

# **Quilt Care Instructions**

Spot clean as needed. When a full washing is needed, use cold water with a phosphate free detergent (gentle, non-scented), gentle cycle. Color catchers are suggested for the first few washes. Remove quilt from the washer right away. Air dry in shade or indoors; or tumble dry, no heat in dryer. Do not use fabric softener or dryer sheets.

Store quilts rolled up in a cotton pillow case. Do not store in cedar chests.
