

Why pond depth matters

The deeper a diffuser plate is placed in your pond, the more area it can effectively aerate. Shallow ponds, or ponds with irregular shapes & bends, require more diffuser plates per surface acre.

In shallow ponds, the column of diffused air is not able to “open” as far which limits the effective area of each plate. The bends and curves in irregular shaped ponds block the circulation provided by an aeration system which creates the need for more plates to reach isolated sections of your pond.

As diffused air leaves the diffuser plate, it rises to the pond’s surface in a V pattern, creating a current. The higher this pattern is able to rise, the wider it becomes which allows it to circulate a greater volume of water.

Airmax[®]
Aeration & Fountains

**Water Garden
Aeration**

Why Aerate Your Water Garden?

Aeration works from the bottom up, providing circulation and increased dissolved oxygen levels. Although waterfalls and fountain features add oxygen to the pond, in many cases, they are not enough. Adding a PondAir™ or KoiAir™ system will ensure you have adequate aeration and circulation.

BONUS: Aeration systems can also be used as a de-icer in freezing climates to maintain an open hole in the ice to allow gas exchange.

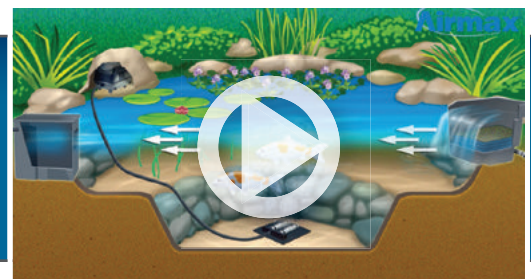

Here are 5 great reasons to add aeration to your pond...

- ✓ A properly sized aerator adds valuable oxygen to a pond more efficiently than a typical waterfall feature.
- ✓ Higher oxygen levels increase beneficial bacteria in a pond, leading to healthier fish, cleaner water and less organic buildup on the bottom of a pond.
- ✓ Aeration replaces the need for de-icers or heaters in the winter months. Aeration releases gasses from the pond and adds oxygen more efficiently than a de-icer or pond heater.
- ✓ Saves Energy Costs of running a waterfall pump. A properly sized aerator can aerate a pond allowing you to turn your waterfall pump on only when you're there to enjoy it. This can save you hundreds of dollars each year
- ✓ Reduce Pond Maintenance. By running an aerator in conjunction with a waterfall pump, your pond will stay cleaner, longer.

PondTint™ Blue & Nite Pond Colorant

- Shades & Protects Your Pond
- Available in Two Colors
- Safe for All Aquatic Life

PondTint™ is a non-toxic pond dye designed to help keep water sparkling clean and cool. Shaded pond water naturally stays clearer than pond water in full sun. If a pond does not have significant surface plant coverage it is a good idea to use PondTint™ in the hot summer months to shade the pond. Available in two colors: PondTint™ Blue and PondTint™ Nite (Dark Blue).

CC064-16	PondTint™ Blue, 16 fl oz	Treats 16,000 Gallons
CC085-16	PondTint™ Nite, 16 fl oz	Treats 16,000 Gallons

Sparkle™ Fountain Cleaner

- Rapidly Cleans Fountains & Water Features
- Works On All Water Feature Surfaces
- Tough Stain Lifting Formula

Sparkle™ fountain cleaner is a revolutionary product designed specifically to keep fountains, bubblers and disappearing waterfall feature clean and clear all year long. Sparkle™ helps prevent stains, sludge, mineral deposits and organic contaminants from forming in basins. Safe for use on all makes and models of fountains and bird baths.

SubLime™ Limescale Remover

- Removes Tough Limescale Stains
- Keeps Basins Looking New
- Keeps Pumps & Lines Free-Flowing

SubLime™ will deep clean basin pits, cracks and crevices to ensure a new appearance all year round. SubLime™ will also help to prolong the life of fountain pumps by removing limescale and calcium deposits in and around the pump housing. Sublime™ safely removes limescale and calcium deposits in all models of fountains, bubblers and water features. Its unique, gentle formula allows for use on all substrates: ceramic, cement, plastic, resin and rock.

CC066-8	SubLime™, 8 fl oz	Treats 80 Gallons
CC066-IG	SubLime™, 1 gal (128 fl oz)	Treats 1,280 Gallons

pHGuard™ pH Buffer

- Prevents Wide pH Swings
- Sustains pH at Safe Levels
- Safe For All Aquatic Life

When used as directed, pHGuard™ will stabilize pond water pH and maintain buffering capacity as safe levels between 80-240 ppm. pHGuard™ will help prevent wide pH swings which are typical from morning to night. pHGuard™ makes pond water safe for fish and plants and helps keep water quality problems from arising in the hot summer months. Keeping a properly buffered system is essential for the completion of the nitrification process which allows harmful ammonia to be converted to harmless plant food.

CC011-2	pHGuard™, 2 lb	Treats 8,000 Gallons
---------	----------------	----------------------

pHusion™ pH Reducer

- Quickly & Safely Lowers pH
- Increases Fish Electrolytic Uptake
- Safe For All Aquatic Life

pHusion™ fuses pH lowering qualities with natural electrolytic supplements to safely lower pH levels in pond water at no more than 0.2 points per application. pHusion™ also adds much needed electrolytes to help fish maintain a strong slime coat and healthy appearance.

CC025-2	pHusion™, 2 lb	Treats 32,000 Gallons
CC025-25	pHusion™, 25 lb	Treats 400,000 Gallons

Foam-B-Gone™ Foam Remover

- Removes Foam In Seconds
- For Use In Ponds, Fountains & Statuary
- Safe for All Aquatic Life

Foam-B-Gone™ will remove foam from water within seconds of application. Foam is usually caused by excessive proteins present in pond water. Protein foam can be harmful and should be removed quickly.

CC060-8	Foam-B-Gone™, 8 fl oz	Treats 8,000 Gallons
CC060-1G	Foam-B-Gone™, 1 gal (128 fl oz)	Treats 128,000 Gallons

WipeOut™ Bacterial Control

- Controls & Prevents Bacterial Infections
- Controls Finrot & Ulcers
- Safe For Fish & Plants

WipeOut™ bacterial control is excellent for controlling gill diseases in pond and aquarium fish. Bacterial diseases generally results from fish stress due to adverse water quality conditions (pH, oxygen or temperature problems), habitat clean-outs, untreated abrasions or predators. WipeOut™ works extremely well on pond fish species such as koi and goldfish as well as on commonly found aquarium fish species. Wipeout™ is excellent for controlling and preventing bacteria infections such as finrot and ulcers.

CC131-8 WipeOut™, 8 oz Treats 4,800 Gallons

ParaSalt™ Pond Salt

- Helps Control Common Parasites
- Maintains Healthy Slime Coat
- Safe for All Aquatic Life

ParaSalt™ is formulated to increase koi and goldfish electrolytic intake. Electrolytes are critical in building and maintaining a healthy slime coat. Electrolytes such as potassium are essential in wound repair and in times of heavy stress (ie – during water changes or clean-outs). ParaSalt™ is excellent for mucous production when healing from a wound.

ParaSalt™ will also help ward off and remove most common protozoan parasites found in koi and goldfish such as; Dactylogyrus, Byrodctylus, Epistylis, Trichodina and Chilodonella. ParaSalt™ can be used in a salt bath for heavy infestations or as a routine treatment to keep parasites from entering the pond environment.

FlushPACS™ Septic Treatment

- Fast Acting Enzymes Break Down Waste
- Reduce Septic Tank Build-Up
- Simply Flush to Treat

Septic backups are a costly, ugly, smelly mess. Excess solids in the septic holding tank can build-up and cause unexpected backups and expensive repairs. When a backup happens, sewage and wastewater can enter your home through toilets, sinks and drains. Simply flushing one FlushPAC™ down your toilet each month can help prevent these costly repairs that are upwards of \$6,000. FlushPACS™ contain fast-acting enzymes that break down household waste without damaging plumbing septic tanks. Once in the septic tank, these bacteria and enzymes continue to work to break up waste and reduce tank build-up.
