

Why Should You Invest In A Wedding Album?

Why Should You Invest In A Wedding Album?

After your wedding is over and your keepsakes have all been stored, it is nice to revisit that day by glancing through photographs that capture every special moment. Like most couples, you probably went through great lengths to have a photographer at your wedding to catch beautiful images of your day. Therefore, it is important to choose the right way to display and protect your wedding photographs so they can be pulled out and gone through again and again. If you are considering the best ways to store your cherished photos, then here are several of the top reasons why you should have a wedding album that will always be available for a nostalgic trip down memory lane.

Preserve Your Memories Over Time

Although it is hard to believe that you could forget any moment, the truth is that memories fade over time. While you will likely remember the rush of emotions that you felt while you said your vows, you will also forget those beautiful moments that made your wedding unique. With a wedding album, you can remember precious events such as your niece kissing your cheek or your uncle's humorous toast with only a quick flip of the pages.

Digital Copies Can Be Lost

As much as we trust electronic media for our

important documents and entertainment, it is important to remember that CDs and backup files can be lost or deleted. Not to mention, they can be hard to retrieve at a moment's notice. If your wedding photos are stored on CDs or your personal computer, then go ahead and keep them there for back up. However, make the effort to have them printed and compiled into a traditional wedding album that is less likely to ever be lost.

Technology Changes Quickly

Ask any couple that recorded their wedding on VHS, and you will learn a valuable lesson about the pitfalls of technological change. Those DVDs and CDs holding your images today will likely be obsolete within only a few short years. While many couples plan to have their wedding memories transferred to the next form of electronic media, the sad truth is that many never get around to it. Do not let that be you. If there is one thing that is certain, it is that traditional albums have been around for a long time. By setting up a wedding album, you can be sure your memories are preserved no matter how much things may change technologically.

Personalize Your Wedding Memories

One of the best things about wedding albums is that they can make a personalized statement about your marriage. Whether you choose a leather-bound album or one covered in fabric can make a tremendous difference in how your photos are presented. Many albums can also be personalized with your favorite image, your

shared name or even with a favorite photograph that you select from your special day. By choosing a cover that is personalized, you can make sure that everyone who sees your album knows the value you place on your marriage.

Wedding Albums are Like a Storybook

When browsing through the pages of a photo album, your friends and family can enjoy the story of your wedding day. Framed photos and snapshots may only provide a glimpse into one specific moment. However, an album can be arranged to provide a complete view of your special day from beginning to end. You can even set up specific albums for your engagement dinner, wedding ceremony, reception and honeymoon if you prefer. Because your wedding day likely had a storybook feeling, capture this effect by arranging your photos in an album that carries your viewer through each special moment. Create a Family Heirloom

Throughout history, wedding albums have served as an essential record of a family's history. Nowhere else can a person find so many authentic photos of relatives and friends engaged in a day full of romance and family attachments. By creating a wedding album, you will be contributing to your family history by ensuring that future generations have a tangible record of how their family came to be over time. While it may be hard to imagine great-grandchildren so far down the road, it is likely that they could one day have your album passed down into their hands.

You Will be Glad You Have It

When looking back, the only regret that many couples have is that they do not have enough photographs of their special day. Alternatively, those who took the time to create a wedding album always report happiness that they found a beautiful way to capture their memories. With your album, you can quickly show off your wedding photos and talk about your special day.

Wedding albums are also a great way to revisit memories on each of your anniversaries. Whether you are just in the planning stages of your wedding or are searching for ways to preserve photographs of your recent ceremony, it is good to know all of the reasons why a traditional wedding album is better for displaying and storing your photos than other methods. Although your photographer may have provided you with digital copies of your images, electronic media can fade and is simply unable to provide the personalized appeal of a quality wedding album. To create a professional family heirloom that will always bring back fond memories of your wedding, choose an album that can hold all of the treasured photographs from your wedding day.
