehicle on the road today.

Tundra's are our focus. However diesel, E-85 and race trucks are all systems we are experts in.

What vehicle do you have?

We need to know the following specs of your vehicle when you contact us:

Engine size.

Cab size.

Year.

Model and trim level.

Tire size.

AWD/FWD/2WD/4WD

Single vs Dual Exhaust?

Keith details the differences in this video. We encourage the single system as these trucks were designed to be ran with a single system. However, many want the look of the dual exhaust, so we tie into the stock TRD tailpipes. With a single system you gain: low-end torque, 3-10HP, and 1-5MPG, have self-installable, bolt-on package.

What is your budget?

Muffler Only

\$200+

This is only a muffler & not a complete system

Budget System

\$700+

No Drone
Cheap, Fast, Loud
Bolt-on, self install
Gained: 3-10 HP, 1-5 MPG, & Low End Torque

Standard System

\$900+

No Drone, more refined advanced tone, Bolt-on
Gained: 3-10 HP, 1-5 MPG, & Low End Torque

TRD Replacement

\$1100+

Dual Exhaust System
Preferred Installed with Long Tube Headers & Mid Pipes +/- \$ 1150

Race System

\$1500+

This is fully custom and best to just call Keith to discuss what you want.

• Pricing is for comparison purposes only; subject to change without notice. Does not include shipping or taxes.

Stainless Steel or Aluminized Steel?

Depending on where you live: Do your roads get salted? Do you get much rain? Simple answer: while our aluminized systems cost less, if you live outside of the very dry, Southwest Region of America, we highly suggest stainless steel. Each system, regardless of metal type, is painted with high-temp, flat-black paint when completed. This not only gives it a nice finished look, is more desired, it also protects the metal. Over time, you can simply repaint if desired.

What is your sound preference?

- > Loud, attention getting, rowdy?
- > Deep throaty, clean and mellow?
- > You hear it when you want to, but stock when you're cruising down the highway?

Current or future upgrades?

- Tuner
- Headers
- Regearing
- Supercharger

What is your vehicle usage?

- > Do you tow much? What do you tow?
- > Do your wife and kids ride with you much?
- > Do you use your truck for work; or drive clients around?
- > Do you live in a quiet condo or take the kids to school regularly?

'UPGRADING THE EXHAUST IS THE SINGLE MOST VALUABLE UPGRADE ONE CAN MAKE ON THEIR VEHICLE'

DIRTY DEEDS INDUSTRIES AND BAMUFFLER EXHAUST SYSTEM GUIDE

\$900+

Very clean, refined sound,
bolt-on with No Drone

Aggressive sound?

6" 

Deep, clean & mellow sound?

8" 

MOST POPULAR

Family friendly &/or towing?

10" 

TRD Replacement

\$1100+

Dual Exhaust System
Increased Performance
Long Tube Headers and
Mid-Pipes should be
done too.

Race System

\$1500+

This is fully custom and best
to just call Keith to discuss
what you want.

Sound Guarantee:

Each system is backed 100% by our product warranty for the life of the product while you own the vehicle. More importantly, we also back the sound 100%. So lets say you buy a 6" standard system from us and it's a bit too rowdy for your liking, no problem... ship it back, work with Keith to get the right sound and we ship you out a new system. You will have to pay shipping both ways.

Order Process:

Contact Dirty Deeds Industries directly or order online. Ordering online will result in fastest order processing, however any current sales will not be reflected. Know the system you want? Great, then send an email to dirtydeedsindustries@gmail.com and it will be processed. Need some advise or have questions? Call/text our office at 760-877-4234. Keith is hard to get a hold of because he gives his 100% to each customer, but we make every effort to get back to everyone quickly.

Now that you submitted your order, we will charge your credit card through PayPal, generating a receipt to be sent to your email. You are now added to our build board. Your 30 day clock starts. Want to buy, but need to budget money? No worries, we do 50% today and 50% before it ships, but we start building your system today.

Ready to ship! You will be contacted to pay any outstanding balances the week your shipment is shipping. We will prepare your shipment using FedEx Ground. It takes about 7-10 days for our system to arrive. You will be emailed a shipment confirmation and tracking details from FedEx.

Build time:

Because each system is 100% custom, nothing is sitting on the shelf ready to ship. We take 30 days from confirmed order to boxed and ready to ship. Our shop manufactures each element, quality checks, paints and packages your system as if it is going on Keith's truck.

Installation:

Some systems are bolt on ready, some need a shop to install. Bolt-on systems you can do in your driveway with minimal tools. Keith actually had a YouTube video doing it blindfolded. A new 2" metal hole saw bit is needed when installing a resonator.

Bad Ass accessories for Bad Ass toys

We are a premier dealer for most vehicle related accessories. Check out our website for an expansive inventory.
